Oh wow,

The twins have slept through 8 glorious nights in a row for the first time EVER. They are even having proper naps during the day - at the same time!! We just don't know ourselves. We have got so much other stuff done round the house and having a lot more time to spend together as a couple. Plus the babes when they are awake are so much happier.

Thank-you thank-you thank-you!!!!

Dear team at Safe-T-Sleep,

I just want to thank you for an awesome product. Not only did it give us peace of mind but many hours of peaceful sleep. When number 6&7 arrived, my biggest fear was the thought of lack of sleep and coping with two babes at night when I would rather be catching up on some well deserved sleep.

When the boys were about four months old and we were planning on moving them into a cot, we discussed what options might help with good sleeping habits and night time routines. After checking out what was on the market we made the decision to purchase two Safe T Sleeps. That has to be one of the best purchases we ever made. We never looked back.

The boys quickly associated the Safe-T-Sleep with sleep time, when we put the velcro on sometimes they just instantly closed there eyes knowing what was going to happen next, unbelievable! We knew they were going to be safe and secure for the duration of their sleep so we relaxed as well. They quickly starting sleeping for good length's of time and when they did wake were often happy for a time to lie and make noises to each other until we had opened our eyes wide enough to face getting up to tend to their needs to start another day if they had slept right through night. The price initially was an outlay for two but knowing what we know now the price wasn't an issue it was an investment. I think it would be less than a coffee a day for the duration you would use it!!! How could you ever put a price on a good nights sleep. Just ask any sleep deprived parent what they would pay to get a good nights sleep?

I purchased another two for convenience to use at the Nanny's house during the day so we didn't have to take them off their cot each day. The routine was also set there and they slept for at least two hours each afternoon until they were at least two and a half old. I don't think they would have done this if they had been left to sleep unsecured in their cot. I can't thank you enough for producing such an awesome product. The peace of mind was fantastic and the boys benefited hugely by getting plenty of sleep to grow into healthy, happy toddlers.

I would recommend it to any one looking for a good nights sleep of peace of mind. All first time parents should now about this product. Well done Team.

Regards

Dorothy & Andrew and the rest of the Tribe.'

Hi Miriam,

Here we go:

The Safe T Sleep^s for our twins are outstanding. Our boys are in childcare 1 day per week and they are called "The Dream Babies" because they go to sleep so easily. I am convinced that this is because of Safe T Sleep. Not only do the twins sleep well but so do we because we do not have to worry how they sleep.

Thanks again.

Dear Miriam

Just a Quick note to let you know I am thrilled with the latest Safe T Sleep!

The wider section that fits around the cot mattress is a definite improvement in that it fits the mattress more snugly and therefore does not have the tendency to bunch up as did the last model. The wrap for baby being wider with the thicker fabric and extra velcro makes for a much better fit for both Lauren and Curtis even though they are different in size. Also, having the single middle seam on the wrap now allows for even more movement, which is wonderful as both our babies like to play prior to sleep.

As both Lauren and Curtis have colds at present, I have had to elevate their mattresses slightly so they are able to breath easier. I find that with the latest Safe T Sleep being a much more secure and comfortable fit, I am able to do this with peace of mind knowing that they cannot become endangered by rolling up against the side or down the bottom of their cots.

Keep up the good work!

Best regards

Liz Warner

Dear Miriam

I am writing to let you know how pleased I am with your product Safe-T-Sleep.

Originally my Plunket Nurse suggested I try the product as at that stage my twins were 8 months old and were both waking in the night. One because she was moving herself sideways in the cot and would end up getting herself stuck in all sorts of weird positions. My other twin would roll himself onto his tummy and would complain because he couldn't get himself back onto his back. Once I started sleeping all night again, because it encouraged them to sleep in a better position (without being too restricted) and therefore, weren't disturbing themselves or Mum and Dad during the night! Every now and again our son still rolls onto his tummy while the Safe-T-Sleep is fastened, but he is an age where this is not a problem and we see it was proof that the Safe-T-Sleep does not restrict their movement!

I thoroughly recommend your product being beneficial to both newborn babies and also older babies like mine were. It certainly is a relief to be getting a good night's sleep again.

Yours faithfully

Pam Lovich (Mrs)
