

An aerial, black and white photograph of an industrial facility, likely a refinery or chemical plant. In the upper left, a large ship with a prominent white spherical tank is docked at a pier. The facility below features a complex network of pipes, walkways, and several large cylindrical storage tanks. The overall scene is industrial and detailed.

OUR STORY

Since its inception, GRIPPS® has been dedicated to eliminating critical risks and saving worker's lives, through the implementation of innovative tool tethering and falling object prevention solutions.

As the leader in tool tethering and falling object prevention, we work closely with partners across a wide range of sectors, engineering solutions that ensure their workforce safely returns home after each shift.

Designed and built for the harshest environments, offering superior safety, durability, practicality and functionality, the GRIPPS® range of products helps thousands of workers, globally, every day.

GRIPPS® has become well-known for delivering long-lasting, premium quality, innovative height safety equipment to customers worldwide.

We pride ourselves in the relationships we build with our customers and always guarantee complete satisfaction and trust in the GRIPPS® range of products.

OUR MISSION

ELIMINATING CRITICAL RISKS & SAVING WORKERS' LIVES.

INDUSTRY INNOVATORS

COLLABORATION

The GRIPPS® Industry Innovators program was created to enhance our relationship with customers.

Made up of trusted trade professionals, this group provides invaluable input on every new product prior to its market release.

Emphasising innovation, functionality, and practicality, GRIPPS® has forged partnerships within industry to develop a diverse range of long-lasting, premium quality, and innovative height safety solutions.

INNOVATION

The GRIPPS® product range undergoes continuous development - some products are entirely new engineered solutions, while others undergo updates.

Whether it's a revolutionary innovation or an evolutionary improvement, our focus always begins with the customer.

Through collaborative efforts, we strive to mitigate critical risks and ultimately save workers' lives.

CONQUER GRAVITY TOGETHER

Work confidently at heights, assured that your tools are securely tethered with world-leading equipment from GRIPPS®.

Engineered for the most demanding environments, GRIPPS® products excel in safety, durability, and practicality.

Our commitment to understanding the needs of those working at heights guarantees that our range of products is uniquely tailored to at-height tasks and can be seamlessly integrated into projects worldwide.

TOOL TETHERING AND FALLING OBJECT PREVENTION TRAINING

Whether you're managing a small team or overseeing several hundred workers, GRIPPS® offers the flexibility and resources necessary to ensure your workforce is well-trained in essential tool tethering and drop prevention safety measures.

Our course is designed to provide workers with an understanding of the potentially life-threatening risks associated with dropped objects, along with effective strategies to mitigate these dangers on worksites. Suitable for beginners without prior experience in tool tethering, our course equips your workforce with firsthand knowledge of industry-leading practices for tool tethering safety.

MODULES

MODULE 1

Dropped object risk awareness

MODULE 4

Tool tethering using the GRIPPS® CATT methodology

MODULE 2

Dropped object risk assessment and the hierarchy of controls

MODULE 5

The GRIPPS® product range and correct use

MODULE 3

Working with tools at height

PACKAGES

GRIPPS® RESOURCES

GRIPPS® offers an extensive range of resources tailored to ensure your workforce receives thorough training in essential tool tethering and drop prevention safety practices. Our selection of posters, videos, brochures, and guides serves as invaluable tools for equipping your team with the necessary knowledge and resources concerning tool tethering and falling object prevention. Developed with safety and practicality as top priorities, our resources seamlessly integrate into an effective tool tethering and falling object prevention strategy.

PREVENTION GUIDES

AUDITS

The GRIPPS® onsite audit plays a crucial role in the risk assessment process for tasks performed at height, enabling you to proactively identify and mitigate potential hazards before they escalate into incidents. Our team of certified auditors will personally visit your worksite to evaluate all height-related operations, delivering a detailed report that outlines identified risks and offers effective solutions.

Reach out to enquire about GRIPPS® worksite audits, offering your team access to professional and comprehensive external support.

WORKSHOPS

The initial phase of an effective Falling Object Prevention Strategy involves raising awareness of the hazards linked with working at height. Whether through a toolbox talk, a lunchroom presentation, or a live demonstration on falling objects, we are equipped to assist you in fostering awareness and fostering behavioral change.

