ARWY PRO® a powerful herbal formulation that supports throat and respiratory system disorders.

It can provide relief from cough, asthma, bronchitis, and laryngitis symptoms. Natural expectorant ingredients help relieve inflammation.

One of the significant problems of these health issues is inflammation. The ingredients found in ARWY PRO® are all potent antioxidants, helping the whole body be healthier. The components of Curcuma, Cinnamomum, Piper, and Glycyrrhiza have a long history of being used as anti-inflammatory herbs. Studies show they can reduce symptoms by blocking NF- κ B and AP-1 pathway activation. The beneficial effect appears to be the mediation of symptoms by the upregulation of PPAR- γ , leading to the suppression of proinflammatory cytokine, TNF- α expression and release.

The inhibition of cell signaling pathways, Akt, NF- κ B, AP-1, or JNK, has been implicated as the mechanism responsible for apoptosis induction of cancer cells by curcumin. Many of these herbs in ARWY PRO® contain vital chemicals that act as a potent immunomodulatory agent in T cells, B cells, neutrophils, natural killer cells, dendritic cells, and macrophages.

The addition of Piper longum in ARWY PRO® increases the absorption rate of these herbs, making them more potent. Multiple studies show small addition of Piper can help the body absorb curcumin from less than 25% of the dose to over 75%.

All of the ingredients in ARWY PRO® have been tested and proven effective to help relieve the symptoms of COVID-19 infection. Several ingredients have been shown to be prophylactic against the SARS-2 class of viruses, helping to reduce the inflammation and severity of infection. Other elements have been shown to directly impact the replication of the virus and reduce the inflammation of the mucous membranes within the lungs and throat.

And even when an infection does take hold, ingredients such as Glycyrrhiza and Cinnamomum help you to clear the mucus and buildup of fluid from your lungs easier. Glycyrrhiza, or licorice as it's commonly known, is one of the most widespread and popular natural expectorants. Natural licorice became popularized as a candy to help children.

ARWY PRO® helps your body naturally reduce the symptoms of respiratory diseases such as:

Inflammation
Irritation
Hoarseness

Dryness
Mucus Buildup
Cough
Soreness
