

Yoke Pen Co.

Custom Laser Flange Pricing & Process

The process works as follows...

1. Download the template format of your choice and design and convert to a vector based graphic.
2. Create an exported jpg image of the file if it has areas of fills
3. Please be sure to embed an fonts used in the completed file
4. Email the files to yokepen@gmail.com
5. Within 24-48 hours you will receive an email response confirming that your file is formatted correctly or not. If there are changes that need to be done, you will be required to make the applicable changes
6. Upon confirming your files are formatted correctly, a non-refundable deposit is required to begin the CAD Export process. This deposit amount will be based upon complexity and priced as below. This is a one time deposit and the same flange design can be repeated at any time with only the Engraving Cost
7. Your design will then be engraved and a image emailed of the engraving design proof. Upon acceptance of the proof your finalized design will be created on a flange for either attachment to your custom oblique pen holder or raw flanges can be sent for your own use.

PRICING

- Non-Refundable, one time CAD setup fee: \$40 and up. Pricing is dependant upon complexity. This fee can be waived if your design requires no additional work, other than a simple one time import.
- Flange Engraving Cost: \$15 - \$40. Pricing based upon time it takes the laser to complete the engraving. Most designs will fall towards the low end of this price.
- Large discounts for bulk production are available. Contact us to discuss pricing.
