Product Overview

EPSON®

PrecisionCore®

Advanced Printhead Technology

PRECISIONCORE

PrecisionCore Print Head Technology

PRECISIONCORE
PRINTHEAD

Advanced High-Performance Printhead Technology

- Up to 20% faster printing on dark garments¹
- Purpose-built for Direct-to-Garment Textile Inks
- Nozzle Verification Technology (NVT) monitors nozzle health and automatically detects and adjusts printhead performance
- High Density Printhead with 3,200 nozzles
- Printhead height of 1.33 inches delivers high speed with extreme drop placement accuracy for outstanding print quality
- Variable-Sized Ink Droplet Technology with resolution up to 1,200 dpi

¹ Compared to previous-generation model when printing 13.6"x16.0" dark garment at default print quality. Computer processing, network transmission, loading and unloading of garments are not included in these times. Actual print times may vary. Testing conducted by Epson America, Inc. as of May 2023

EPSON®

UltraChrome Ink

Advanced Ink Chemistry

UltraChrome DG2 Ink Technology

High-Performance Ink Technology

- Next generation ink designed for greater color clarity
- CMYK + White Ink set offers bold range of color and bright whites
- 800 mL individual color capacity sealed ink packs
- Inks conforms to Oeko-Tex ECO PASSPORT standard and ECOCERT Global Organic Textile Standard - When applied to fabric and appropriately fixed, garments have been determined safe for use by adults, children, and babies.¹

¹ When applied to fabric and appropriately fixed Epson UltraChrome DG2 ink has passed the standards set by GOTS-ECOCERT and OEKO-TEX® ECO PASSPORT. For further details on these standards please visit www.ecocert.com and www.oeko-tex.com/ecopass.

EPSON®

Product Features

Enhanced Usability

Garment Thickness Optimization

Automatic Garment Thickness Optimization

- Garment thickness measured by multiple sensors during the loading process every 1/100th of a second to create a garment height profile
- Printer determines the garment minimum, average, and maximum heights
- Printhead carriage physically adjusts up/down to the optimal height as desired by the media settings (min, avg, or max thickness)
- The process is automatic and performed seamlessly in parallel with other pre-print tasks

Automated Maintenance System

Spend more time printing and less time maintaining

Head Cleaning Fabric Wiper Cassette

- Maintains printhead in pristine condition
- Enables dry capping of heads without risk of ink buildup or need for expensive head soaking liquid

Automated Cap Cleaning

- Inexpensive maintenance liquid is used to flush the cleaning caps and tubing to prevent ink build up and removal of dust and fibers.
- Minimal user maintenance time required – only a few minutes once a week

Intuitive Control Panel

Informative 4.3” Touch Screen Interface

- Easy to view printer status and supply levels
- Visual instruction built-in to assist new operators
- Alert Light and Buzzer to indicate when attention is needed
- Selectable display themes – Light, Neutral Gray or Dark mode
- Display environmental conditions with built-in temperature and humidity sensors

Garment and Transfer Film

Versatility to decorate virtually any garment type

Interchangeable Quick-Load Hanger Platen System

- Hanger platen helps operators quickly load garments with proper alignment
- 2nd Generation Grip Pad reduces loading and unloading time by adhering to the platen surface keeping platen sides smooth for garment to slide easily
- Platen Hoop can be used with the grip pad in place if desired
- Tool-free platen height adjustment to support materials up to 1" thick

Hybrid Print Capability

- DTG printing for premium soft hand feel, quality and breathability
- DTFilm for synthetic fabric and unusual shaped items

