SB PRO

ULTIMATE BLOOD SUGAR BALANCE

PROFESSIONAL STRENGTH

Dietary Supplement
90 Capsules

DIRECTIONS: Take 2 capsules daily or as recommend by healthcare professional.

SUPPLEMENT FACTS		
Serving Size: 2 CAPSULES	Servings Per Container: 45	
	Amount Per Serving	%DV
Vitamin C (ascorbic acid)	150 mg	162%
Vitamin E (alpha tocopheryl succinate)	15 IU	67%
Biotin	300 mcg	3000%
Magnesium (as magnesium oxide)	129 mg	31%
Zinc (as zinc oxide)	7.5 mg	50%
Manganese (as manganese amino acid chelate)	1.5 mg	66%
Chromium (as chromium amino acid chelate)	120 mcg	303%
Vanadium (as vanadyl sulfate)	18 mg	-
Alpha Lipoic Acid	120 mg	-
InnoSlim™ (ginseng root extract & astragalus membranaceus extract)	35 mg	-
RosaEx™ (rosehip) fruit extract	35 mg	-
Verbasno™ (vitaminis gubosus extract)	5 mg	-
Proprietary Blend	385 mg	-
<small>Cinnamon Leaf Extract, Guggul Extract, Bitter Melon Extract, Cassia Bark Extract, Banaba Leaf Extract, Juniper Berry Extract, Wildberry Fruit Extract, Taurine, Cayenne Extract, Licorice Root Extract, Yarrow Herb (aerial parts), Choline Bitartrate, Agnoscum (aerial parts), Turmeric Root Extract</small>		

* DAILY VALUES (DV) NOT ESTABLISHED

Other Ingredients: Vegetable Cellulose Capsule

SB-PRO™ is a unique formulation designed to stimulate metabolism, aid in weight loss, improved immunity, and lower blood sugar using a proprietary blend of antioxidants (ALA) and amino acids, herbs, vitamins, and minerals. SB-Pro uniquely provides support for proper cell function and optimal health.

The unique combination of over 20 different ingredients assists your liver and pancreas to stabilize blood sugar, help you lose weight, and boost your overall health and immunity.

SB-Pro combines unique micro and macronutrients proven to help maintain sugar balance. One of those is chromium. As an essential nutrient to the human body, it helps process carbohydrates, proteins, fats, and most importantly, it helps to facilitate insulin action. In particular, it helps with glucose tolerance factor. Some of the research linked below shows chromium significantly improves glucose uptake into cells, particularly in people who have diagnosed insulin resistance.

Many of the primary nutrients in SB-Pro have strong antioxidant abilities. Particularly our vitamin C and vitamin E, nutrients many people do not get enough. During illnesses, increased blood sugar, and weight loss, the oxidative effects on the body are significantly increased. The body stores of vitamin C, vitamin E, and many other antioxidants are severely strained, even depleted. Increasing your intake of antioxidants can help your cells function properly, improve your immune response, and protect your heart.

The proprietary mix of herbs and supplements contains many proven active substances that target different body functions. Bitter Melon is a fruit that contains at least three active substances with sugar balancing properties, including charantin, which has been confirmed to have a blood glucose-lowering effect, vicine, and an insulin-like compound known as polypeptide-p.

Cinnamon Powder helps prevent and alleviate glucose intolerance. Three water-soluble polyphenol polymers were found to have beneficial biological activity, increasing insulin-dependent glucose metabolism by roughly 20-fold.

Cayenne and turmeric are powerful anti-inflammatory agents that help with both antioxidant potential and issues that may arise during weight loss. Additionally, some research shows that these nutrients can help reduce the inflammation in the airways, particularly when associated with different bacterial and viral infections.

Three unique proprietary additives go in SB-Pro. InnoSlim™ uses ginseng and astragalus to help people safely and effectively lose weight. InnoSlim™ has a proven record of being safe. RosaEx™ helps protect the heart by lowering lipid levels in the blood and helping to improve liver function by reducing fatty liver. Verbasno™ helps protect the liver and increases immunity.

SB-Pro unique botanical blend supports healthy balance and supporting healthy:

Blood sugar, Weight control, Sugar and carb cravings, Pancreas and liver function, Insulin production and sensitivity, Afternoon energy, Improved immune function
