PEDAL INSTALLATION

TOOLS REOUIRED

» 15mm pedal spanner (available in store)

» Bike grease (also available in store)

IDENTIFY LEFT VS. RIGHT PEDAL.

There is a "L" or "R" stamped into the axle (threaded part that looks like a screw).

NOTE: THEY ARE NOT THE SAME!!

APPLY A SMALL AMOUNT OF GREASE.

INSTALL THE LEFT HAND PEDAL FIRST

You will have to screw it in **COUNTER-CLOCKWISE** because the threading is the reverse of a normal screw.

Do this by slowly pedaling the cranks backwards.

If the pedal feels stiff **STOP** and then re-try, it should feel like a smooth motion.

DO NOT USE THE WRENCH until you are ready to tighten it for the final few turns.

Tighten it down until you can't anymore.

INSTALL THE RIGHT HAND PEDAL.

This one threads in **CLOCKWISE**, like a normal screw.

Follow the same principals as discussed in **STEP 2** for the left pedal.
