#### **DISCLAIMER:**

This 'Do-It-Yourself Installation Guide' is intended for informational and reference purposes only. We do not recommend implicitly or explicitly, to anyone, performing any of the procedures described in this guide. We are also not responsible for any property damage, personal injury and/or death, or any other loss or damage that may result from following this informational guide.

Proceed with caution and care when performing modifications to your vehicle.

Be advised that making modification to your vehicle may void your manufacturer's warranty.

Hyundai is a registered trademark of Hyundai Motor America. Kia is a registered trademark of Kia Motors America, Inc. iPod is a registered trademark of Apple, Inc. Bluetooth is registered trademark of Bluetooth SIG, Inc.

#### NOTE

- Take care not to scratch the center fascia panel, dash trim, shift knob, etc.
- Eject disc before removing the audio unit to prevent damaging the CD player's load mechanism.
- Disconnecting the negative (-) battery terminal is recommended prior to installation.
- Do not touch the circuit board and the terminal connector of the flat cable with your bare hands.
- Make sure all connectors and cables are plugged in properly.
- All ground wires provided must be connected to chassis ground.

### **TOOLS REQUIRED:**

- Masking Tape
- Double-sided Tape \*
- Electrical Tape
- Velcro
- Dash Trim Removal Tool \*
- Zip/Cable Ties
- Scissor \*
- Plastic/Tin Snips \*
- Pliers \*
- Screwdriver (Phillips-head, Magnetized) \*
- Magnetic Screw & Bolt Tray
- Power Drill \*
- Unibit \*
- Electrical Connectors & Tools (Wire stripper, Crimper, T-Tap, etc.)
- Hand Saw/Reciprocating Saw \*
- Heat Gun

## Pre-installation picture of non-navigation equipped models (Trim levels may vary)

# TPMS (TIRE PRESSURE MONITORING SYSTEM) WARNING LAMP – ELECTROMAGNETIC INTERFERENCE

#### SYMPTOM/CONDITION

The TPMS malfunction indicator lamp may be illuminated if the vehicle is moving around electric power supply cables or radio transmitters at police stations, government and public offices, broadcasting stations, military installations, airports, transmitting towers, etc. External electronic devices connected to the vehicle's power outlets (notebook computer, seat warmer, massager, coolers, GPS navigation, mobile phone charger, etc.) may also cause this condition. The TPMS malfunction indicator lamp generally turns off after the vehicle is removed from such interferences.

#### **DIAGNOSIS:**

If the TPMS indicator lamp is ON, and all four wheel sensors are checked and are working correctly, external electronic devices connected to the vehicle's power outlets (notebook computer, seat warmer, massager, coolers, etc.) may be the cause of this condition. Car manufacturers are aware that any aftermarket device operating especially on the CAN-Bus system can trigger random warning lamps.

#### **ACTION:**

- 1. Please inspect if there are any other electronic devices inside the vehicle that may cause electromagnetic interferences with the TPMS.
- 2. Drive the vehicle out of the strong electric field for about 5 minutes to verify that the condition is corrected.
- 3. Relocate the Control Box and its related cables away from the TPMS sensor (typically located behind the glove compartment).
- 4. If the above doesn't work, use a metallic shield wrap or a similar material to wrap around the Control Box and its cables with both ends of the shield connected to chassis ground at the point of entry.

#### **GPS ANTENNA INSTALLATION**

The delay when the GPS receiver is first switched on is due to the latest ephemeris data being downloaded, which is essential for the GPS receiver. The data is valid for around 4 hours and takes approximately 20 seconds with a clear line of site to a satellite. It takes longer if using multiple satellites, for instance if the GPS receiver is moving during first acquisition.

The antenna needs to be facing the sky through a non-metallic enclosure. A metallic enclosure (including window tints) will prevent the RF signal being received by the antenna and cause a Faraday cage effect. Likewise, positioning the antenna near to obstructions such as laptop screen or where hands will be over the antenna should also be avoided, as the shielded will have a negative performance.

The GPS Antenna base is magnetic. On metal vehicles, position the antenna in the center of the vehicle at the highest point.

