## RING SIZER

To convert the circumference of you finger into a ring size using a conversion ruler:

1. Cut out the ruler. Make a slit in the ruler as indicated.
2. Create a loop by inserting the pointed end of the ruler into the slit.
3. Insert your finger into the loop.
4. Pull on the pointed end to tighten it to a comfortable fit around your finger.*
5. Make a note of the number at the slit: this is your ring size.
6. *Please also fit the loop tightly around your knuckle and take a note of the size.

## FOOTNOTES ... or ... should we say, 'HAND NOTES'

A. The most accurate sizing will most likely be made by a professional so we do recommend going to a local jeweller to by sized.
B. Not all hands are created equally: please send us a photo of the hand that you want to have the ring made for. Top view of the hand ( not the palm) and preferably without any rings on it.
C. Keep in mind that your dominant hand (the hand you write with) will be marginally bigger than the other, so do measure the finger you intend for your ring.
D. Take note that the design of your ring will alter how it fits. A chunky ring needs
 more room to slip on to your finger but can not be too loose as to swing around too freely. If you have a ring that resembles the one you are comissioning, take it with you to the jeweller or your appointment to have a size taken from it.
