Floor and walls.

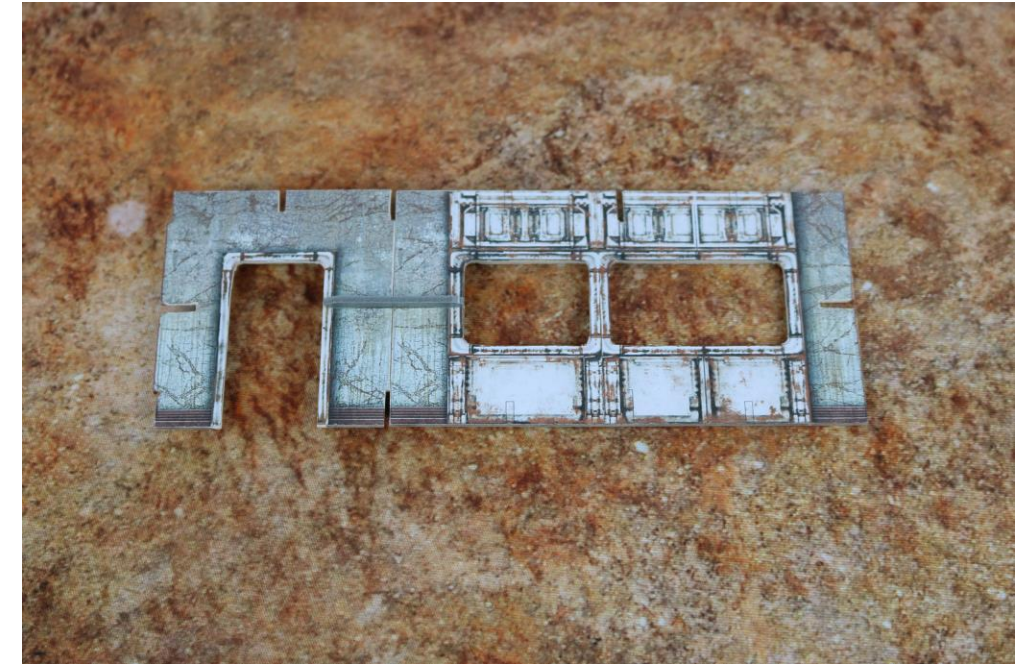

Needs

2 x T Clip

2 x straight clip

5 x 90 degree clip

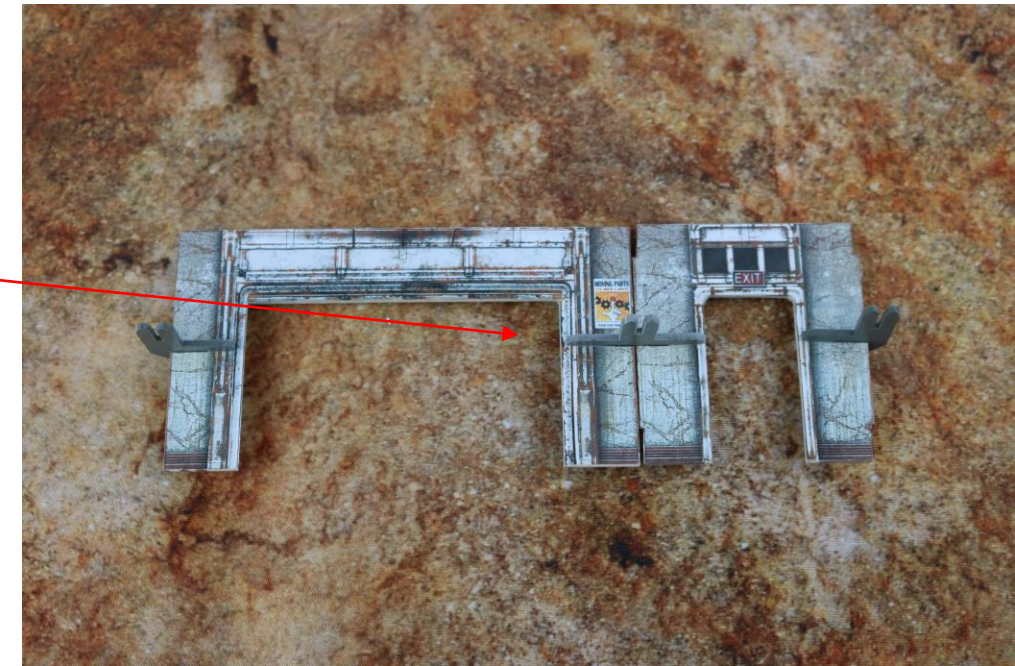

Find floor piece as shown.

