Hi Chris,

Jul 24, 2019

We've been A FlameOut Dealer for several years now, exported pails of foam to return customers as far as Nigeria, the Caribbean, and all over Canada.

The environmentally friendly biodegradable A/B Class fire suppressing agent is a good fit for a variety of our clients. Our agricultural customers appreciate the fact they can use the foam on equipment as well as around the farm to take care of diesel/grease fires as well as grass fires.

Once people see a live demonstration and just how effective the foam is on grease, diesel and wood it sells itself based on performance.

We look forward to a continued business relationship with you and to continue supplying our customers with a superior product.

Thank you,

Luc Lainey
