

APPLICATION	 Optimized for MTB drivetrains	 Optimized for drop bar bikes	 Designed for only Shimano® HG+ 12spd
TOOTH PROFILE	<b>Drop-Stop® A</b>	<b>Drop-Stop® B</b>	<b>Drop-Stop® ST</b>
CHAIN COMPATIBILITY	<b>all 9, 10, 11spd chains</b> 12spd SRAM® Eagle, KMC, Connex, Wippermann chains  Not compatible with 12spd SRAM Flattop, 12spd Shimano HG+, or 12spd Campy	<b>all 9, 10, 11spd chains</b> 12spd SRAM Eagle, Campagnolo®, KMC, SRAM Flattop AXS chains  Not compatible with 12spd Shimano HG+ chains	<b>12spd</b> Shimano Hyperglide+ chain only  Not compatible with all other chains
DETAILS	 The original Drop-Stop tooth profile. The wide teeth are wider than Drop-Stop B. Outside faces of narrow and wide teeth guide chain alignment.	 Tooth shape is nearly identical to Drop-Stop A, but has narrower teeth. Valley between teeth is deeper to accommodate larger rollers on Flattop chain. Outside faces of narrow and wide teeth touch chain to guide alignment.	 Narrower teeth than Drop-Stop A. Wide teeth use Symmetric Trapezoidal (ST) profile to match extended inner edge on chain to create alignment (outside faces of wide teeth do not touch). Interaction of narrow teeth and chain are similar to Drop-Stop A and B.
