

Underarm Support Ergoslider Plus

Ergonomic wrist rest

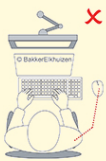

Work even more comfortably with the ErgoSlider Plus Underarm Support

The ErgoSlider Plus Underarm Support is an optional accessory for the ErgoSlider Plus.

The asymmetrical design of the Underarm Support provides a larger surface on which to rest the wrists for optimum comfort during work.

When working with a keyboard and mouse it is important that the arm is sufficiently supported. This can be done by using a good armrest on the desk chair or a separate armrest.

Tailor-made: Ergoslider Plus+ fits neatly in the arm support.

Ergonomic: supports the arms and helps reduce muscular strain in the neck and shoulders

Asymmetrical: extra wide arm support so that the arms are supported both during typing and when using a mouse

Simple mounting: bracket on the desk top (drilling not required) and two adjusting screws so that the support can be adjusted to the thickness of the desk top (between 10 and 35 mm)
