

HI-13P-PU Heavy Duty Hand Truck

The Heavy Duty Hand Truck HI-13P-PU which is part of our Hand Truck Designer System so you can configure a Sack Truck to meet your requirements. Fitted with a curved frame to reduce movement of round, curved, or cylindrical loads. The hand truck is constructed from heavy duty 30mm angle iron, to give a superbly ridged frame. Fitted with a 20mm solid axle, and supplied as standard with Pneumatic tyres, on bolted steel centres to enable the changing of tyres to be quick and easy, and topped off with fully cased ball bearing to give a smooth ride and long life. You can upgrade the tyres to Polyurethane Foam Tyres that are anti puncture and will last until you wear them to the rims, but also offer the additional safety benefits of ensuring that your staff are not responsible for keeping the air pressure correct, thus ensuring that the load doesn't lean.

Options

Our 20mm solid Sack Truck axles can fit both traditional Pneumatic Wheels or upgrade to our Polyurethane Puncture Proof wheels. No more flat tyres or punctures increasing safety and productivity.

Our handles come with multiple grip options. The standard is a durable rubber grip, alternately we also supply a knuckle guard grip or a comfort foam grip.

3 toe plate size options are available for our standard range: 250mm / 350mm / 450mm.

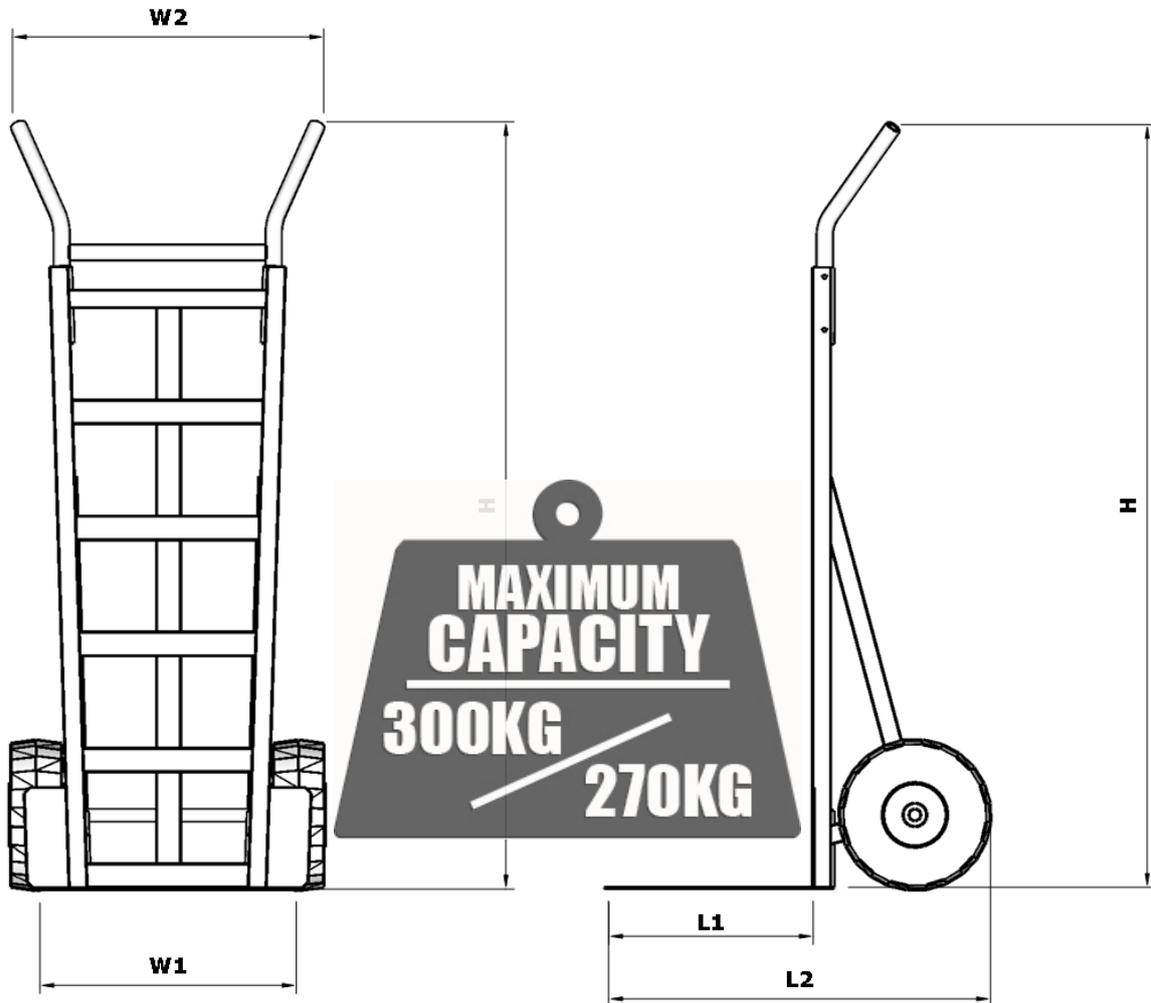

Safety straps are also available to accompany all our sack trucks for securing taller and heavier loads.