EPSON®

Performance

Efficiently Produce Sellable Quality Output

Productive Print Speeds

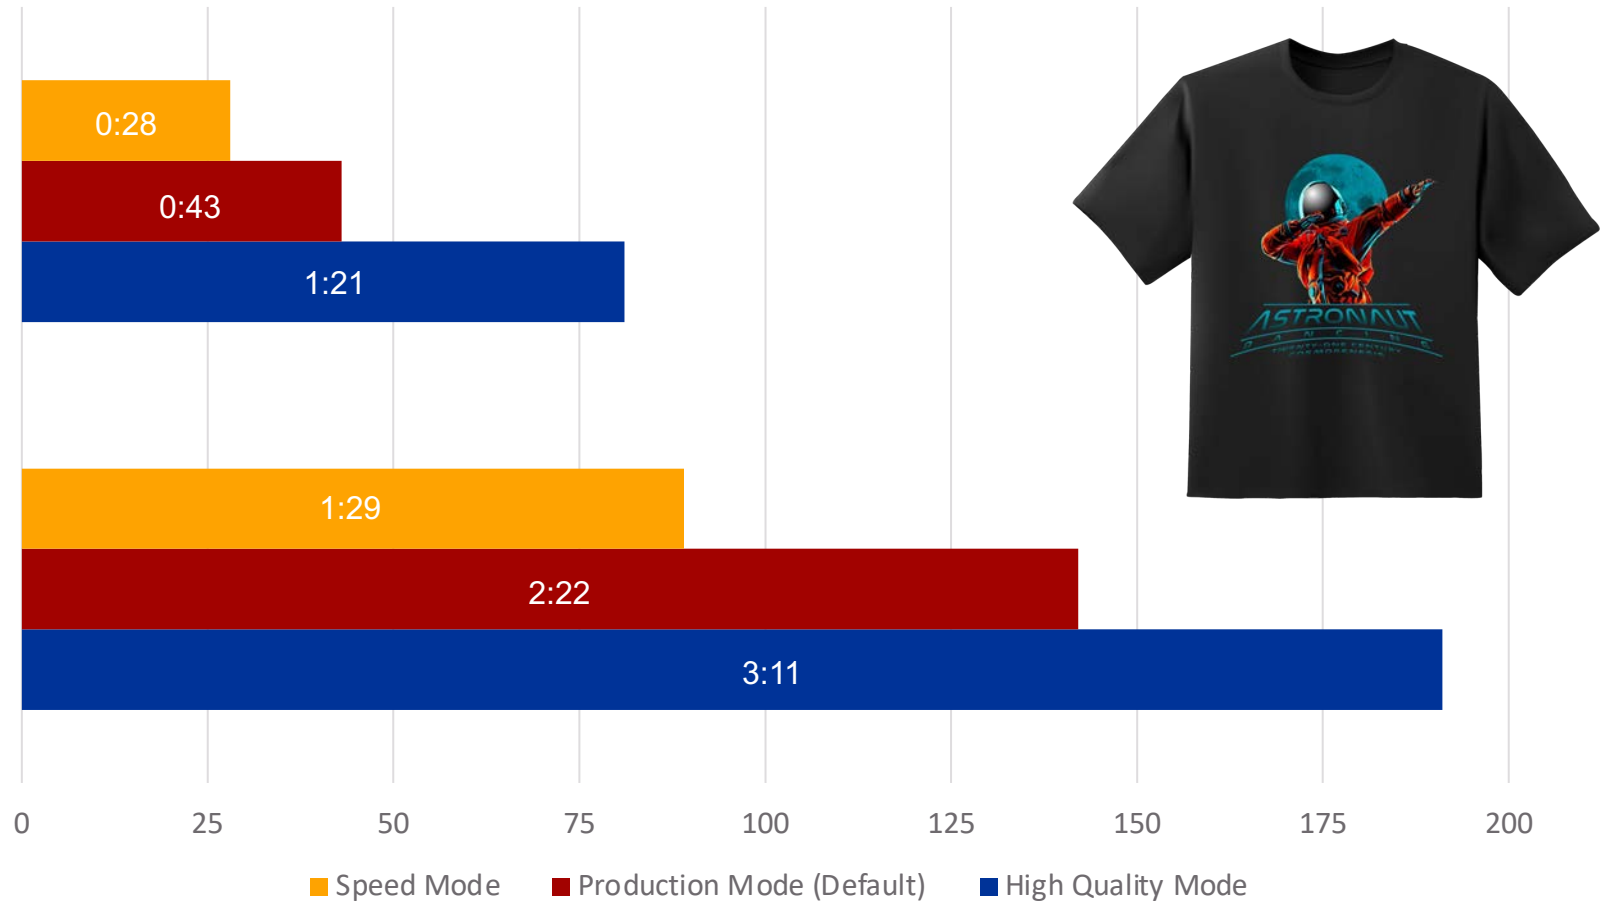

Total Print Time for full-size 14" x 16" print (Min:Sec)

