

# Sublimation Systems for Makers, Creators and Entrepreneurs

**SAWGRASS**  
THE ART OF WHAT'S NEXT

# Welcome to Sawgrass

## Bring professional-quality product decoration to your desktop with a Sawgrass sublimation system

Sawgrass printers, ink and software let you permanently transfer full-color artwork into the surface of thousands of different items. Easily customize products for pleasure or profit, in the comfort of your own home or workshop.

Best of all, everything you need to be successful is included in the purchase of your Sawgrass system. Here are just a few of the resources we provide.

### Personal Service and Support

Every Sawgrass printer comes with lifetime technical support, starting with a personal orientation and training session. Within minutes, you'll have your new printer set up, and you'll be printing your first design.

### CreativeStudio Designer

An online graphics program that includes hundreds of product templates and thousands of customizable, royalty-free pieces of artwork.

### Print Manager

Color management software that ensures the optimal accuracy, clarity and vibrance for your finished product.

### Sawgrass Academy

On-demand, video-based lessons that accelerate your journey from beginner to expert, and even provide detailed instructions on starting or growing a sublimation business.

## The right printer

Whether you choose the high-value SG500, the business-powering SG1000, or the top-of-the-line, eight-color VJ628, every Sawgrass printer uses Sawgrass ink to deliver superb, consistent color.

The newest generation of Sawgrass printers has been redesigned from the inside out to perform more efficiently, connect more easily, and deliver better output than ever.

The SG500 and SG1000 offer WiFi connectivity, improved resolution, and an impressive array of mechanical improvements. The VJ628 accommodates eight separate ink cartridges, allowing it to print with an expanded color gamut that is impossible on other systems.

All Sawgrass printers perform an automatic maintenance cycle, keeping the print lines and print head free of dried ink. For even more peace of mind, the SG500 and SG1000 are backed by a 2-year warranty, as well as unlimited lifetime technical support.

## The right ink

We are proud to offer a variety of ink sets, all of which have been awarded certifications for safety, quality and environmental sustainability.

### SubliJet UHD

Our flagship sublimation ink is now better than ever. SubliJet UHD delivers rich, vibrant color on all sublimation substrates, including ceramic, glass, acrylic, metal, polyester fabric, and heat-transfer vinyl.

### Siser EasySubli Ink

Our newest sublimation ink delivers great results with conventional substrates, but is specifically formulated for use with Siser EasySubli vinyl.

### Chromablast

Chromablast ink and paper do not use sublimation, but work together with heat and pressure to chemically bond your design to 100% cotton, opening the door to long-lasting color on cotton apparel.

# The Sawgrass Difference

## Premium Ink

Sawgrass has been the global leader in sublimation ink development for over 30 years. Our dedicated scientists continually test and refine the formulas for our inks, which are manufactured 100% in the USA.

Sawgrass-approved inks deliver superior reliability and performance in Sawgrass printers, providing you with maximum value and the best possible image quality. Also, only Sawgrass inks work with Sawgrass Print Manager, providing seamless end-to-end color management.

## Intelligent Color Management

Because different substrate materials and transfer papers affect how colors appear on sublimated items, it's important to adjust the ink output to ensure optimal quality. Sawgrass Print Manager is a utility that automatically makes those adjustments for you.

Print Manager works in the background, managing the flow of color information to your Sawgrass printer. This reduces wasted ink (saving you money), and ensures the colors on your finished products are as accurate and vibrant as possible.

## Easy-To-Use Design Software

To create personalized designs that people love, you could spend a lot of money on third-party design software and royalty-free artwork. Or, you could use CreativeStudio, the only online design tool built specifically for sublimation.

With built-in product templates, thousands of ready-to-use designs, and seamless integration with your Sawgrass printer, CreativeStudio takes the frustration out of creation. An individual account is included with every Sawgrass printer purchase. For even more features and artwork, premium memberships are available.

# Sawgrass Partners

## Do More With Your Sawgrass Printer

If you use heat-transfer vinyl or a desktop cutting machine, our partnerships with Siser® and Silhouette® help you create without limits.

### Silhouette Cameo 4

Your Sawgrass system now has built-in integration for the Cameo 4 cutter. You can create a design in CreativeStudio, print it onto sublimatable HTV, and then cut it out on a Cameo 4, with only a few clicks in the Sawgrass Print Manager utility.

### Siser EasySubli Ink & EasySubli Vinyl

Printing onto Siser EasySubli vinyl lets you create multi-colored vinyl designs with no layering!

In close collaboration with Siser, we developed EasySubli ink to provide exceptional results on EasySubli vinyl, making them perfect for the dedicated vinyl crafter.

