**myCharge Debuts Heavy-Duty Off-Grid Power in Tiny Packages at ORSM***Adventure Series runs all the comforts of a high-tech home in the middle of nowhere*

myCharge is electrifying the outdoors with the introduction of its new Adventure series chargers. The Adventure series ranges from chargers that can easily be carried in a pocket or attached to a backpack with the built-in carabineer to a heavy-hitter that can run televisions and charge laptops and drones. This new series of portable battery chargers designed for use in the outdoors is debuting at Outdoor Retailer Summer Market 2017 at **booth PV2019**.

The AdventureUltra is myCharge's largest battery bank with the highest power output. Designed to replace the heavy and bulky generators used when tailgating or camping, the AdventureUltra is a more streamlined power source option that can run a 42-inch television for up to three hours. The compact device weighs 1.05 pounds and measures just 1.2 X 5.8 X 4.1 inches. The AdventureUltra has a maximum power output of 45 watts, enough to run a fan or recharge a drone battery. It can also be used with 2 in 1 laptops and new laptops, such as the 12-inch Macbook, that require less than 45 watts either when powered off and solely charging or when powered on and charging simultaneously.

Pack-sized chargers for smartphones, tablets and other small gadgets are also available in the new Adventure series. Capable of storing between 3350 and 10,050 mAh of power, these chargers feature a built-in carabineer and can be connected to devices using any smart watch, digital camera, phone, or tablet cable. Tough yet easily portable the line includes the: blue AdventureMini has one USB port (3350 mAh), while the orange AdventurePlus (6700 mAh) and grey AdventureMax (10050 mAh) feature two USB ports and can charge multiple devices at the same time.

Adventure series battery chargers are encased inside an insulated and ruggedized exterior case with a flip lid that latches closed to seal off ports. The unique design of the Adventure chargers protects them from drops up to three meters. The insulation built into the case of the Adventure series chargers protects the batteries inside from extreme heat and cold guarding against degradation and a loss of power. And, when latched closed the Adventure chargers are also water-resistant.

Now available at [mycharge.com](http://mycharge.com) and Best Buy stores, the AdventureMini retails for \$29.99 delivering up to 2X extra battery, the AdventurePlus for \$39.99 (4X extra battery) and the AdventureMax is \$49.99 (6X extra battery). Priced incredibly below the range of even the most affordable generators, the AdventureUltra can be purchased for \$129.99.

Meet with myCharge during Demo Day or at **booth PV2019** during the Outdoor Retailer Summer Market show 2017.

**About myCharge**

myCharge, innovators in portable power create the ultimate portable power solutions for anyone, anywhere who needs to stay charged. Incorporating the highest quality components, cutting-edge design, and smart technologies, myCharge responds to the latest technological advances by providing products dedicated to restoring everyday balance and fulfilling consumer needs in today's on-the-go, always connected, digital society.
