

2013+ Nissan Altima Radio Removal Nissan Connect Factory Radio Upgrade

Dash Disassembly

1. Unclip the right side of the driver's knee bolster panel next to the center console and let hang. (Figure A)

Note: There is no need to completely remove the panel.

2. Unclip and remove the (2) silver side trim panels from each side of the factory radio. (Figure B)
3. Unclip and remove the trim panel below the climate control panel.
4. Remove the (4) Phillips screws securing the climate control panel and a/c vent panel. (Figure C)

(Figure A)

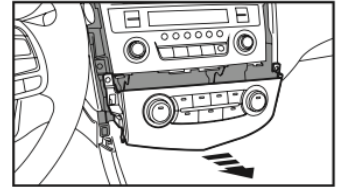

(Figure B)

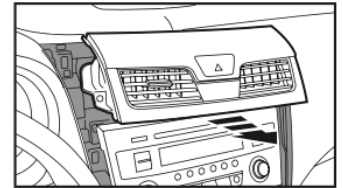

(Figure C)

5. Remove the climate control panel. (Figure D)
6. Remove the a/c vent panel. (Figure E)
7. Remove the (4) Phillips screws securing the radio, and then remove. (Figure F)
8. If equipped with automatic climate controls, remove the (2) Phillips screws securing the climate module under the radio. This module will be reused in Kit Assembly.