Our versatile SubliJet inks also work very well on EasySubli vinyl, so if you only use HTV occasionally, you can easily switch between transfer media.

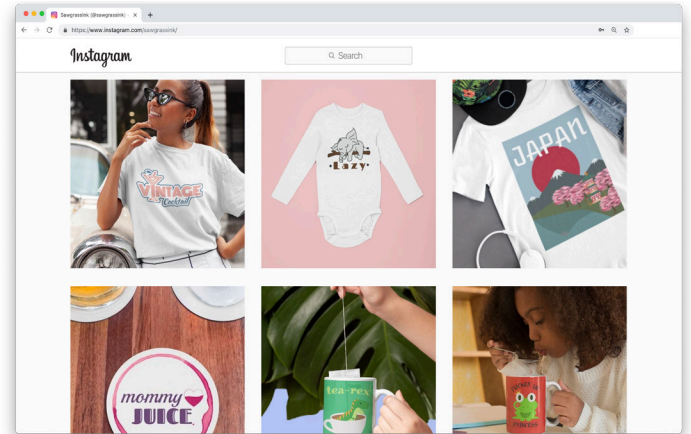

Using Silhouette and Siser products with your Sawgrass system, you can decorate virtually any product with any artwork. The opportunities for creativity and profit are virtually unlimited.

# Learn and Be Inspired

## Sawgrass Academy

With entertaining, easy-to-follow video lessons, Sawgrass Academy is the key to getting the most out of your sublimation system. 100% online and on-demand, it lets you work at your own pace, earn certifications, and learn how to build your business – all from the comfort of your own home.

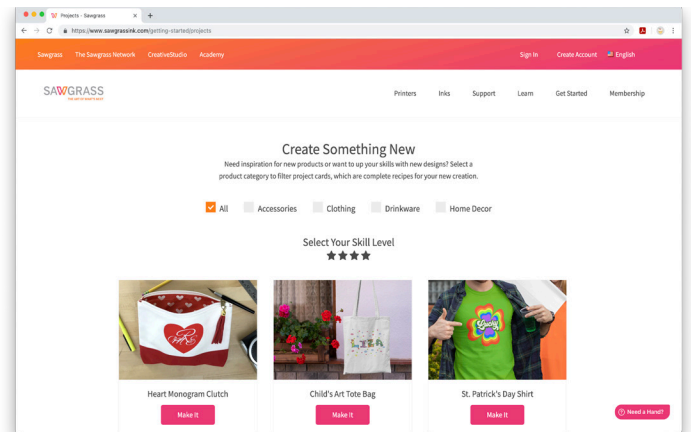

## Sawgrass Social Media

Join other Sawgrass users online for conversation and inspiration. Sawgrass is on Facebook, Instagram, Pinterest and LinkedIn. Tune in for weekly Facebook Live videos, subscribe to be notified about contests and giveaways, and visit often to see the latest and greatest from Sawgrass.

## Ink Differently Podcast

Get real-life information on sublimation success! On the Ink Differently podcast, our host Meghan interviews business owners who are making money and having fun with Sawgrass systems. Ink Differently is available on all major podcast platforms, including Spotify, Apple Podcasts, Stitcher, and SoundCloud.

## Project Cards

Not sure what to make? Browse the Project Cards on SawgrassInk.com to find step-by-step instructions for a wide variety of great gift and business product ideas. New projects are added weekly. You can sort the library by difficulty level or project type, so you'll be sure to find something that catches your eye.

# Sawgrass SG500

## Perfect for drinkware, coasters, and small items

### 2 Year Warranty

- No limit on prints
- Free lifetime tech support

### Includes Access to Sawgrass Software

- CreativeStudio design app, with product templates and royalty-free images
- Sawgrass Academy online training
- Print Manager color management

### Professional Speed & Ultra-High Resolution

- Prints at up to 4800 x 1200 dpi
- Can print full sheet in 29 seconds

### Automatic Maintenance Cycle

- Preserves print quality
- Protects print head and lines from dry ink damage

### Optimized Ink Sets

- SubliJet for general sublimation
- EasySubli for Heat Transfer Vinyl
- Chromablast for cotton transfer

### Highest Quality Ink

- Manufactured in the USA
- Two-year shelf-life
- OEKO-TEX-certified safety
- RoHS, ASTM, CPSIA, Prop 65 and REACH compliant

### Versatile Media Handling

- Accommodates wide variety of sublimation transfer media
- Internal tray holds up to 200 sheets
- Adjustable up to 8.5" x 14" / 216 x 356 mm
- Available bypass tray accommodates paper up to 51" long (1295 mm)

