A LETTER FROM YOUR INTELLILINK MARKETING TEAM

GMC's Professional Grade trucks get an amped-up IntelliLink for the 2015 Model Year with features that include:

- Siri Eyes Free to enable iPhone users to access more of their phone's features through the radio
- Text Message Alerts, a hands-free method of receiving text messages in your vehicle

Introducing OnStar 4G LTE Wi-Fi Service¹

To complement IntelliLink's advanced infotainment system, we're pleased to offer OnStar 4G LTE Wi-Fi service that makes select GMC vehicles a rolling Wi-Fi hotspot. The hotspot is powered by your vehicle, so when your vehicle is running, your hotspot is active.

- The 4G connection is stronger because of a more powerful antenna. And up to seven Wi-Fi devices can be connected at once, so when you're chauffeuring your family or driving carpool, everyone can use OnStar 4G LTE Wi-Fi.

Best of luck selling the new features of IntelliLink and the new OnStar 4G LTE Wi-Fi service in the most capable GMCs yet!

Your IntelliLink Marketing Team

¹ See onstar.com for a detailed instruction guide, vehicle availability, details, and system limitations. Services and apps vary by make, model, year, carrier, availability and conditions. 4G LTE service is available in select markets. 4G LTE performance is based on industry averages and vehicle systems design. Some services require a data plan.

NEW FEATURE: ONSTAR 4G LTE WI-FI SERVICE

ONSTAR 4G LTE WI-FI² MAKES YOUR VEHICLE A ROLLING HOTSPOT (I04, I05, I06)

Your vehicle can be a rolling mobile hub with great signal quality and bandwidth for up to seven devices. OnStar with 4G LTE service allows everyone in your vehicle to enjoy his or her own content. A 3-month/3GB, whichever comes first, 4G LTE trial is included when the OnStar complimentary service is activated (OnStar's Basic Plan is included for five years). Click the "Fast Facts" icon below for more information. Press the OnStar Voice Command Button on the mirror or overhead console or, if available, select the "OnStar" icon on the radio home screen. Wait for the prompt and the beep and say, "Wi-Fi Settings." The screen will display the name and password for your Wi-Fi hotspot. Go to Settings on the device you want to connect and find the name of your vehicle's 4G LTE Wi-Fi connection. Select the hotspot and input the password. Then, connect. Press the blue OnStar button and speak to an Advisor to change your 4G LTE Wi-Fi name and/or password, or manage your settings in your RemoteLink mobile app.

Video: OnStar 4G LTE Wi-Fi

NEW FEATURES: INTELLILINK TEXT MESSAGE ALERTS (I04, I05, I06)

If your vehicle is paired with a Bluetooth device that supports Text Message Alerts, the system:

- **Can display incoming text messages**
- **Can play incoming text messages** over the audio system
- **Can respond to incoming texts with preset messages**
- **Requires a compatible smartphone** with Bluetooth profile (M.A.P.) **and applicable text messaging features**

For more information about varying capabilities, go to gmttotalconnect.com. For example, iPhones require unique setup requirements and offer limited Text Message Alert capabilities.

¹ Only on Yukon 2015 interim.

² See onstar.com for a detailed instruction guide, vehicle availability, details, and system limitations. Services and apps vary by make, model, year, carrier, availability, and conditions. 4G LTE service is available in select markets. 4G LTE performance is based on industry averages and vehicle systems design. Some services require a data plan.

How To Use Text Messaging

- Press "**Message**" button on Home Page
- When messages are retrieved, "**Text Message**" **inbox displays**
- Select message for viewing (**only available when vehicle is not moving**)
- Select "**Reply**" to reply and select desired message from display of preset messages, then select "Send" (this function is not available for iPhones) **incoming text messages**
- Pop-up screen displays: Select "Listen," "View," "Dismiss" or "Call". Turn off display alerts from the "Settings" button

Setting up Text Messaging during Phone Pairing

- **Android and BlackBerry** give you a pop-up right after you pair, asking whether you want to allow access to your messages
- **For iPhone**, you have to go into Settings, then Bluetooth, select your vehicle and turn on notifications

Notes for iPhone

Text messaging functionality with compatible iPhones is limited to Apple restrictions on what the radio can access, e.g., text messages received prior to entering the vehicle will not be displayed, and you cannot reply to a text message.