Light Garments (CMYK)

Dark Garments (CMYKW)

Print time measured reflect the continuous period beginning when the printer start button is pressed, includes the garment entering the printer, ink applied to the garment, garment exiting the printer, and ends when the platen motion stops for garment removal. Computer processing, network transmission, loading and unloading of garments are not included in these times. Actual print times may vary. Testing conducted by Epson America, Inc. as of June 2023

Efficient Processing

Streamlined Processing for greater productivity

- Print preparation tasks run in background while loading a garment
- Printer is ready to print as data begins streaming to printer; no need to wait for the entire image to load
- Post-printing tasks are run quickly while user unloads the garment

The result: Less time spent waiting - More time printing

EPSON®

Workflow

Productive Workflow Solutions

Garment Creator 2 Software

Intuitive Print Software

Advanced DTG Imaging Software Developed by Epson

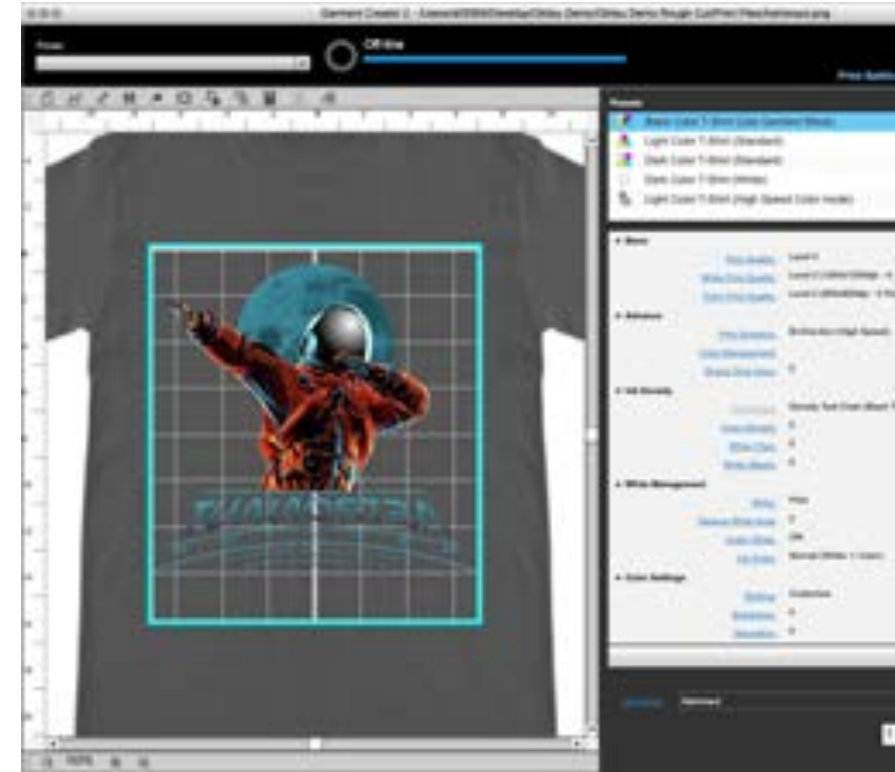

- Four times the processing resolution than previous generation software
- Raster-based software application supporting sRGB - PNG, TIFF, JPEG and BMP files
- Available for both Apple® macOS® and Microsoft® Windows® platforms

Easy-to-Use Garment Layout

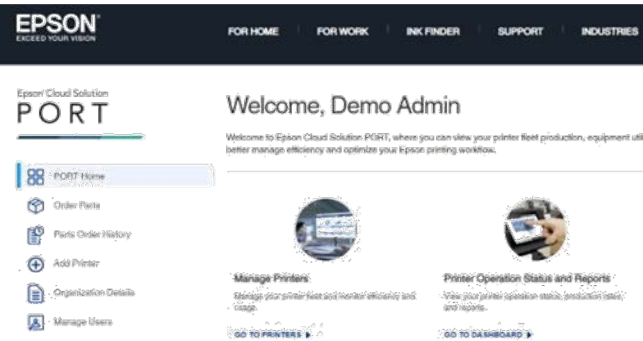

- Choose your platen size, place your image file(s), position, scale, rotate, etc. - then print
- Add multiple images and text for greater customization of the garment