Make a lasting impact with a keynote address delivered by Paul Weatherson, a survivor of a falling object incident and a brand ambassador, who offers firsthand insights into the human toll of such accidents.

CATT METHODOLOGY

The GRIPPS® CATT Methodology is an effective system for ensuring safe tool tethering. The acronym stands for **CONNECT, ANCHOR, TETHER, and TRANSPORT**, providing a framework for proper implementation.

It is important to not only buy the correct and safe equipment for you or your workers, but also ensure that everybody working at height comprehends the best practices for drop prevention. The CATT Methodology, widely acknowledged, offers a straightforward approach to tool tethering that can be utilised by any worker.

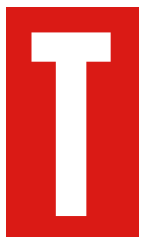

CONNECT

Attach a connection point to your tool that matches the appropriate load rating and is suitable for both the task at hand and your work environment.

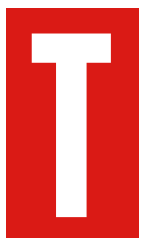

ANCHOR

Identify the anchor point suitable for the weight of your tool that will be securely fastened. Consider options such as a load-rated work belt, wrist anchor, or tool bag. Alternatively, use the structure or equipment in use, provided it offers a suitable anchor point.

TETHER

Choose a tether with an appropriate load rating, length, and suitability for the task at hand.

TRANSPORT

Identify the methods for transporting your tools and equipment throughout the project. Keep in mind that nearly one-third of tool-related accidents happen during transportation between work areas. Utilising certified tool bags and pouches is important for minimising the risk of dropped tools on site.

CONNECT ▶ ANCHOR ▶ TETHER ▶ TRANSPORT

H05086 GRIPPS® Tool Tether Process Poster

WHAT IS ANSI/ISEA 121-2018 COMPLIANCE?

ANSI/ISEA
121-2018
COMPLIANT

The ANSI/ISEA 121-2018 standard outlines essential criteria for **“minimum design, performance, and labeling requirements for solutions aimed at reducing incidents involving dropped objects in industrial and occupational environments.”**

Developed by the International Safety Equipment Association (ISEA), an ANSI-accredited standards development organisation, the U.S. national standard ANSI/ISEA 121-2018 is overseen by the American National Standards Institute (ANSI), which manages standards and conformity assessment activities within the United States.

Choosing products that conform to the ANSI/ISEA 121-2018 standard enhances confidence in product performance when working at heights, compared to those lacking this standard.

At GRIPPS® we strongly advocate selecting products that adhere to this widely recognised standard whenever feasible. We follow a rigorous testing and quality assurance/control protocol, and where applicable, ensure our products are ANSI/ISEA 121-2018 compliant.

This standard establishes minimum requirements concerning anchor attachments, tool attachments, tool tethers, and containers utilised to prevent dropped objects in the workplace.

TOOL CONNECTORS

TOOL RING

- Quick, easy installation not requiring any special tools or equipment.
- Long lasting and economical.
- Available in three sizes.

SKU	QTY	MAX LOAD	SIZES
H01036	10	1 kg 2.2 lb	19 mm 0.75 in
H01037	10	1 kg 2.2 lb	25 mm 1.0 in
H01038	10	1 kg 2.2 lb	38 mm 1.5 in

SCREWLOCK CABLE

- Easy screwlock attachment process that can be performed onsite.
- Long lasting PU-coated aircraft-grade steel cable.
- Can be locked permanently using thread locking compounds.

SKU	QTY	MAX LOAD	SIZES
H01030-5	5	1 kg 2.2 lb	3 mm x 120 mm 0.1 in x 4.75 in
H01030-10	10	1 kg 2.2 lb	3 mm x 120 mm 0.1 in x 4.75 in

H01005 / H01006

ANSI/ISEA 121-2018 COMPLIANT

TOOL CATCH – NON CONDUCTIVE

- Robust Nylon connector with poly D-ring.
- Easy installation process that can be done onsite.
- Ideal for use with non-conductive tools.
- Fully certified and load-rated when used with GRIPPS® V-Gripp Tape.