"Show Notifications" must be enabled on the phone to allow the radio to access messaging; to enable "Show Notifications," after pairing and connecting to the radio:

- On the phone, select "Settings," then "Bluetooth," then "Properties" (either device-friendly name such as "Sierra" or "Radio"), then turn "show Notifications" on
- Restart vehicle for connection to take hold
- Once set, it is retained for future connections

Visit gmttotalconnect.com for vehicle and smartphone compatibility.

NEW FEATURES: INTELLILINK

Video: Siri Eyes Free

SIRI EYES FREE FOR IPHONE USERS

Siri Eyes Free gives compatible iPhone users **hands-free access to some of their phone's features**, like the calendar and text messaging.

Siri Eyes Free allows users to direct Siri to perform a number of tasks while they safely keep their **eyes on the road and their hands on the wheel**. The Eyes Free mode enables users to interact with their iPhone using nothing more than their voice.

How to Use Siri Eyes Free

Owners simply **connect their iPhone with the radio via Bluetooth**, pair with the system, and **use the Push-to-Talk (PTT) button on the steering wheel** to begin and end sessions with Siri in Eyes Free mode.

Press and hold the PTT button long enough until Siri speaks; pressing and holding the PTT button for too short a period of time will engage the onboard voice recognition system and bypass Siri. Siri can:

- **Make voice-activated, hands-free calls** to contacts on their iPhone
- **Play songs in the iTunes library** and even switch music sources automatically from AM/ FM/XM radio to iPod mode
- **Listen to, compose and send an iMessage** or text message to a phone number or anyone in saved contacts
- **Access calendar** and add appointments
- **Answer simple questions** such as game scores or the dates of national holidays; while in eyes free mode, Siri will not provide answers to complex questions that require displaying a web page

¹ Only on Yukon 2015 interim.

BLUETOOTH DEVICES

PAIR UP TO 10 DEVICES ONLY ONE ACTIVE AT A TIME

Pairing using faceplate controls:

- Ensure **"Bluetooth"** feature of smartphone is on and devices are discoverable
- Select **"Phone"** icon with **"Menu"** knob
- Select **"Manage Phones"** with **"Menu"** knob
- Select **"Pair"** with **"Favorite/Softkey"** (the button just below **"Pair"**)
- Follow directions on the screen to begin pairing the device
- If PINs match, follow directions on the phone to complete the pairing process
- Screen confirms successful pairing process
- Phone may ask system permission to access phone book; if so, select **"Always permit access"**

As an alternative to pairing with the faceplate buttons, you can initiate pairing through voice recognition by using the **"Favorite/Softkey"** button just below the voice recognition icon. Once pressing the voice recognition key, say one of the following commands and follow the system prompts to complete the pairing process:

- **"Pair phone"**
- **"Pair"**
- **"Bluetooth"**

Video: Pair a Bluetooth Device

SWITCHING CONNECTED PHONES

- To connect to a different phone that's been paired to the system:
 - Select the **"Phone"** icon with **"Menu"** knob
 - Use the **"Menu"** knob to select **"Manage Phones"**
 - Use the **"Menu"** knob to highlight the phone to be connected
 - Press the **"Favorites/Softkey"** button just below the **"Connect"** button on the screen to connect to the highlighted device

¹ Only on Yukon 2015 interim.

**MAKE INTELLILINK YOUR OWN
WITH MORE WAYS TO CUSTOMIZE**

Choose the information you want to see in the **Driver Information Center** display and change what you see at any time using the **5-way controller on the steering wheel**.

Drag three to five of your most frequently used home screen icons into the app tray for easy access from any screen.

Favorite stations? Contacts? Destinations?² Songs? **Save up to 60 as favorites.**

¹ Only on Yukon 2015 interim.

² Requires optional IntelliLink with Navigation.

³ Requires Pandora account and connected Bluetooth device with Pandora app. Data rates apply.