For vehicles with non-metallic mounting surfaces, a metal plate with adhesive strips has been included in the kit for easy mounting and installation. It is STRONGLY recommended to use this metal plate underneath the antenna as it will improve signal acquisition.

Once the antenna has been positioned, route the antenna cable carefully to avoid damage.

Position the GPS antenna in the center of the vehicle at the highest point with a clear view of the sky.

[WARNING] This TRIP MODULE is designed for specific models. Improper use such as failure to follow instructions and use with incompatible radio will damage this module and the radio unit!

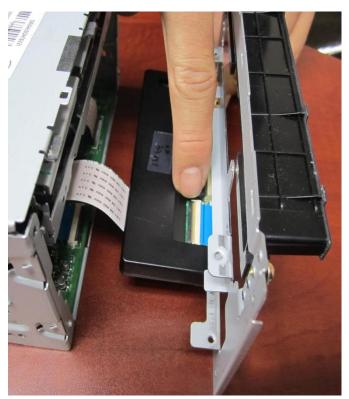

**NEVER** attempt to connect the ribbon cable to the Trip Interface Board like the picture shown above as it may cause permanent damage to the audio unit!

CLASSFICATION	SKU	DOCUMENT NO.	
Installation Manual	ENB-X5-QF		X5-K-8
UNAVI X5 for Kia Optima Installation Guide		VERSION 1 2	PAGE 17

Please proceed with CAUTION when inserting the ribbon cable into the Trip Interface board.

DO NOT twist the cable as this may result in a damaged board and/or the audio unit!

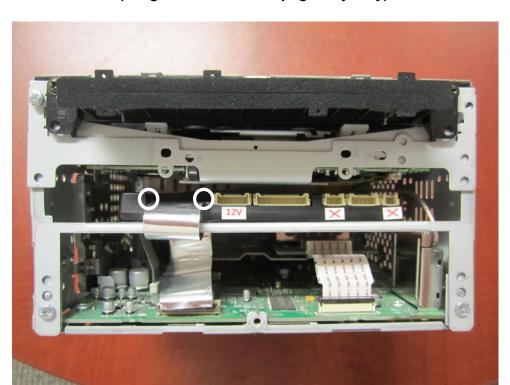

The Trip Interface board is designed to communicate with either side of the pins.

Connecting the ribbon connector between the trip interface board and the audio head unit:

- Lift up the lock on the Trip Interface board
- Gently slide in the ribbon cable until it can't slide in any further

Date: 10/8/2015

- Push the lock down to secure the cable

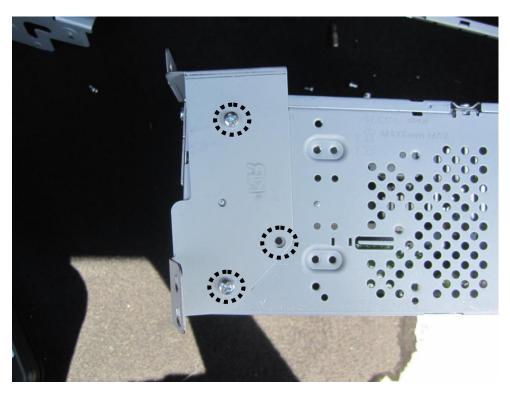

(Images shown on this page may vary)

\*Please check after installation when the radio unit is powered on\* Red LED lights on the circuit board will flash intermittently indicating data communication.

CLASSFICATION	SKU	DOCUMENT NO.	
Installation Manual	ENB-X5-QF		X5-K-8

Screw on the replacement mounting brackets (Left and Right) as shown.

Open the glove box and twist the knobs on both sides to loosen the compartment.

CLASSFICATION	SKU	DOCUMENT NO.	
Installation Manual	ENB-X5-QF		X5-K-8
UNAVI X5 for Kia Optima Installation Guide		VERSION	PAGE 10

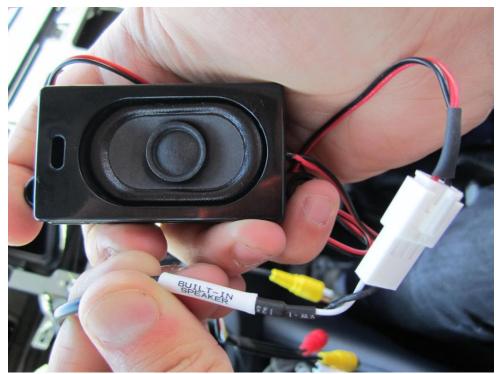

Route the Control box interface cable around from behind the glove box and out through the center dash panel opening.

