

NEW universal bump bar mount

How to install the new universal bump bar mount SKU: 820205

Use ZOOM for better picture quality

1

Step 1. After inserting the screws provided into each of the mounting brackets, at the location indicated by the red arrow, position the mounting brackets into the channel on the bottom of the bump bar at a slight angle.

2

Step 2. Then, pivot the mounting bracket into place so that the bracket locks into the channel and slide it up against the two screws on either end of the bump bar. Tighten the screws installed in step one so that the bracket locks into place.
