INF B DX

Bacteria and viruses have become the ultimate threat to human health. Unfortunately, today's fast-paced modern world constantly exposes us to immune challenges. Much of what we eat, drink, breathe, and absorb may contain a variety of toxins and pathogens. Over time, these harmful contaminants have a serious impact on the body's natural functions. Oxidative stress and poor lifestyle habits further compromise our overall health.

INF B DX is designed to support and enhance the body's immune system response under challenging conditions. Nanotechnology offers several advantages for nutrient delivery, which is why INF B DX provides minerals in colloidal form.

What is INF B DX?

INF B DX is a potent blend of nature's most effective nutrients for supporting optimal immune system function. It contains a variety of plant extracts, homeopathics, and minerals that have been clinically identified as immunomodulators.

This proprietary formula has harnessed the benefits of Echinacea, Golden Seal, and Thymus alongside colloidal zinc and phosphorus to create a unique daily support. It is provided in a convenient spray form for maximum bioavailability.

Immu Pro contains

Adrenal (sus scrofa and/or Bovine)
Arnica (whole plant)
Echinacea (whole plant)
Golden Seal (whole plant)
Horseradish (root)
Iridium Colloidal
Iron Colloidal
Lomatium Dissectum (whole plant)
Lymph Node (sus scrofa and/or bovine)
Phosphorus Colloidal
Spleen (sus scrofa and/or bovine)
St. John's Wort (whole plant)
Tecoma (whole plant)
Thymus (sus scrofa and/or bovine)
Zinc Colloidal.

MOXIE: Belladonna, Colloidal Iridium.

Benefits

Helps protect against bacteria and viruses

Echinacea purpurea has been widely used to prevent and treat viral respiratory infections, and recent clinical data suggest that it may prevent secondary infection complications as well. It may help reduce the risk of respiratory complications by preventing virus-induced bacterial adhesion and [inhibiting inflammation](#).

Goldenseal enhances immune response by increasing [immunoglobulin production specific against harmful invaders](#).

Horseradish root has been traditionally used to treat bacterial infections of the respiratory tract and urinary bladder. Clinical studies show that horseradish can also help reduce [inflammation](#) or fever.

Enhances immune defences

Zinc is an essential mineral that can influence antiviral immunity. Numerous studies suggest that supplementary zinc can improve the antiviral response and systemic immunity in those with zinc deficiency, and may also specifically inhibit viral replication or [infection-related symptoms](#).

Sus scrofa is an organotherapy remedy that supports the thymus gland. The thymus plays an important role in supporting immune system function by fighting against viral and bacterial infections, including general immune deficiencies.

Speeds healing

Arnica is used to treat inflammation and to stimulate the immune system, which can help decrease [healing time in soft tissue injuries](#). These anti-inflammatory and immune-regulatory mechanisms have been shown to prevent contact [hypersensitivity](#).

Zinc and iron also contribute to healing, cell membrane repair, cell proliferation, growth and [immune system function](#).

Supports detoxification pathways

Spleen is a unique organotherapy remedy that supports the health and function of the human spleen. The spleen is the second-largest secondary immune organ in the body and is responsible for initiating immune reactions to blood-borne antigens and for filtering the blood of foreign material and old or [damaged red blood cells](#).

Supports overall nutrient status

Colloidal minerals are a microscopic form of fossilized minerals, which makes them highly bioavailable to the human body. Colloidal iron, iridium, phosphorus, and zinc are delivered in a way that allows for maximum bioavailability and can help to replenish minerals that play a major role in immune system function.

Dosage & How To Take

Adults: Administer 1-5 sprays into the mouth one to three times daily.

Safety & Side Effects

INF B DX has an excellent safety rating, with no reported interactions from the supplement.

INF B DX is not intended to replace any medication or procedures used to treat cancer, viral infections, or illnesses. Do not discontinue treatment or cancer medications without a doctor's permission. Do not exceed the recommended dose unless otherwise instructed by a healthcare provider.

Women who are pregnant, nursing, or any person who is immune-compromised should consult their physician before using this product. Certain medications may interact with individual ingredients. Consult your medical professional if you are already taking medications.