SKU	QTY	MAX LOAD	SIZES
H01007-10	10	1 kg 2.2 lb	12 mm x 55 mm 0.4 in x 2.1 in

H01007-10

ANSI/ISEA 121-2018 COMPLIANT

V-GRIPP TAPE

- Self-fusing tape that provides a load-rated tool connection point when used with GRIPPS® Tool Catches and GRIPPS® Tool Hitches.
- Heat resistant to 150°C / 302°F.
- Resistant to water and oil.
- Resilient and long-lasting.

SKU	QTY	LENGTH	WIDTH
H01010	1	2.7 m 8 ft 10 in	25 mm 1.0 in

H01010

ANSI/ISEA 121-2018 COMPLIANT

V-GRIPP TAPE & TOOL CATCH KIT

- Creates resilient and long-lasting tool connection points.
- Applicable for a wide range of hand tools such as pliers, wrenches and spanners.
- Includes GRIPPS® unique V-Gripp Tape, which is resistant to water and oil.
- Does not require additional adhesives due to self-vulcanising V-Gripp Tape.

SKU	QTY	PART	COMPONENTS	MAX LOAD
H01417	1	H01005	3 x Tool Catch - 25mm x 90mm / 1"x 3.5"	1 kg 2.2 lb
		H01006	3 x Tool Catch - 12mm x 55mm / 0.5" x 2.25"	
		H01010	V-Gripp Tape	

H01417

ANSI/ISEA 121-2018 COMPLIANT

GRIPP SHRINK

- Provides additional protection for GRIPPS® V-Gripp Tape.
- Quickly shrinks and protects when exposed to heat.
- Resistant to abrasives.

SKU	QTY	SIZES
H03000	25	20 mm x 50 mm 0.7 in x 1.9 in

H03005	10	50 mm x 100 mm 2 in x 3.9 in

H03000 - H03005

SWIVEL CATCH

- Connects to tools with an existing hang-hole or slot or closed handle.
- The steel connector ring includes a swivel point, providing a full 360-degree range of movement.

SKU	QTY	MAX LOAD	LENGTH
H01021-5	5	2.5 kg 5.5 lb	13 cm 5 in
H01021-10	10	2.5 kg 5.5 lb	13 cm 5 in

H01021

ANSI/ISEA 121-2018 COMPLIANT

TOOL HITCH - 16KG / 35LB

- Fast and simple application to tools with an enclosed area.
- Chokes around the enclosed handle of tools weighing up to 16kg / 35lb.
- No need for additional adhesives or equipment.
- Tactical-grade Nylon for maximum strength.

SKU	QTY	MAX LOAD	LENGTH	MAX TETHER LENGTH
H01055	1	16 kg 35 lb	41 cm 16.14 in	1.8 m 71 in

H01055

ANSI/ISEA 121-2018 COMPLIANT

SINGLE-ARM TOOL HITCH - 16KG / 35LB

- Ideally suited to power tools with a trigger on the handle.
- Chokes around the handle of larger tools weighing up to 16kg / 35lb.
- GRIPPS® V-Gripp Tape is used to secure the 'single-arm' in way that does not interfere with the tool trigger.
- Tactical-grade Nylon for maximum strength.

SKU	QTY	MAX LOAD	LENGTH	MAX TETHER LENGTH
H01056	1	16 kg 35 lb	41 cm 16.14 in	1.8 m 71 in

H01056

ANSI/ISEA 121-2018 COMPLIANT

DUAL-ARM TOOL HITCH 16KG / 35LB

- Creates a load-rated tool connection point for heavy 'open' tools.
- Tactical-grade Nylon for maximum strength.
- Heavy-duty closed metal D-ring.

SKU	QTY	MAX LOAD	LENGTH	MAX TETHER LENGTH
H01057	1	16 kg 35 lb	41 cm 16.1 in	1.8 m 71 in

H01057

DUAL-ARM TOOL HITCH - 32KG / 71LB

- Creates a load-rated tool connection point for heavy 'open' tools up to 32kg / 71lb.
- Tactical-grade Nylon for maximum strength.
- Heavy-duty closed metal D-ring.