Using 90 degree, straight and T clips, build the five wall pieces as shown.

Note – white brick details run around the base of each wall.

T Clip

Combine five wall parts to make the walls, aligned with the floor design as show.

Canopy.

Needs
2 x Straight Clip
6 x 90 Degree clip

Attach two straight clips to canopy floor panels

Note, there are two different leg shapes. Make sure the longer leg with the gentler curve is at the front most part of the canopy

Combine two halves of canopy, attach 90 degree clips to the front arc piece

Insert one of each rocket support into each half

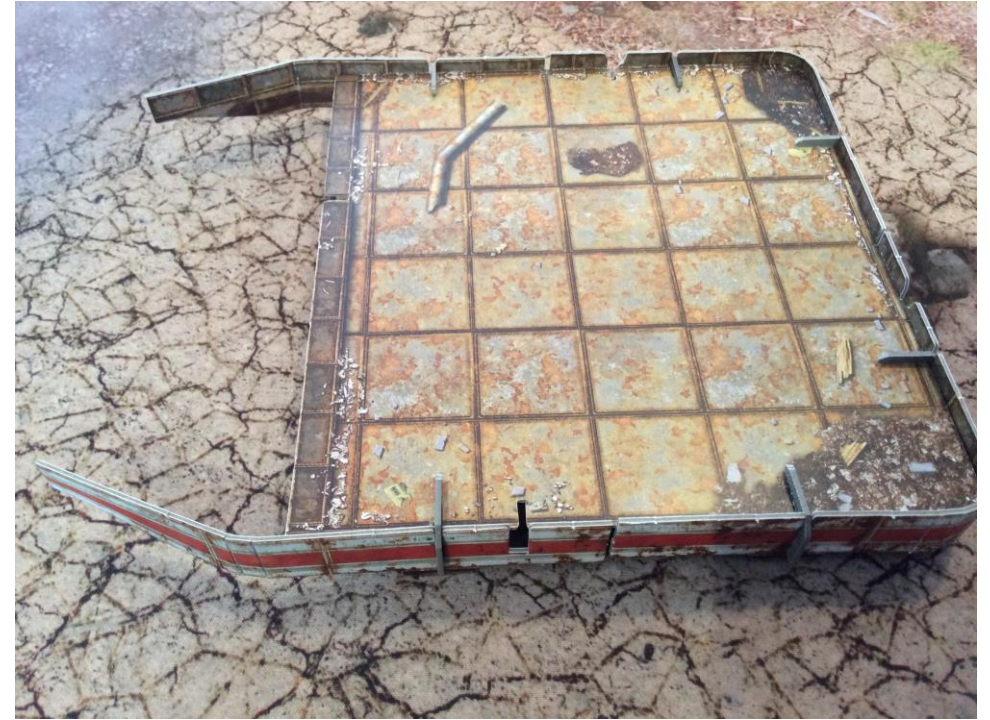

Attach front arc, add 90 degree clips to side pieces and attach. Note black details point down from canopy.

Roof

Needs 8 x 90 degree clip

Attach 90 degree clips to four side pieces and fix to roof.

Attach signs to roof with 90 degree clips.

Finished Red Rocket

Needs 1 x special clip

Use special clip to attach canopy to walls at correct angle, then attach resin red rocket to the feet as shown.

Place roof on top of walls, with slot lined up with the special clip.

Fence
90 degree clip
45 degree clip

Slot three pieces
together with frame to
create fence.

Power Armour Frame x 2

Slot three pieces
together to create frame.
