

Hi Miriam,

Just wanted to thank you very much for the Safe T Sleep that you sent me for my son Luke.

It was very much appreciated. He seems to be settling well after transferring him from bassinette to cot.

Thanks again.

Regards

Carmen Bowman (nee Stenbridge)

### **23 June 1992**

Dear Miriam,

Thank you for inviting me to take part in your "Safe-T" Sleep survey.

Sarah was 9 months old when I started using "Safe T" Sleep and was very unsettled at night, sometimes waking 6 or 7 times. After taking two days to get used to the product, I found she started to sleep longer and a lot sounder. She was unable to move up to the top of the cot and jam her head, or crawl out from under her covers and wake up freezing on top of them. I now find that if she wakes at all, it will only be one or two times a night!

I also have a 3 ½ year old son who, when first introduced to his big bed fell out quite regularly, sometimes bruising his head badly. I know that with using "Safe T" Sleep, this will not be a problem with Sarah.

Apart from helping to eliminate cot death in infants, I can see this product as a nursery necessity in many other ways.

Congratulations Miriam. I wish you every success with this product-I only wish it had been around when my other four children were babies.

Regards

Carol Ryan.

P.S. Thank heavens for mothers – without them what would other mothers do!!

### **4<sup>th</sup> July 1992**

Dear Miriam,

I am glad of the day I decided to try out your "Safe T Sleep". It has tremendously changed Paul's (who is 15 months) restless sleeping habits for the better. When Paul was about 9 months he started moving about more in his sleep. He would get up on all fours, turn around to face the foot of the bed/cot, then plonk himself down and continued sleeping in that position. At times he would wake up crying, because he had his foot or arm stuck between the cot rails or he had rolled over twice and had hit his head against the side of the cot. Then about 10 to 11 months he would turn right around, a full circle, lying on his back, which resulted in being stuck at the width of the cot as he got a bit bigger. These activities would cause him to wake up two to three times during the night.

"Safe T Sleep" has changed all that! Now Paul sleeps soundly through the night, waking up once at times for a midnight feed as I am still breastfeeding. He now moves comfortably from side to side without hitting the sides of the cot. He doesn't turn around anymore and he doesn't get up on all fours during his sleep.

I can also see the advantages of using "Safe T Sleep" on a bed for toddlers. It will most definitely stop them from falling off the bed, yet at the same time giving them ample movement to still be comfortable. I would recommend this product to any mother who is thinking of putting their toddler in a bed and of course to mothers who have restless babies like I had. I will most certainly continue to use "Safe T Sleep" to the next toddler stage for beds.

When I tuck Paul in at night, I leave with a secure feeling knowing that he is comfortable and safe – thanks to “Safe T Sleep”.

Wishing you every success.

Yours sincerely

Evon Tiffany

To Safe.T.Sleep,

I am writing in regard to a product I brought just yesterday (Safe-T-Sleep) to see if I could get a good nights sleep. For about a month now my 15mth old son has been waking 3-4 times through the night making myself & him tired and grumpy through the day. I had him checked at the doctors several times just to be sure he wasn't ill etc, then I saw an advertisement at plunket for your Safe-T-Sleep. I ordered one through my local chemist and thanx to this simple yet amazing idea I got my first nights sleep in ages. To many people including myself at first it seems like a lot of money to pay but believe me it's a small price to pay for a happier family all round,

thank you

Safe-T-Sleep

### **29 September 1992.**

Dear Miriam,

I am writing to tell you about the success we have had with the Safe T Sleep we purchased from you about two months ago, and to thank you for developing such a simple but effective product. We decided to purchase a Safe T Sleep after reading an article in the Little Treasures magazine. We had had 16 months of broken sleep with a little boy who seemed to need a lot of reassurance during the night. It had finally come to the stage where Steven got out of his bed every night, seemingly still asleep, and cried at his bedroom door. We had tried endless nights of letting him cry, going to him, changing his diet etc to correct the situation, but to no avail.

When we got the Safe T Sleep we went cold turkey with it, strapping Steven into it the first night we received it, rather than going through a conditioning period. Steven seems to feel secure and comfortable with the Safe T Sleep. When he goes to bed each night he lies still to have it wrapped around him. This is our success story with a Safe T Sleep, we trust there will be many more.

Yours sincerely

### **30 April 1992**

Dear Miriam,

I have found the Safe T Sleep to be very effective in teaching my son “Robert” to get to sleep and sleep well. When I first started using the Safe T Sleep Robert was at the stage of pulling himself up in his cot, the minute I put him down then yelling and working himself up so sleep wasn't possible. The Safe T Sleep enabled me to keep Robert lying down in his cot so I could then proceed to teach him good sleeping habits. As an added benefit the use of the Safe T Sleep keeps Robert in a correct position in his cot through the night so he doesn't wake himself up being jammed in a top corner of the cot.

I do not use the side of the cot (i.e. I leave it down) when using the Safe T Sleep this makes it much easier for tucking in.

I'm sure that when Robert is ready to make the move to a bed, that the Safe T Sleep will make the transition safe and hassle free.

As I haven't seen anything like your Safe T Sleep on the market I'm sure you will do well with your venture and be the answer to many harassed mothers prayers.

All the Best

Sue Bickford

To whom it may concern

I would like to order a Travel Sleep Wrap – please confirm that it goes from cot to king size bed in sizing – just want to make sure I am ordering the correct one. I am in Cobram, Victoria 3644, Australia and would like a price in A\$ please to have one sent to me.

I already have a Classic model I purchased 19 months ago for my little girl but it only goes up to a single bed size. It has been an absolute blessing but now that you can get them to fit up to a king size we are interested in another one – not only for travel with out toddler but we have another baby on the way. Thanks for such a fantastic product – I have recommended it to several of my friends who have since purchased one and they too are impressed. I am not sure how anyone gets a toddler to sleep without one!!!!!! My daughter is 19 months old and we have put her into a big girls bed well before the baby is due in early March so she wont have any resentment to the baby having her cot – without a Safe T Sleep I think we would have needed to buy another cot. Thanks again for the best product I have ever invested in.

Tracy Williamson

Australia

Dear Safe T Sleep Suppliers

I am currently using a cot size Safe T Sleep – and wouldn't be without it.

I would like to know the price of a bed size model as Courtney is 2 now and I think the transition to a bed would be easier with Safe T Sleep.

Thank you for a wonderful product: It really did solve all our sleepless nights.

Regards,

Sharon Williams
