

Your first step to clean air

Protect your loved ones from allergens and toxins. Work in peace and breathe with ease knowing the air around you is safe and healthy with uHoo - the world's most advanced indoor air sensor.

What affects your air?

The air we breathe indoors can be up to five times worse than outdoors. Unvented cooking, harmful appliances, your car idle in the garage, and even the number of people inside a room greatly affect the quality of our indoor air.

Know what you breathe

Create a healthier home and develop better habits

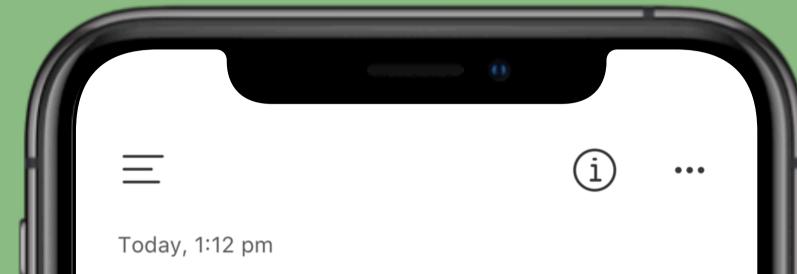

- \checkmark Monitor each room in your home
- Get alerts and customize notifications
- Understand how your habits affect your air and your health
- Control your purifier, thermostat,
 ventilation and other smart
 appliances via IFTTT

Monitors 9 Parameters

The most comprehensive solution in the market

Temperature Feel more comfortable and have a <u>restful sleep</u>

 \bigcirc

Relative Humidity

Minimize moisture and prevent mold from forming

Carbon Dioxide

Feel less nauseous

and have a clearer

Chemicals (VOCs)

products to keep out

Dust (PM2.5) Prevent dust buildup before allergies and infections occur

Nitrogen Dioxide Learn when to keep roadside fumes from entering

Carbon Monoxide Avoid fatigue, chest pain and air poisoning

Ozone

Know which

chemicals or

mind

Relieve throat irritation and health effects of gadgets