PHONE, MEDIA AND STREAMING AUDIO ALL CONNECT THROUGH INTELLILINK

Take Control of Bluetooth Devices with IntelliLink

Pair up to **10 Bluetooth devices**. And with certain phones, **see a picture of the incoming caller**.

iPhones have full functionality with IntelliLink when connected via a USB cable. When **paired with IntelliLink via Bluetooth, you can make and receive calls on your iPhone**, see your phone book and control your iPhone through the radio. You can also stream audio and play Pandora², but to control media or streaming audio through IntelliLink, you must tether any Apple device.

Updated Radio and Media Functions

IntelliLink gives you a host of features that make playing music easier:

- MyMedia aggregates the music on multiple USB-connected devices. IntelliLink has multiple USB ports
- Pandora³ has been integrated into the system for one-click play
- iTunes tagging is offered for SiriusXM Radio
- You can Time Shift—record and play back—25 minutes of live radio

NATURAL VOICE OR FAMILIAR GESTURES PUT YOU IN CONTROL

Gestures

IntelliLink's touch screen is easy to navigate, because you can use gestures to control radio features.

Natural Language Voice Recognition

Natural language voice recognition allows you to **use everyday language to tell IntelliLink what you want to do.** You don't have to use specific keywords.

Natural voice **commands work for connected Bluetooth devices, contacts** listed in your connected phone's phone book, connected USB devices and the radio.

For example:

- "I want to call John Westin at work"
- "Take me home²"
- "I want to listen to the blues"
- "Play the White Album"
- "Play 'Born in the USA'"

¹ Only on Yukon 2015 interim.

² Requires optional IntelliLink with Navigation.

INTERACTING WITH INTELLILINK

Video: Customize the Home Page and App Tray

CUSTOMIZE THE HOME PAGE

Touching and holding an icon on the Home Page puts the page into edit mode, signified by the brackets around the icons. Then, you can:

- Drag the icons to a new position on the page
- Drag the icons to the right edge of the page and hold until they move to the next page
- Drag items into the app tray
- Drag items out of the app tray

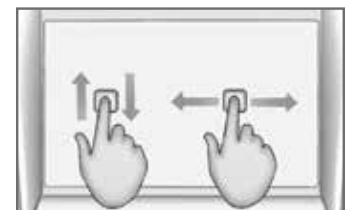

To exit edit mode, press the **“Home”** button.

USE GESTURES ON THE TOUCH SCREEN

To make it easier and faster to navigate through IntelliLink's screens, IntelliLink recognizes many gestures that will be familiar to users.

Gestures

- **Press** to select an icon or option, activate an application or change the location within a map¹
- **Press and hold** to start another gesture, move or delete an application
- **Drag** to move an application on the Home Page or to pan a map². To drag an item, you must first press and hold it, then you can drag it up, down, right or left to the new location

- **Swipe or fling** through a list to reveal more favorites, to pan a map quickly¹ or to change page views. To fling or swipe through a list, for example, place your finger on the screen then move it up or down rapidly

- To enhance touch screen operation:

- **Start on Home Page**
- **Press “Settings”**
- **Press “Display”**
- **Press “Calibrate”**
- Then follow the instructions on the screen

¹ Only on Yukon 2015 interim.

² Requires optional IntelliLink with Navigation.

INTERACTING WITH INTELLILINK

Video: Natural Language Voice Recognition

NATURAL LANGUAGE VOICE RECOGNITION

- Press the **“Push-to-Talk”** button on steering wheel one time to **initiate voice recognition** or press the **“Voice”** button on the touch screen
 - Listen for system response and beep
 - Then speak
 - Pressing the **“Voice”** button on the touch screen brings up some **suggested voice commands**, as does pressing the **“Push-to-Talk,”** waiting for the beep and saying, **“Help”**
 - Gracenote enables **natural voice commands** for music
 - You may ask IntelliLink to play music from USB-connected media by song title, album title, artist name or music genre
 - Natural language voice recognition allows you to speak normally to the system, without memorizing commands
 - **Voice commands cannot be used with Pandora**
 - Voice commands are only available in English
- For example:
- “I want to call John Westin at work”
 - “Take me home²”
 - “I want to listen to the blues”
 - “Play the White Album”
 - “Play Born in the USA”

¹ Only on Yukon 2015 interim.

