

PRODUCT DATASHEET

GRP and Aluminium Termination Bar

RynoTrim's high quality, durable termination bars are a neat and efficient means of terminating roofing and waterproofing membranes at wall abutments.

GRP termination bar is manufactured from pultruded glass fibre reinforced polyester. It is UV protected and has a negligible coefficient of thermal expansion. It is available from stock in black, white or grey.

Aluminium termination bar is manufactured from aluminium alloy BS 1474, Quality 6063/T6 (AlMgSi 0.5 F22). It is available from stock in mill finish.

Both are available in further colours to special order.

KEY FEATURES

- Economical alternative to traditional lead flashing, eliminating the need to cut chases
- Neat unobtrusive appearance
- Choice of GRP or aluminium
- Suitable for all waterproofing types
- Fix through or cover flashing type available
- Simple to handle, work and install
- Full range of fixings and mastic sealants available
- Maintenance free

PERFORMANCE

GRP and aluminium termination bars will not rust and are not affected by atmospheric pollution. They are colourfast and once installed are maintenance free.

SUPPLY

GRP and aluminium termination bars are supplied in 3m lengths. There are 30 lengths per carton.
