The proprietary blend of CT Defense provides a fantastic combination of concentrated green tea containing the catechins epigallocatechin gallate (EGCG) and other agents from chili peppers, like capsaicin, helps [block the tNOX protein](#) that is associated with tumor and cancer growth.

Green tea catechins are studied to help [prevent cancer](#) and reduce the side effects of chemotherapy. It has the potential for cancer chemoprevention, hypercholesterolemia, atherosclerosis, Parkinson's disease, Alzheimer's disease, and other aging-related disorders. Unfortunately, drinking green tea does not provide the quantity of EGCG to be effective. The problem is the low oral [bioavailability of EGCG](#) when consumed in tea form, as most people are used to.

CT Defense provides the EGCG for superior absorption and bioavailability, with the equivalent to drinking 16 cups of green tea. In studies, it has been shown to be a [potential therapeutic dose](#). The unique professional-grade [antioxidant support](#) helps your immune system and may reduce inflammation. It's also studied intensely for cancer prevention and treatment.

As part of an [early prevention trial](#), CT Defense had an incredible 94% negative rate for the early cancer markers. Both green tea and green chili pepper extracts are known [quinone site inhibitors](#), which block the tNOX protein that can only be found on tumor and cancer growth. Because this protein is blocked, the cells are unable to reach a size necessary to undergo division, therefore they undergo apoptosis or program cell death.

Asian countries consume large amounts of green tea and have low cancer rates. And countries that consume high amounts of chili peppers, especially Mexico and Thailand, are known to have [lower rates of cancer](#). Capsaicin, one of the cancer-fighting vanilloids found within the chili pepper, has been in the media over the past few years for its incredible cancer-fighting potential. CT defense helps provide all of the benefits of capsaicin and helps you avoid the discomfort of the pungent taste without losing any of the cancer-fighting benefits.

Active Ingredients

Both ingredients are standardized to provide a consistent and reliable concentration of the ingredients, as recommended on the label.

- Green Tea Extract (*Camellia sinensis* O. Kize) (leaf) - provides concentrated ECGC
- Guajillo Chilies (*Capsaicin annuum*) (whole dried chilies) – provide capsaicin

Dosage & How To Take

As a dietary supplement, adults should take one quick dissolve tablet every four hours or as directed by the health care provider.

Safety and side effects

CT Defense has an excellent safety rating, with no reported interactions from the supplement. It has a similar safety profile to green tea.

CT defense is not intended to replace any medication used to treat cancer. Do not discontinue treatment or cancer medications without a doctor's permission.

Women who are pregnant, nursing, or any person who is immune compromise should consult their physician before using this product. Certain medications may interact with individual ingredients – talk to your doctor if you take any medications.
