## Product Overview

The Neewer RP18H Ring Light is designed with flexibility in mind, supported by a ring light that allows users to adjust brightness settings. The light is bright enough to cover the entire face, making it suitable for a wide range of applications. It is ideal for video production, photography, and other creative projects. The light can be adjusted to suit various shooting needs on a tripod or other mounting mechanisms.

### Package Contents
- RP18H Ring Light
- Power cord (5V, 2A)
- Headband
- 2-mounting screws
- 2-lobe nuts
- 2-bead rings

## Installation Instructions

1. **Mount the light on a bracket:**
   - Position the light in the desired location. Secure it in place using the appropriate mounting hardware.

2. **Connect the power:**
   - Ensure the power cord is properly connected to the power outlet and the device.

3. **Adjust the intensity:**
   - Use the control to adjust the light intensity as needed. The light can be dimmed or brightened to suit the lighting requirements of the scene.

## User Instructions

4. **Prevent overexposure:**
   - Use the control to adjust the color temperature. This helps to prevent overexposure, ensuring that the subject is well-lit.

5. **Reduce brightness:**
   - The ring light can be adjusted to a low power mode for reduced brightness. This is useful when shooting in low-light conditions or when a soft lighting effect is desired.

6. **Increase brightness:**
   - The ring light can be adjusted to a high power mode for increased brightness. This is ideal for brightening up the subject or for use in well-lit environments.

## Remote Control Instructions

7. **Using the remote control to control multiple ring lights:**
   - Connect the remote control to the ring light. Use the remote control to control the brightness and color temperature of the ring lights from a distance.

8. **Using the remote control to adjust the brightness and color temperature:**
   - Use the remote control to adjust the brightness and color temperature of the ring lights. This allows for precise control over the lighting conditions.
