Congratulations

on the purchase of your new Breville Pastry Creations™

Breville recommends safety first

We at Breville are very safety conscious. We design and manufacture consumer products with the safety of you, our valued customer, foremost in mind. In addition we ask that you exercise a degree of care when using any electrical appliance and adhere to the following precautions:

Important safeguards for your Breville Pastry Creations

- Remove any packaging material and promotional labels before using Pastry Creations for the first time.
- Do not place Pastry Creations near the edge of a bench or table during operation. Ensure the surface is level, clean and free of water, flour, etc.
- Do not place Pastry Creations on or near a hot gas or electric burner, or where it could touch a heated oven.
- Do not attempt to operate Pastry Creations by any method other than those described in this booklet.
- Always ensure Pastry Creations is turned off at the power outlet and the cord is unplugged before attempting to move the appliance, when not in use, if left unattended and before disassembling, cleaning or storing.
- When using Pastry Creations, provide adequate air space above and on all sides of the appliance for circulation.
- Do not touch hot surfaces. Remove the pies with a heat-proof plastic spatula or tongs.
- To protect against electric shock do not immerse the appliance, cord or power plug in water or any other liquid.
- Keep the appliance clean. Follow the cleaning instructions (Page 9).

Important safeguards for all electrical appliances

- Unwind the cord fully before use.
- Do not let the cord hang over the edge of a table or counter, touch hot surfaces or become knotted.
- This appliance is not intended for use by young children or infirm persons without supervision.
- Young children should be supervised to ensure that they do not play with the appliance.
- It is recommended to regularly inspect the appliance. Do not use the appliance if the power supply cord, plug or appliance becomes damaged in any way. Return the entire appliance to the nearest authorised Breville service centre for examination and/or repair.
- Any maintenance, other than cleaning, should be performed at an authorised Breville Service Centre.
- This appliance is for household use only. Do not use this appliance for anything other than its intended use. Do not use in moving vehicles or boats. Do not use outdoors.
- The installation of a residual current device (safety switch) is recommended to provide additional safety protection when using electrical appliances. It is advisable that a safety switch with a rated residual operating current not exceeding 30mA be installed in the electrical circuit supplying the appliance. See your electrician for professional advice.

Operating your Breville Pastry Creations

Before first use

- Remove any packaging material and promotional labels. Wipe the cooking plates (lid and base) with a soft damp cloth and dry thoroughly.
- Season the cooking plates (lid and base) with a little vegetable oil and rub off the excess with absorbent paper. Do not use spray on non-stick coatings as this will effect the performance of the non-stick surface on the cooking plates. After this initial seasoning, there is no need to season the plates after each use as the pastry leaves the plates slightly seasoned.
- When using the Breville Pastry Creations for the first time you may notice a fine smoke haze. This is caused by the heating of some of the components. There is no need for concern.

The pastry cutter provided cuts the pastry tops and bases for your pies and is designed to perfectly fit the Pastry Creations pie dishes. The smaller cutter is for the pie top (See Fig. 1) and the large cutter is for the pie base (See Fig. 2).

Note

If using pre-purchased frozen pastry sheets, remove from the freezer in sufficient time for thawing. One standard 25cm square pastry sheet is sufficient for two pies. Prepare fillings in advance.

Note

Pastry Creations is designed for making two pies at a time. Uneven cooking or burning may occur if only one pie is made.

Note

Fig 1

Fig 2

1. Insert the plug into a 230/240v power outlet. Close the lid and switch the power on at the power outlet. The red power 'ON' light will illuminate and remain illuminated until the appliance is switched off at the power outlet.
2. Allow the appliance to preheat for approximately 8 to 10 minutes. When the green 'Ready' light illuminates, Pastry Creations is ready to use.

When baking the first two pies, it is recommended to allow Pastry Creations to preheat for two cycles to achieve the optimum baking temperature. To preheat the Pastry Creations for two cycles, allow the green 'Ready' light to illuminate then go out, then illuminate again. Pastry Creations is ready to use when the green 'Ready' light illuminates for the second time.

Note

3. Cut 2 pastry tops and 2 bases by positioning the cutter over a flat sheet of pastry and press down firmly into the pastry. Do not twist. Ensure the cut is smooth around the edges (see Fig.3).
4. Place the pastry base into the centre of the pie dish and gently press to mould to the shape of the dish, ensuring the edges of the pastry overlap the crimping area of the pie dish.
5. Spoon pre-cooked and cooled filling into the pastry base. It is recommended that a $\frac{1}{3}$ cup of filling be used unless specified in the recipe. Do not overfill the pastry bases.
6. Place the pastry tops over the filling, ensuring the edges of the pastry top are positioned evenly over the pastry base edge.
7. Close the lid, ensuring the locking latch clicks into position. The lid must be closed at all times when baking. It is advised that the pies are checked regularly until desired shade of golden brown.
8. Different pastries require varied cooking times. For thin pastries, such as puff pastry, allow pies to cook for 6-8 minutes or until desired shade of golden brown. For thicker pastries, such as shortcrust pastry, allow pies to cook for 8 minutes plus or until desired shade of golden brown. Remove the pies with a heat-proof spatula or tongs.

