Screw Compressor Lubricants		4
Original Parts		5
Genesis Timeline		6-7
Miscellaneous Spare Parts		8-9
MICRON 2.2-15kW (C40 & C55)	From Nov 2009	10
SPINN 2.2 - 5.5kw (C40)	From Nov 2009	11
SPINN 5.5X - 15KW (C55*)	From April 2017	11
SPINN 5.5 - 15KW (C55)	From May 2010	12
SPINN 5.5-11kW (BA51)	From May 2005	13
Formula / Genesis 5.5-15kW (C55*-C67)	From Feb 2018	14
Formula / Genesis 18.5-22kW (C67)	From Feb 2018	15
Formula / Genesis 5.5-15kW (C55-C77)	From Aug 2010	16
Formula / Genesis 5.5-15kW	From Aug 2008	17
Formula / Genesis 5.5-15kW (BA51-69)	From Nov 2004	18-19
Genesis 5.5-15Hp	From 1997	20
Formula / Genesis 18.5-22kW (C77)	From Aug 2010	21
Formula / Genesis 18.5-22kW (BA69)	From Nov 2004	22
Smart 7.5-30Hp	From 1997	23-24
Zenith 03-10Hp		25
VT 7.5-20Hp		26
VT 25-75Hp		27
VT 40-75Hp	From 2002	28
Formula 30-56	From Nov 2004	29
Formula 30-75	From May 2011	30

Fast.

Thanks to a smart design and low weight materials, AIRnet can be installed up to 85% faster than conventional systems.

Easy.

AIRnet pipes and fittings are assembled in just a few steps by a single installer, without the need for heavy machinery.

Reliable.

The durable, corrosion-free AIRnet pipes and fittings come with a 10-year warranty. Low friction and seamless connections minimise pressure drop.

GUARANTEE

10
YEARS

Rotair Food Grade - 4000 Hours	
1630082100	5
1630060500	20
1630082101	209

The use of low performance lubricants will irreversibly damage your equipment and lead to high maintenance and repair cost.

The use of ABAC engineered lubricants will help you to reduce the risk of:

- compression element failure
- wear of components, increased friction, cavitations
- reduced cooling, overheating bearings, compression elements, components
- reduced critical clearance
- corrosion
- wrong pH damage of parts, seals and internals
- varnish layer on internal parts (coolers, piping,...)
- low performance, higher energy consumption
- deposits
- high unpredictable maintenance cost
- clogging of oil filter, separator and down stream air filters
- limited operation range.

In compressors, oil & air are in close contact. A mist of lubricant is repeatedly exposed to large volumes of hot air, **ideal oxidising conditions**.

Anti-oxidant additives delay the oxidising process, deposit and acid formation to **extend oil lifetime** and protect equipment during stand-still period.

Why use Original Parts

Reduce costs and save energy

Unprofessional maintenance might lead to supplementary unpredictable high cost due to element or piston failure, wear, break-down cost, reduced lifetime and even to contamination of the compressed air supply.

Respecting service intervals and using ABAC Original Parts **increase the lifetime** of your compressed air installation and cause a minimal average pressure drop, which leads to **energy savings and cost effectiveness**.

'Original Part' spare part and services

Maintenance with genuine spare part & professional service

Non genuine spare part and services

Maintenance with non genuine spare part, unprofessional service or extending maintenance intervals

Get maximum performance and efficiency

Breakdown of your compressor would not only be costly, but could also cause your revenues reduction or even business loss. With ABAC Original Parts **increase the reliability** of your compressor by **reducing the risk of breakdown**.

Look for your quality assurance!

Mk.I Launched 1997

- Serial number from RG to UP
- Controltronik Controller
- Model number relates to machine size Hp
- BA 51 encapsulated air end
- Horizontal OMI Dryer
- Page 20 Consumable Spares Book

Mk.II Launched 2001

- Serial number from 138
- Mc2 Controller
- Model number relates to machine size Hp
- BA 51 encapsulated air end
- Horizontal OMI Dryer
- Page 20 Consumable Spares Book

Mk.III Launched Nov 2004

- Serial number from;
- 5.5 ~ from > 2399170001
- 7.5 ~ from > 2399180001
- 11 ~ from > 2399200001
- 11 ~ from > 2424240001
- 11i ~ from > 2424280001
- 15 ~ from > 2399190001
- Mc2 Controller
- Model number relates kW
- BA 51 air end – 5.5 -11kW
- BA 69 air end – 15,18.5,22kW
- Two variable speed models 11kW & 22kW
- Page 18 consumable spares book – 5.5 – 15kW
- Page 22 consumable spares book – 18.5 – 22kW

Mk.IV Launched Aug 2008

- Serial number from;
- 5.5 ~ from > ITR0108119
- 7.5 ~ from > ITR0099607
- 11 ~ from > ITR0102279
- 11i ~ from > ITR0101704
- 15 ~ from > ITR0108981
- Mc2 Controller
- Model number relates to kW
- C55 Air end 5.5 – 11kW (fixed speed)
- BA 51 – 11kW Variable speed
- BA 69 air end – 15,18.5,22kW
- Two variable speed models 11kW & 22kW
- Page 17 consumable spares book – 5.5 – 15kW
- Page 22 consumable spares book – 18.5 – 22kW

Mk.V Launched Aug 2010

- Serial number from CAI & ITJ
- Mc2 Controller (except variable speed models)
- Model number relates to machine size kW
- Group Air end C55 = 5.5-15 kW
- C77 = 15-22kW
- Two variable speed models 11 & 22kW (Vacon Inverter)
- Vertically arranged group dryer with zero loss condensate drain
- Page 16 consumable spares book – 5.5 – 15kW (C55)
- Page 21 consumable spares book – 18.5 – 22kW (C77)

Mk.VI Launched Feb 2018

- Serial number from;
- 5.5 - 11 - (C55* & VSD) - > ITJ126640
- 15 - (C67 & VSD) - > ITJ126620
- 18.5 - (C67 & VSD) - > ITJ126500
- 22 - (C67 & VSD) - > ITJ126500
- Model number relates to machine size kW
- Vertically arranged group dryer with zero loss condensate drain
- Page 14 consumable spares book – 5.5 – 15kW
- Page 15 consumable spares book – 18.5 – 22kW
- Infologic Controller fitted as standard to all fixed speed models
- Airlogic Graphic Controller fitted to all variable speed models
- 5 variable speed models - 7.5, 11, 15, 18.5, 22kW