Video: Pair a Bluetooth Device

PAIR UP TO 10 DEVICES ONLY ONE ACTIVE AT A TIME

Pair a Device

- Start with vehicle in **"Park,"** then **initiate pairing by one of two ways:**
 - Press the **"Phone" icon,** select **"Phones"** then, select **"Pair new device"**
 - Press the **"Push-to-Talk"** button on steering wheel, wait for system response and beep, then say **"Bluetooth"** or **"Pair Phone"**
- **PIN** appears
- **Start the pairing process** on phone
- Locate **"GMC IntelliLink"** on phone and match or enter PIN (depending on phone)
- The screen replies **"Device name has been successfully paired"**
- The phone may ask permission to allow system to access phone book. If a message requesting permission appears on your phone, simply confirm the request

LIST/CHANGE CONNECTED PHONE

- Press the **"Phone" icon**
- Select **"Phones"**
- Change **check mark** to phone you want connected
- You may pair up to 10 phones but only use one at a time

SWITCH TO HANDSET OR HANDS-FREE MODE

- Press the **"Phone" icon** during call to display **"Call View"**
- Press **"Handset"** to switch to handset mode

¹ Only on Yukon 2015 interim.

HOW TO USE NAVIGATION

Video: Enter a Destination

To use the **"Address" method**, enter the letters and the numbers on the alphanumeric keypad until all lines of the entry are complete or conduct a search by beginning to enter an address, an intersection, a highway or a freeway entrance ramp.

ENTER A DESTINATION

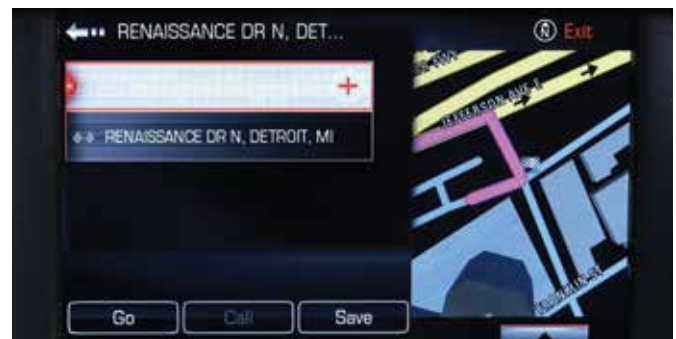

IntelliLink features multiple ways to enter a destination. First **press the "Navigation" icon**, then the **"Destination" icon on the map**. From there you can choose five methods:

- Voice Recognition
- Address
- Recent Destinations
- Contacts
- Places of Interest

Use the **"Places of Interest" method** to drill down to categories to begin a search of these destinations.

Press "Go" on the touch screen to begin route guidance.

HOW TO USE NAVIGATION

Video: Use Guidance and Maps

MAP GUIDANCE

When under route guidance, “ETA,” or **estimated time of arrival**, is displayed on the right side of the map view. Press the “ETA” information area to toggle between key destination information that includes:

- Estimated arrival time
- **Trip duration**
- **Driving distance**

Press the “**Turn List**” information area to display all the turns in the guided route.

TURN ON SEVERE WEATHER ALERT

This feature, which will send severe weather alerts to IntelliLink (within a 45-mile radius around the vehicle) is set to “off” from the factory. To turn it on:

- Select “**Weather**” on the Home Page
- Select “**Menu**,” then turn Advisories on as shown

To **suspend current route guidance**, press the “**Menu**” button and the “**Cancel Route**” option.

¹ Only on Yukon 2015 interim.

HOW TO USE NAVIGATION

USE NATURAL LANGUAGE VOICE RECOGNITION FOR NAVIGATION

Natural language voice recognition allows you to **tell IntelliLink where you want to go** in everyday language.