Do not use liquid ingredients only (such as sauces, gravies and custard) or in large amounts as the pie fillings, as they will overflow and make the pastry soggy. Always combine with solid ingredients.

Note

Do not use metal utensils as these may scratch the non-stick finish of the cooking plates.

Note

Fig 3

Pie bases can be made with shortcrust pastry and pie tops made with shortcrust, puff or butter puff pastry.

Note

Before baking the next two pies, it is recommended to close the lid and to allow Pastry Creations to preheat for a few minutes to achieve the optimum baking temperature. When the green 'Ready' light illuminates, Pastry Creations is ready to use.

Note

Care, cleaning and storage

Before cleaning, turn the power off at the power outlet and then remove the plug. Allow Pastry Creations to cool slightly. The appliance is easier to clean when slightly warm.

Always clean your Pastry Creations after each use to prevent a build up of baked-on foods.

To clean the cooking plates

Wipe cooking plates with a soft damp cloth. Dry thoroughly.

If baked-on food is difficult to remove, brush with a little oil or melted butter. Allow to stand for five minutes then wipe with a damp cloth.

If food residue builds up, spray with a little lemon juice and wipe clean. Do not use abrasives or metal scourers as they will scratch the non-stick surface of the cooking plates.

To clean the exterior

Wipe with a soft damp cloth and dry thoroughly with a soft dry cloth.

Do not use metal utensils as these may scratch the non-stick finish of the cooking plates.

Note

Storage

Before storage, turn the power off at the power outlet and then remove the plug. Ensure the appliance is completely cooled, clean and dry. Wrap cord around the cord storage. Store the appliance upright on the bench or in a convenient cupboard.

Do not place anything on top of the appliance during storage.

Hints for best results

Pastry

- A wide selection of ready rolled pastry, such as short crust, puff, butter puff and wholemeal, is available in your supermarket freezer. These pastries give great results and are handy to keep in your freezer. Allow sufficient time to defrost pastry before use. Filo pastry can be used for some pies. Use Filo pastry from the chilled refrigerator section of the supermarket. Frozen filo pastry can be brittle and difficult to shape.
- Pastry sheets should be kept chilled in between each use. Soft pastry sheets are difficult to handle and to cut clean shapes.
- For a lighter and more buttery taste, use puff pastry or butter puff pastry for the pastry top with shortcrust pastry for the pastry base. This combination is ideal for dessert pies. Some pies, such as tarts and quiches, are made with a pastry base only.
- Make garnishes and decorations with the left over pastry. Place onto the pastry top before closing the lid of the appliance.
- Unused pastry sheets can be refrozen. Place into a large freezer bag and seal before placing back into the freezer.

Bread

- Pastry Creations can also prepare economical pies from bread. Most types of large-size sandwich bread can be used: white, wholemeal, wholegrain, raisin loaf. It is not recommended to use thick or toast slices as they will prevent the lid from closing correctly. Heavy grained breads are not recommended as they may scratch the cooking plates and are not sufficiently pliable for shaping into the pie dishes. When using raisin bread, brioche or other sweet breads that are higher in sugar, remember that they may brown quickly.
- To cut 2 bread tops and 2 bread bases, use 4 slices of large-size sandwich bread. Position the cutter over each slice and cut by pressing down into the bread. Do not twist. Ensure the cut is smooth around the edges.
- For best results we recommend to butter the outside of the bread, that is, place the buttered sides against the cooking plates. Place filling between the unbuttered sides of bread. If you are on a low fat diet or kilojoule counting, the outside of the bread may be left unbuttered. Season the plates occasionally to prevent sticking and to make cleaning easier.

Fillings

- Fillings should be cooked and cooled before adding to the pie base. The cooking time for the pies is not sufficient to cook raw meat fillings or soften fresh fruit or vegetable fillings.
- Try to use canned or pre-cooked fruit, as fresh fruit may lose juice when heated.
- If using a filling higher in liquid content, restrict filling to $\frac{1}{3}$ cup measure of the mixture.
- Pies with insufficient filling will not form a good shape and brown on top.
- Excess prepared fillings may be stored in a covered container in the refrigerator for up to 2 days.
- Be careful when biting into hot pies and especially hot pies containing fillings such as cheese, tomato or jam as these retain heat and may burn your mouth if eaten too quickly.

Reheating

- Keep pies hot after baking by placing onto a rack inserted into an oven-proof dish. Place into a slow oven preheated to 100-120°C for up to 20 minutes. Pies will begin to dry out if kept for longer in the oven.
- If pies are not being served immediately, place onto a cooling rack or onto a paper napkin to absorb condensation.
- Pies should be cooled and kept in an air-tight container in the refrigerator if not required immediately after baking. Reheat in a preheated hot oven 220-230°C for 10 minutes or until heated through.
- Do not reheat pies in a microwave oven as the pastry will soften.