SKU	QTY	MAX LOAD	LENGTH	MAX TETHER LENGTH

WORLD'S FIRST TETHER-READY GLOVES

Leaders in drop prevention, GRIPPS® were the first to market with innovative industrial safety gloves, which include in-built anchor points for tool tethering. This adds greater flexibility and major convenience for those working at heights operating with small hand tools.

GRIPPS® glove range boasts many great features listed below. For further information about samples and options, contact GRIPPS® directly or your nearest distributor. For a list of distributors, visit grippsglobal.com/pages/store-locator

KEY FEATURES:

- ✓ **IN-BUILT TETHER ANCHOR**
- ✓ **ANSI/ISEA 121-2018 COMPLIANT**
- ✓ **ANSI A3/A5 CUT RATED**
- ✓ **EXCEPTIONAL COMFORT**
- ✓ **SUPERIOR DEXTERITY**
- ✓ **DURABLE FINISH**

GLOVE STANDARDS

EUROPEAN GLOVE STANDARDS - EN388:2016+A1:2018

The European Standard EN 388:2016+A1:2018 sets forth requirements for labelling safety gloves designed to mitigate mechanical risks in various work environments. It details specific testing methodologies that must be successfully completed prior to gloves being marketed within Europe. Widely acknowledged worldwide, this standard serves as a crucial benchmark for evaluating gloves and assessing their suitability across diverse working conditions.

Key stressors assessed under this standard include abrasion resistance, cut resistance, tear resistance, puncture resistance, cut resistance by ISO cut test and impact protection.

AMERICAN GLOVE STANDARDS - ANSI 105-2016

ANSI/ISEA 105-2016 outlines the classification and testing criteria for hand protection, specifically tailored for chemical and industrial applications. Hand protection includes gloves, mittens, partial gloves, or similar items designed to shield the hand or a part thereof against specific hazards.

This American National Standard establishes performance benchmarks for mechanical protection (cut-resistance, puncture resistance, and abrasion resistance), chemical protection (permeation resistance, degradation), and additional performance attributes such as ignition resistance and vibration reduction, all assessed through standardized test methodologies.

The standard does not address protection from electric shock, ionising or non-ionising radiation, every type of thermal exposure and harmful temperature extreme, and every type of exposure to chemicals, biological agents, or other hazardous substances. ANSI/ISEA 105-2016 also does not address protection for welding, emergency response applications, or fire fighter applications.

AUSTRALIAN AND NEW ZEALAND STANDARD - AS/NZS 2161.3:2020

AS/NZS 2161.3:2020, Occupational Protective Gloves - Part 3: Protection against Mechanical Risks is a safety standard applicable to Australia and New Zealand concerning hand protection in occupational settings. Issued in December 2020 it aligns with the European standard EN388:2016+A1:2018, and incorporates two additional tests introduced that year. The primary aim of this standard is to define the requirements, testing procedures, labelling, and information provision for protective gloves in the workplace.

While AS/NZS 2161.3:2020 is not legally mandated by the government in Australia, it serves as the industry benchmark for high-quality hand protection and sets performance standards within this domain.

C5 FLEXILITE MKII

S21625

- Improved flexibility and overall user comfort, allowing full usability of tools.
- Super lightweight HPPE knit liner provides maximum cut resistance.
- Double-coated sandy foam nitrile for long-lasting grip.
- A load-rated tether anchor everywhere you go.
- Compatible with GRIPPS® wrist tethers.

TRANSPORT & STORAGE

MULE BAG - 80KG/176LB

H01140

The champion of the GRIPPS® lifting bag range, the GRIPPS® Mule Bag provides a broad range of transportation and work-site mounting options. The tough design, with multiple reinforcement points, makes it one of the strongest lifting bags on the global market, purpose-built to operate and last in the harshest of workplace environments.

- Width compatible with standard ladder cages.
- Reinforced backpack straps, EWP mounting straps and load-rated lifting points.
- Strong composite insert in the base of the bag protects against punctures.
- Armoured insert for protection when wearing as a backpack.
- Load-rated heavy-tool sleeves on both sides of the bag.
- Tether points inside and outside the bag for multiple tethering options.
- Multiple compartments inside the bag for tool storage and organisation.
- Dry document storage pocket.
- Unique Serial number for product identification.
- Business card holder.

