Carctol bases on an ancient Ayurveda herbal compound used for hundreds of years for people looking to restore normal body health and regain a healthy immune system. Many physicians use it to support the mental and physical well-being of their patients across Europe and Asia. The Carctol proprietary system is an advanced herbal blend that aids the Natural Killer Cells (NKC) and macrophage activity of the immune system.

The Advanced Cancer Research Center of TATA, Mumbai looked at 14 types of human cancer cells and found that Carctol worked against pancreatic and lung cancer cells*. Several ingredients help neutralize carcinogens and remove toxins (see below).

Hundreds of practitioners around the world use Carctol to help support the body during illness. Several of the ingredients have research and historical use in supporting the immune system, clearing out toxins, increasing mental clarity.

Active Ingredients

Blepharis Edulis
Piper Cubeba Linn
Smilax China Linn
Hemidesmus Indicus
Tribulus Terrestris
Ammannia Baccifera Linn
Lepidium Sativum Linn
Rheum Emodi wall

How It Works?

Ayurvedic Doctor Tiwari, listed as the author of the base formula, claims one of the methods the herbs work synergistically with the immune system by supporting the elimination of excess acids in the body. Many of the ingredients are used to support the body when facing immune issues. Ongoing research is being performed to review the protein binding ability of this unique formulation and its impact on free radicals.

An in-house case study of the Carctol formulation showed in the 25 cases that used, all the patients showed increased quality of life and health and most showed a reduction or reversal of tumor/cancer growth. A review of this case study is available upon request.

Other studies show multiple factors of healing for the various ingredients.

Tribulus Terrestris

The Tribulus terrestris, or goats head, is proven to help reduce cholesterol and inflammation. It has mild immune-stimulating properties, and healthy heart protecting activity. It contains one steroidal saponin, protodioscin. This promotes the release of nitric oxide in the body, increasing the flow of blood to the muscles, helping to utilize oxygen and nutrients more efficiently.

It also helps stimulate the pituitary gland to produce luteinizing hormone, thus promoting higher testosterone levels. According to other research, "Saponins isolated from the fruits of TT demonstrated a dose-dependent increase in phagocytosis, indicating stimulation of nonspecific immune response."

Smilax China Linn

Smilax helps prevent liver damage. It helps the body as a tonic, reducing anemia. This was suggested in a study that showed that smilax helps increase leucocytes, lymphocyte, and other immune activities.

Blepharis Edulis

Blepharis edulis helps to reduce bleeding and bronchial congestion issues and traditionally used to treat infections, such as tuberculosis and hepatitis. The total antioxidant capacity was examined and shown that traditional preparations had unusually high antioxidant potential.

Piper cubeba Linn

The cubeb or tailed pepper, Piper cubeba Linn, helps reduce inflammation and is proven to aid in reducing bacterial and fungal infections. Historical uses include relieving the body of water retention. The Piper cubeba has been proven nearly as powerful as prescription medications for ulcers, without the side effects. Also, 105 phytochemicals within the herb were linked with immunomodulatory potency by pathway level mapping in the human metabolic network, although how they function is still not understood.

Hemidesmus indicus

Hemidesmus indicus is a primary detoxification herb in Ayurvedic medicine and show in studies to be a powerful anti-oxidant, especially against the peroxide molecule. It's anti-inflammatory and antipyretic. One set of research shows that Hemidesmus both directly and indirectly causes cellular death in cancer cells. It promoted the release of ICD-inducer factors. At lower concentrations, both monocytes and dendritic cells were activated, indicating that it also stimulates the immune system.

Ammannia baccifera

The Ammannia baccifera Linn herb is often used tribally as an effective remedy for all blood diseases. It's proven to be a powerful anti-oxidant and anti-inflammatory. It helps open the blood vessels to allow blood to flow and clear out stagnant toxins and water build-up. One study compared an extract to standard healing creams and found it worked as well, if not better in some cases, than the medicinal cream at promoting healing, reducing infection, and providing high tensile strength of the wound.

Lepidium sativum Linn

Garden cress, Lepidium sativum Linn, is known for strengthening the immune system and improving vitamin C levels in the blood. Highly nutritive, cress contains exceptionally high amounts of vitamins A, C, and K along with appropriate levels of fats and minerals to provide high bioavailability.

Rheum emodi

Rhubarb, Rheum emodi wall, stimulates the liver, clears the blood of toxins, contains powerful antioxidants, and is used throughout the world as a restorative herb. The primary function of rhubarb in herbal medicine is to support other herbs and help the body cope with the healing process, although scientists have identified several components that are known for their anti-cancer properties or have the potential of being anti-cancer. Studies by Rajkumar et al shows an aqueous extract of Rheum is kills cancer cells, but preserves healthy cell DNA, as well as causes direct cellular death in breast cancer cells.

All of the ingredients have been proven to work in some capacity that helps the body restore health and vitality. The formula bases itself on the principles of Ayurveda, bring the doshas of an individual back into balance. The strong science behind each ingredient shows Carctol's effectiveness, and the users of this supplement can feel the synergistic effects of the herbs.

Safety and side effects

Carctol is one of the safest supplements on the market. Only a few people experience mild constipation when they start taking it, but it soon clears with a proper diet. Do not take Carctol if you already experience constipation. The Rheum emodi, rhubarb, ingredient may interact with some heart medications, although no interaction has been reported – check with your physician before use.

No toxic levels of Carctol have been reported in laboratory tests; however, if you are allergic to any of the ingredients, you should not take this supplement.

Dosage & How to Take

One capsule – every four hours or as recommended by your physician.

You should take up 96oz of distilled, alkaline water every day.

You should take digestive enzymes along with Carctol capsule if recommended by your physician.

If you have constipation, take laxative only on the advice of your physician.

Recommended Diet:

Avoid high acid fruits (lemon, grapes, mango, orange, pineapple, strawberry), sour vegetables, and fermented dairy.

Avoid processed foods.

Limit meat and meat products.

Limit sugar and foods containing added sugars or sugar alcohols/substitutes.

Your diet should contain abundant grains to avoid constipation side effects.