Robust Print Controls

- Print control for directly to the garment (DTG) or Digital Transfer Film (DTFilm)
- Powerful “Use-Garment-Black” feature for reduced imaging costs on black garments
- Independent controls for color and white imaging

Epson Cloud Solution PORT

Operational dashboard view of your production line

- Cloud based print fleet activity reporting
- View production rates, printer utilization, up-time, and more from any connected device
- Live information to optimize your production efficiency
- Job Accounting to provide greater insight to manage your business
- Advanced service and support capability
- <https://www.epson.com/PORT>

Use of Epson Cloud Solution PORT requires an internet connection and supported web browser

Accurate Color Selection

Save Time with a Streamlined Color Workflow

- Eliminate guess work with the available Epson SD-10 Spectrophotometer
- Measure physical color samples with the push of a button
- Measured colors can be saved to Epson Cloud Solution PORT and imported into Adobe Illustrator with a plug-in
- Create Custom Color Palette libraries with ease
- Verify print accuracy for even the most demanding users

Epson SD-10 Spectrophotometer sold separately

EPSON®

Product Support

Warranty and Service Programs

Epson Preferred Plus™ Extended Service Plans

Epson Preferred Plus Service plans include:

- Technical phone support Monday thru Friday from 6:00am until 6:00pm PST
- Typically next-business day onsite service if necessary
- Covers the printer, genuine Epson optional accessories, and Epson software
- Preferred Plus Service plans are available for up to a total of 5 years of continuous coverage

Built by Epson, Supported by Epson

- You no longer need to worry about who to call if something goes wrong
- Epson handles the technical and break-fix support

Product comes with a 1-year limited warranty and on-site repair, usually next business day. Extended Service plans available for up to a total of 5 years of continuous coverage. For on-site service, geographic limitations may apply. Service request must be received by 1 p.m. Pacific Time, Monday through Friday, excluding holidays. See limited warranty or service plan for details.

Why Epson

Complete Epson Genuine Solution

SureColor F2270

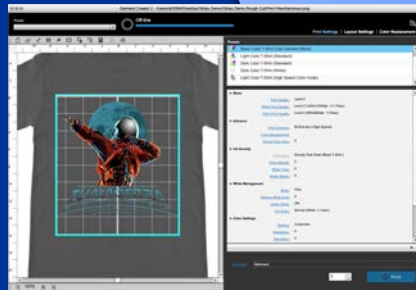

**PrecisionCore
Printhead**

**UltraChrome DG2
Ink Packs**

All key components have been developed by Epson to deliver the best performance.

“We focus on the printing details, so you can focus on growing your business”

**Garment Creator 2
Print Software**

Automated Maintenance System

Epson Service Plans

SureColor F2270 Series Summary

Versatility with Hybrid Print Capability

- Print directly to garment for soft hand feel and smooth gradations
- Print to digital transfer film to decorate unusual shaped items and synthetics fabrics

Designed for High Reliability

- Print head and ink technology developed to work together for improved reliability

High Image Quality

- Epson UltraChrome DG2 ink technology produces amazing color with opaque whites

Commercial-Level Production Speeds

- Outstanding everyday production speeds

Completely Supported by Epson

- World class service and support directly from one source

Specifications are subject to change without notice

Print speeds for the SureColor F2270 series printers are based on print engine speed only, in bi-directional mode.
Total throughput times depend upon front-end RIP, file size, printer resolution, ink coverage, networking, etc.

The SureColor F2270 series is designed to use only Epson ink cartridges and refill packs and no other brands of new or refilled cartridges, or other brands of ink or bulk ink systems. Using Epson ink is important for reliable performance and high image quality.