Mount the control box inside the glove box using a double-sided tape or Velcro.

CLASSFICATION	SKU	DOCUMENT NO.	
<b>Installation Manual</b>	ENB-X5-QF		X5-K-8
UNAVI X5 for Kia Optima Installation Guide		VERSION	PAGE

Connect the external speaker to the female connector labeled "BUILT-IN SPEAKER" This speaker will allow sound output from the UNAVI system when the audio is in XM/Radio/CD/MP3/Bluetooth mode.

Sound output from the system will use the factory speakers under "AUX" mode only.

If you choose to install the external speaker, choose a location closest to the driver (exposed or hidden) and where it can be mounted from causing any obstructions to other components.

CLASSFICATION	SKU	DOCUMENT NO.	
Installation Manual	ENB-X5-QF		X5-K-8
UNAVI X5 for Kia Optima Installation Guide		VERSION 1 2	PAGE 21

Make sure the GPS receiver is mounted (rounded side up facing the sky) to a non-metallic panel or on the front windshield glass. Route the antenna cable carefully to avoid damage.

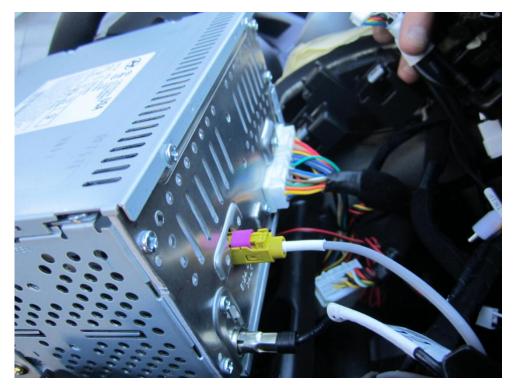

CLASSFICATION	SKU	DOCUMENT NO.	
<b>Installation Manual</b>	ENB-X5-QF		X5-K-8
UNAVI X5 for Kia Optima Installation Guide		VERSION	PAGE

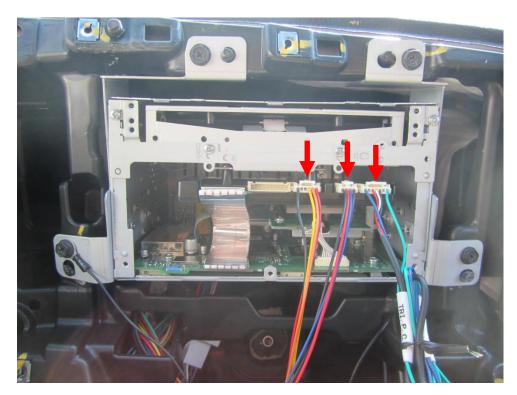

Connect the main factory audio cable (24-pin) to the SMART cable harness. Clear of any obstructing cables or components behind the dash panel.

Reconnect the remaining audio unit connectors and cable as shown. Clear of any obstructing cables and mount the audio unit back into the dash panel.

CLASSFICATION	SKU	DOCUMENT NO.	
Installation Manual	ENB-X5-QF		X5-K-8
UNAVI X5 for Kia Optima Installation Guide		VERSION	PAGE

Check the cables are not being too tightly squeezed in the back of the audio unit. Plug in the 6-pin, 4-pin & 7-pin connectors to the Trip Interface board as shown.

(Image shown above may vary)

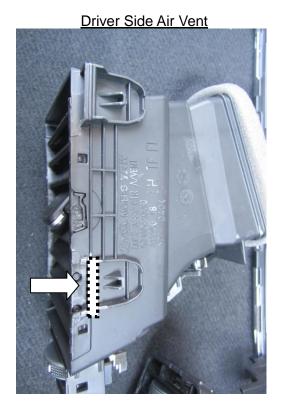

Carefully disassemble the two air vents from the factory center fascia panel.