To use voice recognition from the steering wheel controls, press the "Push-to-Talk" button, listen for the system response and the beep, then speak one of the commands—**"Destination Address,"** or **"Destination Places of Interest,"** or **"Destination Contact"**—to begin a dialogue with the system.

Then, speak to the system using natural language:

- Address: "I want to go to 300 Renaissance Center"
- POI: "Find a gas station"
- Contact: "Take me to Peter Mitchell's house"

ADDITIONAL FEATURES WITH A SUBSCRIPTION TO SIRIUSXM TRAVEL LINK

- **Weather icon:** With a subscription to **SiriusXM Travel Link**, access to daily and extended forecasts

- **SiriusXM Travel Link** also gives you access to fuel prices and movie listings integrated into Places of Interest categories/destination method

ONSTAR TURN-BY-TURN NAVIGATION

An OnStar subscriber has the ability to connect to the OnStar system and ask an OnStar Advisor to download a destination into the system. OnStar will send address information and location coordinates of the destination into IntelliLink's navigation system.

¹ Only on Yukon 2015 interim.

NEW FEATURES HELP KEEP CUSTOMERS CONNECTED

ONSTAR 4G LTE WI-FI¹ MAKES YOUR VEHICLE A ROLLING HOTSPOT

Your vehicle can be a rolling mobile hub with great signal quality and bandwidth for up to seven devices. OnStar with 4G LTE service allows everyone in your vehicle to enjoy his or her own content. A three-month/3GB, whichever comes first, trial is included when the OnStar complimentary service is activated (OnStar's Basic Plan is included for five years). Click on the "Fast Facts" icon below for more information. Press the OnStar Voice Command Button on the mirror or overhead console or, if available, select the "OnStar" icon on the radio home screen. Wait for the prompt and the beep and say, "Wi-Fi Settings." The screen will display the name and password for your Wi-Fi hotspot. Go to Settings on the device you want to connect and find the name of your vehicle's 4G LTE Wi-Fi connection. Select the hotspot and input the password. Then, connect. Press the blue OnStar button and speak to an Advisor to change your 4G LTE Wi-Fi name and/or password, or manage your settings in your RemoteLink mobile app.

Video: OnStar 4G LTE Wi-Fi

INTELLILINK OFFERS TEXT MESSAGE ALERTS

If your Terrain with IntelliLink is paired with a Bluetooth device that supports Text Message Alerts, the system:

- **Can display incoming text messages**
- **Can play incoming text messages** over the audio system
- **Can respond to incoming texts with preset messages**
- **Requires a compatible smartphone** with Bluetooth profile (M.A.P.) **and applicable text messaging features.** For more information about varying capabilities, go to gmttotalconnect.com. For example, iPhones require unique setup requirements and offer limited Text Message Alert capabilities

Video: Text Message Alerts

HOW TO USE TEXT MESSAGING

- Press **"Message"** button on Home Page
- When messages are retrieved, **"Text Message" inbox displays**
- Select message for viewing (**only available when vehicle is not moving**)
- Select **"Reply"** to reply and select desired message from display of preset messages, then select "Send" (this function is not available for iPhones)
- **Incoming text messages**
 - Pop-up screen displays
 - Select "Listen," "View," "Dismiss" or "Call"
 - Turn off display alerts from the "Settings" button

SETTING UP TEXT MESSAGING DURING PHONE PAIRING

- **Android and BlackBerry** give you a pop-up right after you pair, asking whether you want to allow access to your messages
- **For iPhone** you have to go into Settings, then Bluetooth, select your vehicle and turn on notifications
- **Notes for iPhone**
 - Text messaging functionality with compatible iPhones is limited to Apple restrictions on what the radio can access, e.g., text messages received prior to entering the vehicle will not be displayed, and you cannot reply to a text message
 - "Show Notifications" must be enabled on the phone to allow the radio to access messaging; this can be enabled by the following steps (after pairing and connecting to the radio):
 - On the phone, select Settings, then Bluetooth, then properties (either device-friendly name such as "GMC Terrain" or "Radio"), then turn on "Show Notifications"
 - Restart vehicle for connection to take hold
 - Once set, it is retained for future connections
- **Visit gmttotalconnect.com for vehicle and smartphone compatibility**

SIRI EYES FREE FOR IPHONE USERS

Siri Eyes Free gives **compatible iPhone users hands-free access to some of their phone's features**, like the **calendar** and **text messaging**.

