

2021-2023 Kia K5 GT M&S Science Kit Modification Guide

In order to have the Science Kit Rear Diffuser fit a Kia K5 DL3 GT model, a couple of modifications on the kit will be required.

STEP 1:

The area indicated in the red circle needs to be sanded (on the inner side of the kit). Please note, it doesn't need to be sanded too much, just needs to be sanded a bit to fit the GT models, rear bumper, as there is a slight difference in the design from the GT-Line model.

STEP 2:

This area in the red circle needs to be trimmed out to fit properly.. During a dry fitting (or test fitting) you will notice this area will come in contact with the GT model's exhaust. This part of the kit needs to be trimmed out, so that it does not come in contact with the factory exhaust. Please note, the only part that needs to be cut out is where the kit comes in contact with the exhaust. It will be best to mark the location with masking tape in order to make sure the cut is not too big or too small.
