

Caravans

[Lauren Jacobson](#) 8th October 2013

We took our 8 month old twins on holiday, staying in a caravan for nearly 3 weeks. We used safe t sleeps on the caravan squabs for them to safely sleep without having to use bulky portocots. Once we were home, I continued using the safe t sleeps for a week or so to transition them back into their cots. Thanks safe t sleep for helping us have the sleep filled holiday we were dreaming of!

Hi Miriam,

I met you about a month ago at the cafe on Maraetai and purchased a Travel Sleepwrap from you just as I was about to take a trip with my four month old (Ava) to the UK. I just wanted to say that I am so pleased with it, and was perfect for my trip as Ava was put in a cot (rather than bassinet) for the first time whilst we were there, and I had absolutely no anxiousness about it. I knew that she wouldn't be able to wriggle and get stuck through the cot bars, or roll onto her front (she's not yet rolling but knowing my luck she would have started doing so when I was overseas and without the wrap!).

Two of my friends have now purchased the wrap as I told them it gave me complete peace of mind and a few other friends will also be purchasing the wraps, one for her sister as a baby shower gift, and another is buying one instead of a travel cot as it is so adaptable (and FAR easier to transport). I will continue to spread the good word! Actually, I understand you just spoke to a friend of mine who was confused about the use of the safety pins when necessary (but obviously you cleared up the confusion).

It was lovely to meet you and have a good chat that day. Good luck with your other new project as I recall you are writing a book!

Kind regards

Andrea Unwin (and baby Ava)

Safe T Sleep

Advantages of Safe T Sleep

As we all know with the introduction of our new family members comes the influx of baby paraphernalia! For me I travel light at the best of times so you can imagine my horror when attempting to leave the house with baby and all the gear in tow. Yuk!

Safe T Sleep has been one of the most valuable and sensible purchases I made, it not only allows me to travel without a portable cot for weekend trips but provides flexibility when out just for the day.

The simplicity of the product allows the Safe T Sleep to be used either around a single bed mattress or on the cushion seat of a couch.

My child finds Safe T Sleep not at all restricting and due to her familiarity with the product will settle into her afternoon sleep without any problems no matter the environment she is in.

I wouldn't hesitate to recommend Safe T Sleep as one of the must have products due to the flexibility and peace of mind it offers parents.

Happy marketing such a wonderful product!

Brenda

London and the Safe T Sleep

Hi Michelle,

We are now back from our trip to London and the Safe T Sleep was a big success.

First thing was that it was so compact we are able to fit it in the suitcase (considering the fact that I'm not known for my ability to travel light, this was a good thing) without any problem.

We arrived at the flat quite late and it took only a minute to fit it to the mattress that our daughter was going to use.

She was going to be sleeping on my single bed back at my family home in London and without a Safe T Sleep we would have had to surround her with pillows to ensure she would not roll off the bed.

Once she was dressed for bed we put her back in her Safe T Sleep and she was fast asleep. The whole time we were there we used it both for her day time naps and at night when she went to bed.

On our departure date, it was one of the last things that was put in the suitcase (since we need it in the day time before we flew and we also knew it wouldn't take up much room) and it was time to return home.

So we have found the product quite satisfactory indeed, both from the point of view of using it at home and travelling.

Hope you find these comments useful.

Regards,

Ranti Hendricks

Cologne, Germany

P.S. I told a couple of friends with kids less than 3 years old about the product and was also able to show it to some of them. Even my cousin that doesn't have kids yet was quite impressed.

From: Terri Broom

The Safe T Sleep – what a wonderful invention.

We have been using a Safe T Sleep since my daughter was a few months old – she is now almost 2 and still in it.

Not only did it give me peace of mind when she was smaller but now I think it has become a form of a security blanket to her – when we wrap her in it – she immediately puts her hands behind her head and is happy to go to sleep.

I am sure it also has been one of the reasons that she sleeps SO well from 7.30 at night right through to 8.00 in the morning – rarely waking in between.

Needless to say our STS is THE most well travelled – it is the first thing that goes into our suitcase when we go away for a weekend and has even been to Africa twice!!!!

If we go to a friend's house for dinner – Jessica's whole cot mattress goes along with us with her STS attached ensuring she goes to sleep and we get to relax and enjoy our outing.

Thanks go to the inventor and manufacturers of the Safe T Sleep for an amazing product.

Hamilton

Hi Miriam,

As mention the form for the application of name. As per our phone conversation I confirm that I used your Safe T Sleep with my daughter for travelling and found it invaluable as it would adapt itself to both USA and Spanish cot sizes, and also single beds.

I used the Safe T Sleep instead of a portacot to visit friends and found that a plus, no need to carry extra weight.

The Safe T Sleep would be ideal for people with caravans, boats and baches, or anyone that travels regularly.

Yours sincerely

Teresa

LETTERS ____Sanity Saver

So simple yet effective, it should certainly be on the LIST of necessary equipment for babies. To those that don't know, the NZ made **Safe T Sleep** is not only economical, portable and compact, it is a sanity saver.

My son (at six months) was always getting "stuck", throwing off his blankets or playing when he was ment to be sleeping.

My first impression of the idea of the Safe T Sleep was that is was a "parents straight-jacket for babies" (realising of course that we strap our children into their carseats for safety)

For the first day or so my son didn't like it but he soon learnt that cot-time was now sleeptime.

The beauty of the Safe T Sleep is that baby sleeps on their back and is secure and safe. My son used it until he was eighteen months old and now my daughter uses it and has been in a single bed since she was nine months old – with the wrap part firm around her middle and safety pinned.

This is a fantastic product, you can fold it up and take it with you in your nappy bag and simply put it on a singlebed wherever you may be and know baby is safe. I have recommended it to many people and I am extremely grateful to my sister for recommending it to me