Siri Eyes Free allows users to direct Siri to perform a number of tasks while they safely keep their eyes on the road and their hands on the wheel. To further minimize distraction, Siri takes hands-free functionality even further with an **Eyes Free mode** that enables users to **interact with their iPhone using nothing more than their voice** while keeping the device's screen from lighting up, one more potential distraction that Siri Eyes Free eliminates.

HOW TO USE SIRI EYES FREE

Owners simply **connect their iPhone** with the IntelliLink radio via Bluetooth, pair with the system, and use the Push-to-Talk (PTT) button on the steering wheel controls to begin and end sessions with Siri in Eyes Free mode. Press and hold the PTT button long enough until Siri speaks; pressing and holding the PTT button for too short a period of time will engage the onboard voice recognition system and bypass Siri. Siri can:

- Make voice-activated, **hands-free calls to contacts on their iPhone**
- **Play songs in the iTunes library** and even switch music sources automatically from AM/FM/XM radio to iPod mode
- **Listen to, compose and send an iMessage or text message** to a phone number or anyone in saved Contacts
- **Access calendar and add appointments**
- **Answer simple questions** such as game scores or the dates of national holidays; while in Eyes Free mode, Siri will not provide answers to complex questions that require displaying a web page

FEATURES ADD VALUE FOR CUSTOMERS

Acadia customers enjoy their IntelliLink radios even more with the ability to receive text messages and **enhance the radio's personalization** with SiriusXM TuneSelect.

ACADIA GETS NEW HANDS-FREE FEATURE

Siri Eyes Free for iPhone Users

Siri Eyes Free gives compatible iPhone users **hands-free access to some of their phone's features**, like the calendar and text messaging.

Siri Eyes Free allows users to direct Siri to perform a number of tasks while they safely keep their **eyes on the road and their hands on the wheel**. The Eyes Free mode enables users to interact with their iPhone using nothing more than their voice. And it **keeps the device's screen from lighting up**, one more potential distraction that Siri Eyes Free eliminates.

How to Use Siri Eyes Free

Owners simply **connect their iPhone with the radio via Bluetooth**, pair with the system, and **use the Push-to-Talk (PTT) button on the steering wheel** to begin and end sessions with Siri in Eyes Free mode.

Press and hold the PTT button long enough until Siri speaks; pressing and holding the PTT button for too short a period of time will engage the onboard voice recognition system and bypass Siri. Siri can:

- **Make voice-activated, hands-free calls** to contacts on their iPhone
- **Play songs in the iTunes library** and even switch music sources automatically from AM/ FM/XM radio to iPod mode
- **Listen to, compose and send an iMessage** or text message to a phone number or anyone in saved contacts
- **Access calendar** and add appointments
- **Answer simple questions** such as game scores or the dates of national holidays; while in eyes free mode, Siri will not provide answers to complex questions that require displaying a web page

INTELLILINK OFFERS TEXT MESSAGE ALERTS

If your Acadia with IntelliLink is paired with a Bluetooth device that supports Text Message Alerts, the system:

- **Can display incoming text messages**
- **Can play incoming text messages** over the audio system
- **Can respond to incoming texts with preset messages**
- **Requires a compatible smartphone** with Bluetooth profile (M.A.P.) **and applicable text messaging features**. For more information about varying capabilities, go to gmttotalconnect.com. For example, iPhones require unique setup requirements and offer limited Text Message Alert capabilities

HOW TO USE TEXT MESSAGING

- Press **"Message"** button on Home Page
- When messages are retrieved, **"Text Message" inbox displays**
- **Select message for viewing** (only available when vehicle is not moving)
- Select **"Reply"** to reply and select desired message from display of preset messages, then select "Send" (this function is not available for iPhones)
- **Incoming text messages**
 - Pop-up screen displays
 - Select "Listen," "Play" or "View"
 - Turn off display alerts from the "Settings" button