### Intelligent Color Processing

- Works with Sawgrass Print Manager
- Delivers optimal color accuracy for 124 different combinations of papers, inks and substrates
- G7-certified color accuracy
- Optimal ink output enhances clarity of fine details and reduces waste

### Robust Engineering

- All components built to withstand years of heavy use
- Designed specifically to work with Sawgrass inks and software

# Sawgrass SG1000

## Perfect for apparel, photo panels, and larger items

### • 2 Year Warranty

- No limit on prints
- Free lifetime tech support

### • Includes Access to Sawgrass Software

- CreativeStudio design app, with product templates and royalty-free images
- Sawgrass Academy online training
- Print Manager color management

### • Professional Speed & Ultra-High Resolution

- Prints at up to 4800 x 1200 dpi
- Can print full sheet in 29 seconds

### • Automatic Maintenance Cycle

- Preserves print quality
- Protects print head and lines from dry ink damage

### • Optimized Ink Sets

- SubliJet for general sublimation
- EasySubli for Heat Transfer Vinyl
- Chromablast for cotton transfer

### • Highest Quality Ink

- Manufactured in the USA
- Two-year shelf-life
- OEKO-TEX-certified safety
- RoHS, ASTM, CPSIA, Prop 65 and REACH compliant

### • Versatile Media Handling

- Accommodates wide variety of sublimation transfer media
- Internal tray holds up to 200 sheets
- Adjustable up to 11" x 17" / A3 size
- Available bypass tray holds paper up to 13" x 19" (3300 x 4825 mm)

### • Intelligent Color Processing

- Works with Sawgrass Print Manager
- Delivers optimal color accuracy for 124 different combinations of papers, inks and substrates
- G7-certified color accuracy
- Optimal ink output enhances clarity of fine details and reduces waste

### • Robust Engineering

- All components built to withstand years of heavy use
- Designed specifically to work with Sawgrass inks and software

# Sawgrass SG500 and SG1000

## Seamless. Dependable. Rewarding

### Sawgrass Hardware

- The SG500 **warranty is a full two years, and does not have a print count restriction.**
- Sawgrass **ink stays viable for two years from the manufacture date.** Using expired ink leads to color shift and ruined product, as well as potentially damaging the print heads.
- The SG500 is capable of printing at **4800 x 1200 dpi**, allowing for extremely fine detail in photos and text.
- The SG500 print speed is **over twice as fast as competitive printers**, letting users spend more time making products and less time waiting for output.
- The SG500 runs an **automatic maintenance cycle** as long as it is powered on. This means that users who leave it on do not have to worry about dried ink in the lines or print heads.

### Sawgrass Software

- Sawgrass software works with the SG500 for **superior ease of use**, providing a **seamless, integrated system** suitable for both professionals and hobbyists.
- Sawgrass Print Manager, **software for color management**, provided at no additional cost, **supports hot folders, gang printing, output to multiple printers**, and processes **both CMYK and RGB** files.
- SPM calculates optimal output for **13 specific substrate materials, 10 different papers, and three ink sets.** This provides **124 “color recipes”** for combinations of product materials, inks and papers.
- CreativeStudio **online design software**, which is provided at no additional cost, gives users access to **thousands of royalty-free images, hundreds of fonts, and over a thousand product templates.**
- Sawgrass **continually updates CreativeStudio** with customizable artwork and product templates, so that SG500 owners are able to **adapt quickly and easily to changing trends and upcoming events.**

# Sawgrass VJ628

## Industrial-quality sublimation printing for the most demanding applications

### Professional Color and Print Quality

- Eight-color capability allows printing with an expanded gamut
- Fluorescent colors, spot colors and museum-quality greyscale available
- Patented Intelligent Interweave technology eliminates banding and dithering
- Industrial-quality print head

### Automatic Maintenance Cycle

- Preserves print quality
- Protects print head and lines from dry ink damage

### Highest Quality Ink

- Manufactured in the USA
- Two-year shelf-life
- OEKO-TEX-certified safety
- RoHS, ASTM, CPSIA, Prop 65 and REACH compliant

### 1 Year Warranty

- No limit on prints
- Free lifetime tech support

### Intelligent Color Processing

- Works with Sawgrass Print Manager or WASATCH RIP
- Delivers optimal color accuracy for 124 different combinations of papers, inks and substrates
- G7-certified color accuracy
- Optimal ink output enhances clarity of fine details and reduces waste

### Large Media Capacity

- Accommodates 24" (63 cm) roll media

### Robust Engineering

- All components built to withstand years of heavy use
- Designed specifically to work with Sawgrass inks and software
