Ben Harper Signature Model Asher Lap Steel Guitar

"I'm as excited
about having this
guitar in the world
as much as my
music really. It's
that amazing of an
electric guitar."
-Ben Harper

The Ben Harper Signature Model lap steel simultaneously captures the classic vibe and tone of the revered '59 Les Paul guitar with the feel and sustain of a vintage Weissenborn lap steel.

Asher's modern design creates tremendous playability and increased tone options for a more creative and musical experience. Each instrument is hand built using the finest tone woods and hardware available.

Truly a unique hybrid, the Ben Harper Signature Model may be one of the most exciting lap steels ever built.
