

GIANT SEAT QUICK START

How to correctly install your giant seat

MAX Weight Capacity: 220lbs

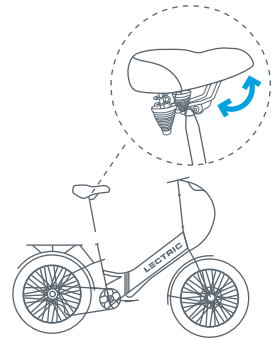

STEP 1

Use a 14mm wrench to loosen the nuts on the bottom of the saddle rails and separate the saddle from the seat post.

STEP 2

Insert your seat onto the seatpost. At this time you can slightly adjust the tilt of your seat and the front to back position.

STEP 3

Make sure to evenly tighten both sides until wrench leaves an impression on your palm.
