

SUBJECT-ALIGNED ACTIVITY

COSTUMES, PROPS & SETS #1

This subject-aligned, adaptive Makedo activity enables interdisciplinary learning, and easily links to global curriculum standards.

Use this resource to support your learners to develop their imagination, design thinking abilities, social-emotional skills, and the 4Cs.

Your learners will love the cardboard construction activities, and will benefit from the time that hands-on, minds-on learning affords them to consider options and consequences, and consolidate thinking and ideas.

SUBJECT-ALIGNED ACTIVITY

MAKING CATEGORY

COSTUMES, PROPS & SETS #1

MAKEDO ACTIVITY

Choose a person in history that you admire, and using Makedo tools and up-cycled cardboard, design a costume or prop that best represents what that person did to change the world or that best represents their values and actions. To relate this activity to STEAM, direct students to choose people who worked in the areas of science, technology, engineering, arts and math.

TAKE IT FURTHER

- Create a video or write a speech / jingle / rap / poem to perform based on what this person achieved.
- Design a set that places your person within their era.
- Work with a friend - stay in character and have a conversation with another historical personality.
- Interview your person and ask them what message they might have for us today or what they might think of our world.
- Design a game to teach others about what the person did to change the world.
