KDNY Pro is an advanced Micro Blend of nutrients designed to support the body through arrhythmia, edema due to a weak heart, endocarditis, IgA immune issues, weak kidneys, urinary track inflammation, palpitations, heart and circulation problems.

The heart and the kidneys are interlocked, with each dependent on the other. As the heart becomes weak, the kidneys are less able to do their job filtering the blood. If the kidneys are impaired, they cannot clear out the wastes and fluid from the blood, making the heart work harder.

It's long been known that a problem with the kidneys dramatically increases the chance of cardiovascular disease. They both share many of the same risk factors for development, such as diabetes and high cholesterol. But, it seems to be high blood pressure that is the critical factor. Between the excess salts and wastes the kidneys cannot filter out, renal vein pressure increases, causing a continuous loop of damage to the kidneys and increased pressure on the heart.

Each of the ingredients in KNDY Pro have a long history of helping soothe the heart and kidneys from a variety of life's woes. They have a long history of use in Traditional Chinese Medicine, and many are used extensively in Europe as primary treatments.

Angelica, sometimes known as dong quai or wild celery. The volatile oils act on the smooth muscle of visceral organs, and stimulate circulatory and respiratory smooth muscle relaxation. Ferulic acid depresses stimulation of α -2-adrenergic receptors, reducing pulmonary hypertension, correct atrial fibrillation and is a negative inotropic in the heart. Coumarins (dihydroxyranocoumarins & dihydrofruanocoumarins) show coronary vasodilatory, spasmolytic and c-AMP phosphodiesterase inhibiting activity.

The herb astragalus is a historical herbal medicine used for it's adaptogenic and blood balancing abilities. The polysaccharides (astragalins, etc) significantly reduce blood sugar, serum triglycerides and LDL cholesterol, while increasing serum HDL. They help regulate amino acid metabolism. The astragalosides have a positively inotropic action on the heart, stimulate NK cells, and are hepatoprotective. The flavonoids antioxidant activities may inhibit peroxidation and increase the activity of antioxidant enzymes, reducing the risk of coronary heart disease associated with hyperlipidemia and oxidative stress. They may moderate the synthesis of eicosanoids (inhibit phospholipase A2, increase PGF1 and cAMP), and prevent platelet aggregation.

Curcumin has anti-inflammatory and antioxidant effects greater than hydrocortisone. It can inhibit neutrophil function, platelet aggregation, lymphocyte activity, and promotes fibrinolysis. It inhibits the formation of thromboxanes (promotes platelet aggregation) & increasing prostacylin (inhibits platelet aggregation).

Nigella contains thymoquinone, carvacrol, t-anethole and 4-terpineol, which are responsible for potent antioxidant properties. The compounds lower cholesterol and reduce inflammation (primary thymoquinone derivative).

Salvia (Sage) is one of the most potent and well known herbs, containing caffeic acid, chlorogenic acid, rosmarinic acid, ellagic acid and rutin. It does numerous beneficial things in the body, including lowering cholesterol. Serum creatinine, angiotensin II (Ang II), transforming growth factor β 1 (TGF β 1) and collagen IV levels were significantly reduced under the use of Salvia, protecting the kidneys.

Active Ingredients

- Angelica [1](#), [2](#), [3](#)
- Astragalus [4](#), [5](#), [6](#)
- Curcumin [7](#), [8](#), [9](#), [10](#)
- Lespedeza rheun [11](#), [12](#)
- Nigella [13](#), [14](#), [15](#), [16](#)
- Salvia met [17](#), [18](#), [19](#), [20](#)
- Red Suma [21](#), [22](#), [23](#)

Dosage & How To Take

Take one to five sprays one to three times daily or as directed by a health care professional.

Safety and side effects

KNDY Pro has an excellent safety rating, with no reported interactions from the supplement. It has a similar safety profile to soy protein drinks.

KNDY Pro is not intended to replace any medication or procedures used to treat or manage illnesses. Do not discontinue treatment or medications without a doctor's permission.

Women who are pregnant, nursing, or any person who is immune compromised should consult their physician before using this product. Certain medications may interact with individual ingredients – talk to your doctor if you take any medications.
