# How to use the Tuya APP

1. Make sure your phone is connected to WIFI (not your phone data)
2. The WIFI icon on the air purifier should be flicking.
If not, hold the WIFI button for 5 seconds to activate the WIFI connection.

## Step 1:

Download and register your Tuya account.
Agree to the terms & conditions

## Step 2:

Add your air purifier to your APP
**Option 1:** Your smart phone bluetooth is on.
**Option 2:** Your smart phone bluetooth is off.

# Option 1: Your smart phone bluetooth is on

When you add the air purifier, the device will appear by itself. Click **Go to add** and select the device. Enter your WIFI password that your phone is connected to.

Cyclo UV 310

Device added successfully

Done

**Option 2: Your smart phone bluetooth is off**
Select Add Device and choose Small Home Appliance - select Air Purifier
Enter your WIFI password which your phone is connected to.
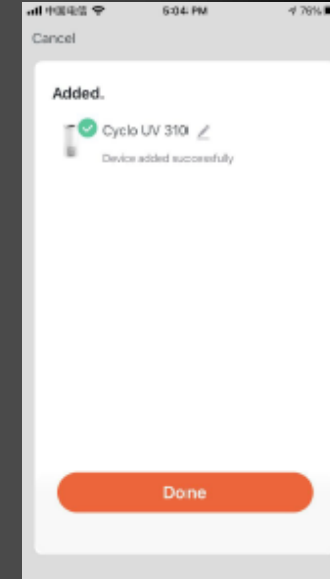

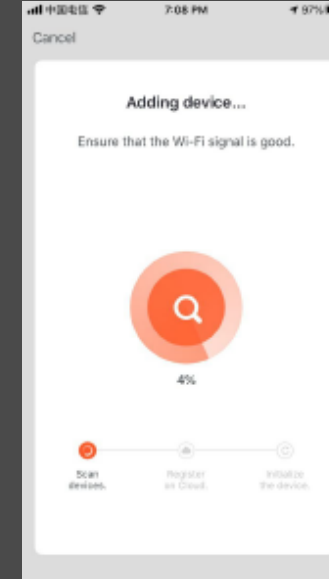

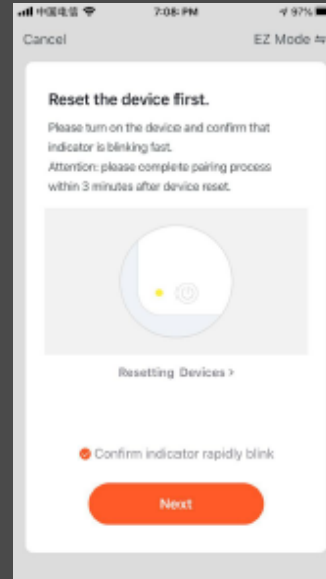

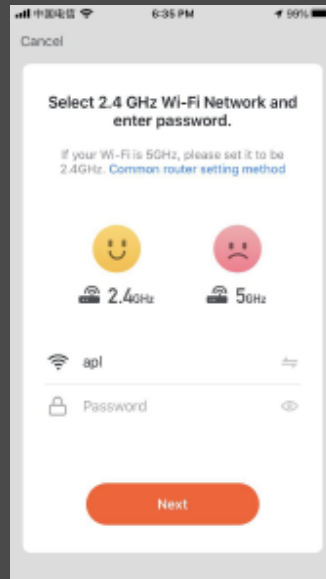

## Step 4: Control the device via APP

The air purifier that you added will show in your Tuya
APP. You can control
the air purifier via your phone from any where, just
make sure your phone is connected and the air purifier
is
connected to your WIFI.
If the WIFI changes you will need to reconnect the
device.
