CAUTION

- This is NOT a toy! Keep away from children under the age of 12!
- Do NOT open the bottle. Do NOT drink the inside liquid under any circumstances!
- •Indoor use only!

OPERATION

- Carefully unpack your Tornado Lamp from the
- Before every operation, check the unit for visible damage or cracks. In case of any damage, do NOT operate the unit.
- Open the bottom battery compartment & insert 3x AA batteries according to the polarity marking ('+' & '-'). Then, close the battery compartment.
- Alternatively the unit can be powered via USB. Just use a matching cable & connect to a USB outlet.
- Remove all batteries before you operate the item via USB cable.
- Put the unit on a flat and firm surface & switch it on via the housing bottom on/off switch.
- Your Tornado Lamp will light up. Allow a few seconds till the effect reaches full motion.
- Keep in mind that the darker the environment, the more sparkling the light effects.

TROUBLESHOOTING

- If the Tornado Lamp doesn't turn, switch it off - wait for 5 sec. - switch it on again. Make sure that the bottle sits tight on the base. Carefully double check to only use Alkaline batteries - other battery types might not provide enough power.
- If the Tornado Lamp turns too slow, replace with new batteries.
- If the Tornado Lamp doesn't light up & turn, double check that all batteries are inserted correctly and that the unit is switched on.

TECHNICAL SPECIFICATIONS

-Battery operation: 3x AA Alkaline batteries / Power: 4.5V. Do not mix old and new batteries. Remove the batteries if you don't operate the unit for long time.
