Points for observation and description

For the child study

Compiled by David Mitchell

History of the child From conception and birth and events from early childhood

Pregnancy: normal, difficulties, maternal illness, stress, accidents

Birth: normal, breech, caesarean, complications
First three years: crawling, walking, speech,
memory, complete sentences, when did the
child refer to him- or herself as "I"?

Childhood diseases and any other health problems Teething

Accidents Play

Physical description of the child

(only observations are noted here, not interpretations)

Skull: Head: large/small, round/angular

Forehead: high/low

Eyes: wide/narrow, large/small, color Nose: large/small, snub/beaked

Cheekbones: high, flat Mouth: small/large, thin/full Chin: weak/strong, split/receding

Ears: small/large, primitive/complex, flat, standing off/set at an angle/upright, set low/set high (ears are usually located between the end of the nose and the eyes in a frontal view)

Earlobes: attached/free-floating, fleshy/thin
Neck and Shoulders: thick/thin, long/short
Trunk: broad-chested/narrow-chested/pigeonbreast/hollow back/too short/too long—

compared to rest of body

Arms: too long/too short

Hands: large/broad/thin/delicate, easily bent back, flabby/hard, dry/sweaty

Legs: long/short—relative to body

Knees: knock-kneed, knees form a hollow Feet: pigeon-toed/pointed out, large/small,

narrow/broad

Perception and movement

Senses: Go through all 12 senses and describe any peculiarities

Movements: gross and fine motor movements characterize the movements if appropriate, such as a nervous, hoppy, placid, flighty, heavy, determined, tentative, abrupt, cautious, and so forth

Gait: toe/heel first touching floor, rhythmic/uneven, shuffle/springy

Dominance: determine left/right dominance in eye, ear, hand, and foot

Aspects Related to the etheric body

Temperament: sanguine/melancholic/ choleric/ phlegmatic/mixed

Memory peculiarities: What is the relationship to time? Always too slow, too fast, just right, or rolling along (Time-relationship is an excellent indication of temperament.)

Healthy/unhealthy looking, easily flushed/mostly pale, low/ high pain threshold Relationship to modeling: clay/beeswax

Related to the astral body

Characterize thinking/intellectual capacities: picturing/abstract conceptualization/ relationships/sequence/logic/etc.

Characterize feeling and emotional capacities: sensitive/insensitive, deep empathy/ callousness, tempers/always calm, cruel/ sympathetic

Characterize will nature: instinctive mode of action/ deliberate mode of action, follow through/ leaves things unfinished, difficult to start/ difficult to finish, gets stuck easily/able to ask for help, able to plan action/always needs guidance before beginning action, leader / follower

Characterize imagination: strong/weak/bizarre/ artistic/visual

Social and ego relationships

What are the relationships and interactions with classmates/siblings/parents/ teachers/ strangers?

What is the social behavior? Temperament? What is the relationship to nature, to plants, to pets, etc.?

What is the relationship to work: Does she/he take responsibility? Does she/he take pride in good work? in completion? In beautiful work?

Artistic capacities

Describe work in modeling/ drawing/painting/ music/speech/drama/eurythmy

Learning profile

Type of memory: visual/aural/tactile
Relationship to music: learn by imitation/by figuring
out by self/by being talked through/by acting
out the relevant patterns/by repetition
