**STEP 1:** Attach casters (A) (x4) to caster plate (B) using the provided bolts (C) (x16) and T-Nuts (D) (x16). Tighten bolts until snug.

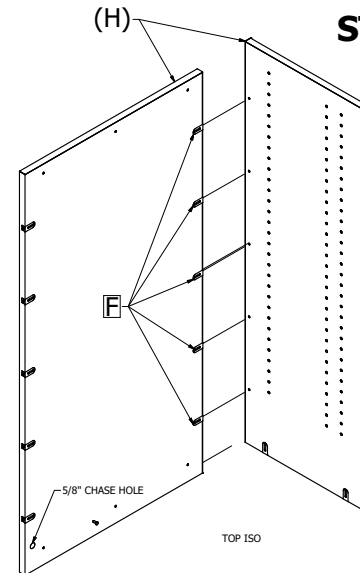

**STEP 2:** After casters are attached, apply the kick (E) to the caster plate (B) by engaging the pre-attached cabineos (F). Use care not to overtighten cabineos.

**STEP 3:** Once kick is secured, carefully flip the assembled plate (B) over with the casters down and insert the 24 provided dowels (G) into the 8mm holes.

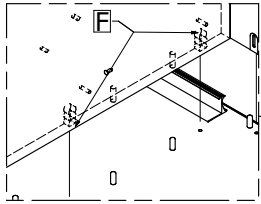

**STEP 4:** Assemble "L" sub-assemblies (H) (x4) using pre-installed cabineos (F). Use care not to over tighten cabineos. Note location of 5/8" chase hole for proper panel orientation. Cabineos should face adjoining panel as shown.

**STEP 6:** Engage all cabineos (F) along edge of one "L" panel into the back of the adjoining "L" panel. Repeat for each "L" panel. Install pegboard panels (I) by sliding into place and attaching 1-1/4" wood screws (5x) through the back of the "L" panels (H), and (1x) through the front (see note). Repeat for remaining 3 panels. Use provided stickers to cover the front screw locations.

DETAIL E

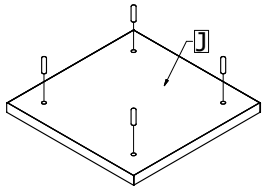

NOTE: RECESSED FACE SHOULD NOT BE VISIBLE WHEN PROPERLY ASSEMBLED

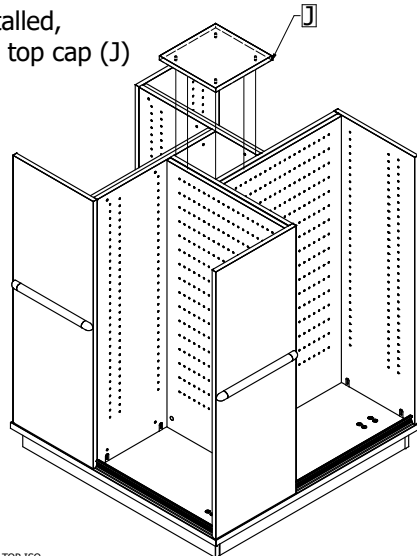

TOP ISO  
1-1/4" wood screw 3x

NOTE: 1 of the 3 screws is applied to the face of the panel on bottom left corner (see Detail "E")

**STEP 7:** After pegboard panels are installed, insert 4 alignment dowels into top cap (J) and install with pegs down.
