

## READY FOR INSTALLATION

Please ensure the following checklist is completed prior to installation of your coffee machine and/or grinder.

---

### INSTALLATION CHECKLIST

- Ensure enough bench space is available for the machine (and grinder if required).

Depth: \_\_\_\_\_

Width: \_\_\_\_\_

Height: \_\_\_\_\_

(An additional 30 cm in depth and width is required for the grinder)

- 45-50mm Hole drilled in benchtop for water hose, waste water hose and power lead.
- Waste water drain within 1 metre of machine.
- 2 Power points within 1 metre of machine location. One for your machine and one for the grinder.
- Check the wattage of your elements 2400w are ok on a normal 10amp power point
  - 2 group machines require 15 AMP
  - 3 group machines require 20 AMP
- Cold Water ½ inch male stop cock fitted within 1 metre of machine (ideally under the bench).

RECOMMENDED: 350 KPA Pressure Limiting valve to be fitted in line by your plumber with a half inch male fitting, Left to connect to.

### OUR INSTALLATION SERVICE INCLUDES:

- Connection of machine to water and power
- Demonstration on how to use your machine
- Instructions on cleaning and caring for your new machine
- Calibrate grinder if required
