

HI-36-FBT-M Heavy Duty Platform Truck With Single Mesh End

Heavy Duty Platform Truck With Single Mesh End. The HI-36-FBT platform trucks with mesh infill under the handle. Constructed using the latest laser cutting facilities, the frame is made from a single piece of box section steel that is bent round at each corner to form the base of the trolley. The advantage of this manufacturing technique is improved overall strength and the addition of rounded corners that help to prevent the risk of injury or damage to property from accidental knocks. The rounded corners of the base of the trolley have been fitted with tubular brackets to make the fitment of additional sides or ends a two minute job. A cross brace made from 25mm angled steel is welded to the underside, for increased strength, and then laid with 18mm weather proofed ply. Mounted on 200mm diameter polypropylene centred wheels with a durable, yet forgiving rubber tyre.

Options

As a standard, our trolleys are epoxy powder coated in Blue RAL5007 and stove baked, you can choose an alternative colour if you wish.

There are multiple options for bed sizes. The standard sizes for this model are: 1000mm x 600mm, 1200mm x 600mm, 1500mm x 750mm, 2000mm x 1000mm

To add additional mesh sides or ends to this trolley please see our Platform Trucks section online on handle-it.com

Safety straps are also available to accompany all our sac trucks for securing taller and heavier loads.
