New Zealand.
Tel (03) 477-0110.
Fax (03) 477-5164.

Considerable interest has been expressed by both Plunket nurses and Branches in a new product on the market called the **Safe T Sleep Bedwrap**.

This wrap has been designed to hold a baby or young child securely in bed with velcro fastenings.

The Managing Director of Safe T Sleep (N Z) Ltd has consulted widely and carried out extensive trials of the product and in instances where there have been sleep problems with a child, the use of Safe T Sleep has been an aid in treatment.

Both Ms Petersen and I have discussed the Safe T Sleep with Miriam Rutherford and while the Society will not "endorse" the product we feel that in appropriate situations, such as children with sleep problems, its use can be advantageous.

For further information about the Safe T Sleep please contact the manufacturer directly.
