H02037
TABLET GRIPPER

0.85 KG **1.9** LB
MAX LOAD

*Tethering your tablet is easier than ever, eliminating the need for a permanent or semi-permanent connection point. The GRIPPS® Tablet Gripper, when paired with a load-rated tether, utilises purpose-built silicon to provide a secure tethering solution without impacting device functionality.*

Unlike traditional methods that involve applying strong adhesives directly to your mobile device, which can damage its finish upon removal, the GRIPPS® Tablet Gripper offers a flexible design. This design enables you to tether your mobile device "on-demand," granting you the freedom to use your device without constraints when working at height.
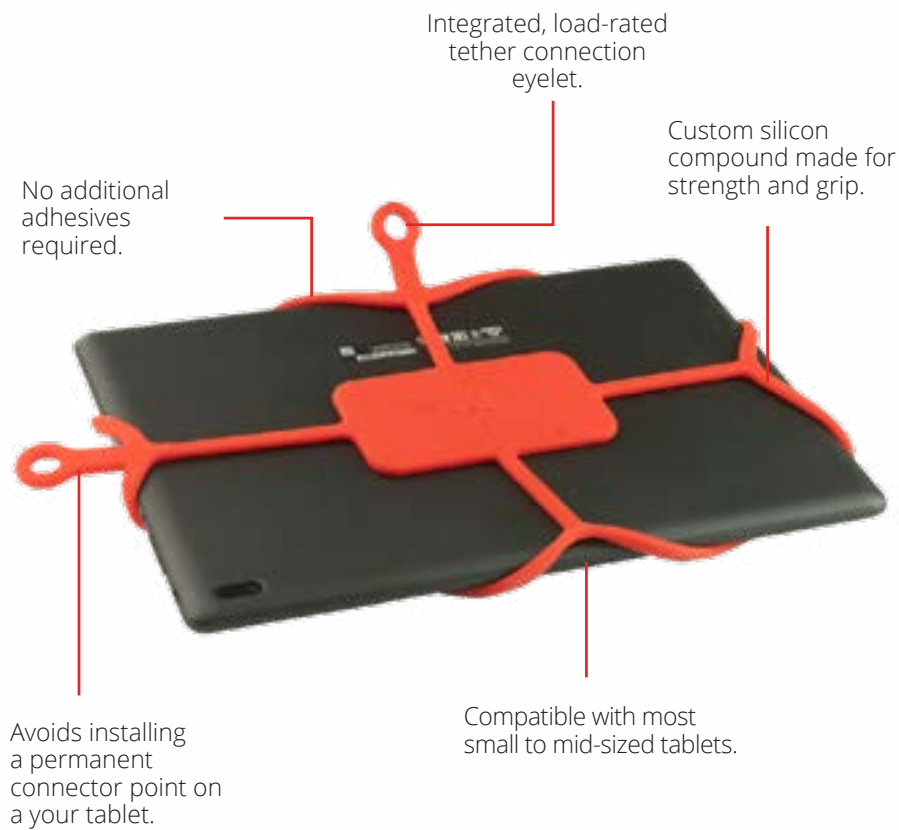

*For version with tether, order H02037P.

KEY FEATURES

Integrated, load-rated tether connection eyelet.

Custom silicon compound made for strength and grip.

No additional adhesives required.

Avoids installing a permanent connector point on a your tablet.
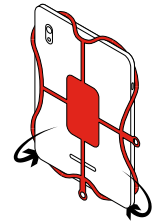

Compatible with most small to mid-sized tablets.

HOW TO USE

1

Pull all four corners of Tablet Gripper endings over the corners of your tablet to the front side. Ensure all corners are firmly applied and Tablet Gripper has a snug fit.

2

Attach a tether, such as GRIPPS® Coil Tether Single-Action - 0.75kg / 1.65lb to the eyelet holes provided. Firmly pull on tether to check for a secure hold and then anchor opposite end of tether as required.
