COLORSHIFT® #4231  
SINGLE-COLOR #4230

FIBER OPTIC CABLE #4232

## LED FIBER OPTIC DASH KIT

ORACLE Lighting's new Fiber Optic Dash Kits are the perfect way to accent a vehicle's interior in a clean and seamless way. The special side-firing fiber optic cables have an integrated edge to make installation easy on any vehicle. This integrated edge is inserted between interior body panels in your vehicle including door panels, dashboard, headliner, console, and more. The fiber can even be stitched into fabric on custom upholstery. This is a universal product and is simple to install in most cases.

The fiber optic is end-lit by a LED light head. The light travels through the fiber and lights up smoothly along the way for a very clean and understated appearance. The integrated edge is designed to hold the fiber optic cable tightly without the use of any adhesive. We recommend end-light both ends of the cable for any length over 3' for the best and brightest look.

Choose ColorSHIFT® or single-color, then choose how many light heads you will need. Finally, measure out the length of cable you will need to fit your vehicle. Complete this install for an upgraded interior look!
