

Bluewater Cleone
Pure, clean water
for your family

Bluewater Cleone™

Pure water for a healthier family

Functional and convenient
Bluewater Cleone can be installed to work with most home appliances.

The Bluewater Cleone™ works as great as it looks. A high-performance classic, the Cleone takes water purification for families to the next level. Whether it's removing chlorine or chemical and biological contaminants, the reverse osmosis water purifier can be trusted to help deliver cleaner, healthier water.

Easy to install. Easy to maintain.

Anyone with basic do-it-yourself skills should be able to install Bluewater Cleone. But we also suggest using a professional plumber. Four color-coded water connectors on the side of the water purifier make it easy to connect the rings and tubing correctly. You can expect cleaner, healthier water on a problem-free basis from your Bluewater Cleone. It is designed to do all the purification work and filter-change thinking for you. Engineered for minimal maintenance, filter replacement is hassle-free.

The "tank"

In Italy, users have dubbed Bluewater Cleone "the tank" because it never breaks down as it works 24/7 to deliver pristine drinking water. With easy to replace water filters that need changing approximately every six months, depending on water quality, Bluewater Cleone embodies our philosophy that there is no substitute for excellence when it comes to helping to protect human health and well-being.

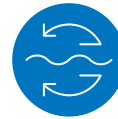

Reverse Osmosis
Reverse osmosis is widely regarded as the most efficient means to achieve pristine water quality.

High flow
The Bluewater Cleone delivers up to 50 gallons / 189 liters of purified water every day or 2.08 gallons per hour.

Contaminant removal
93-99% removal of most water-borne contaminants that can threaten health or taste such as lead, copper, cysts and nitrates.

Recovery
The Bluewater Cleone recovers around 25% of the inlet water being purified and has an onboard booster pump to help maintain optimum water purification.

Cooking
Great for cooking. The Bluewater Cleone removes practically all the impurities that can impact food quality.

Installation
The Bluewater Cleone is easy to install by anyone with basic plumbing skills and changing the filter is simple.

Long-life membrane
Our patented design dramatically extends the life of the membrane filter beyond all competing products.

Balance (Cleone Balance)
Enhance the taste of the water by adding minerals.

Beautiful design
The Bluewater Cleone is designed to fit into the style of your kitchen.

Inlet low feed pressure switch
Automatically turns off unit in case of water pressure loss.

Leak detection and shutoff switch
Detects leaks and shuts off unit automatically.

Fully enclosed
Sleek and stylish – looks as great as it works.

Filter monitor
Monitors and alerts you when filters need to be replaced.

Purified water quality monitor
Monitors quality of water and alerts you when quality is low.

Models available

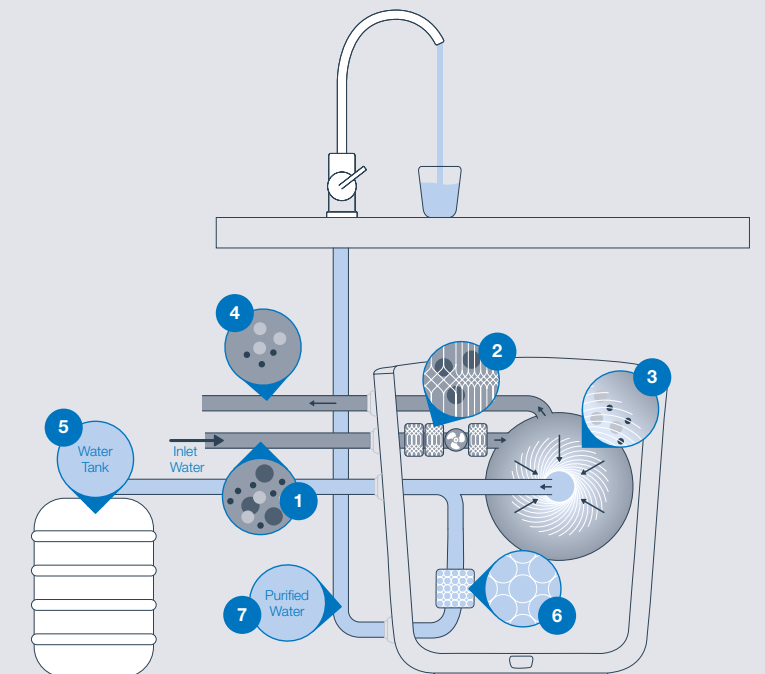

- Bluewater Cleone Classic – 5 stage reverse osmosis system.
- Bluewater Cleone Balance – 5 stage reverse osmosis system with a remineralization filter.

Inlet feed booster pump
Maintains constant feed pressure for consistent rejection and recovery rates.

Membrane flush valve
Performs periodic flush of filter membrane to maintain optimal flow rate and filter life.

Our purification process

1. Unfiltered water enters the Bluewater Cleone via the inlet water line.
2. Three Bluewater pre-filters (two sediment filters and one activated carbon filter) remove larger contaminants.
3. Bluewater's superior membrane removes the tiniest contaminants down to 0.0001 micron in size (that is 400 times smaller than the smallest virus).
4. Harmful contaminants are flushed out with the outlet water.
5. Bluewater helps ensure premium water pressure by storing the contaminant-free water in a tank.
6. Bluewater's activated carbon post-filter helps ensure the water tastes and smells as pure as nature intended. A Bluewater Mineral filter is also available as an option.
7. The Bluewater Cleone delivers crystal clean, healthier and great tasting drinking water directly out of your tap.

Bluewater believes everyone has the right to drink water as clean as nature intended. That is why our technology is designed to deliver water for residential and commercial drinking, cooking, washing and other purposes that is free of bacteria, toxic metals, pharmaceutical and chemical residues, and many other contaminants. Bluewater harnesses patented technology to deliver enhanced water quality in a world where tap water taste and safety can no longer be taken for granted. Create your own source of pure, fresh, premium water with Bluewater.

Trust is won by consistently meeting your expectations.

Bluewater has earned the trust and respect of homeowners and businesses in the United States, China and Europe for its ability to safely and reliably remove waterborne contaminants. Backed by world-leading quality certifications like the WQA Gold Seal, Bluewater is the water purifier of choice for people who want the best in pure water on demand.

The Gold Seal Trademark from the United States Water Quality Association (WQA) is an industry standard that certifies water treatment products have been tested to meet industry standards. It ensures that a product is made from safe materials, that the claims listed on the packaging are backed by test data, and the product will hold up under normal usage conditions.