MULE TOOL BACKPACK - 20KG/44LB

H01141

The GRIPPS® Mule Tool Backpack, ideally suited to tool technicians working at heights, has been upgraded and now meets ANSI/ISEA 121-2018 standards. This certification enhances its standing as a reliable and robust tool backpack. The key feature of the GRIPPS® Mule Tool Backpack lies in its strength and durability, surpassing standard tool backpacks.

- Lightweight, durable and robust design.
- Made from water resistant 1000D tarpaulin.
- Waterproof zipper with two sliders complete with large T-handle pulls.
- Load-rated mounting straps for attaching to rails and scaffolding.
- New internal pocket layout for tool organisation.
- Multiple internal and external load-rated anchor points.
- Unique Serial number for product identification.
- Business card holder.

BISON BAG - 45KG/99LB

H01115

Packed with features, the GRIPPS® Bison Bag offers a holistic solution for the organisation, transport, and tethering of tools when working at heights. Tether anchors located both inside and outside the bag ensure tools remain secure and readily accessible. A zip closure with locking mechanism to hold the zip sliders in place, effectively safeguards contents from spills and accidental drops. Constructed from heavy-duty 26oz. canvas, providing resilience against punctures.

- Zip closure with locking mechanism protects against accidental opening of bag.
- Multiple inner pockets for comprehensive tool organisation.
- Multiple internal and external tether anchors.
- Heavy-duty webbing for longlasting survival in the harshest of construction environments.
- Puncture-proof composite insert in the bucket base.
- Unique Serial number for product identification.

BULL BAG - 113KG/249LB

H01110

Arguably the most robust lifting bag in the world, the GRIPPS® Bull Bag stands out with its reinforced design. Enhancing usability, the bag features a translucent Nylon TPU-coated top closure, complete with a secure zip with an auto-locking zip slider, allowing ample light to illuminate the contents within its vibrant red interior. The GRIPPS® Bull Bag boasts load-rated reinforced lifting straps, several built-in tether anchor points and a load-rated aluminium carabiner for securing the bag when working at height.

- Secure zip closure with auto-locking T-handle zip slider.
- Heavy-duty dual layer UV stabilised 2000 denier poly PVC with red interior.
- Integrated tether anchor points inside the bucket enable tools to be securely tethered to the interior of each bag.
- Reinforced rim around the bag opening ensures protection against potential damage.
- Dual-action aluminium carabiner for securing the bag when using it at height.
- Rubber feet not only shield the bag's base but also provide stabilisation on hard surfaces.
- Unique Serial number for product identification.
- Business card holder.

GRIPPS TETHERING STATION - 20T - 1KG/2.2LB

H01147

The GRIPPS® Tethering Station, known as the GTS-20T, is a versatile mobile workstation designed for various environments. Crafted from an exceptionally durable 26oz. Canvas, the station minimises the use of metals and features non-conductive tether anchors.

For tasks performed at elevated heights, secure the GRIPPS® Tethering Station to scaffold tubes, handrails, or elevated working platform (EWP) cages using the load-rated and resilient straps. Reinforced eyelets enable flexible hanging with hooks or securing with rope, accommodating a wide range of environments.

- Organises and tethers up to 20 tools.
- Mounting straps are compatible with EWP cages, scaffold tubing, and handrails.
- Reinforced stiff backing creates a stable workstation.
- Extra heavy-duty 26oz. canvas.
- Perimeter eyelets for adding extra security when suspended.

SKU	QTY	MAX LOAD (D-RING)	DIMENSIONS
H01147	1	1 kg 2.2 lb	60 cm x 55 cm 24 in x 22 in

GRIPPS TETHERING STATION - 20T RAIN COVER

H01147-RC

With the GRIPPS® Tethering Station Rain Cover, you can ensure your tools stay safe and dry, enabling you to tackle any task regardless of the weather.

Industrial work often means exposure to outdoor conditions, including rain. The GRIPPS® Tethering Station Rain Cover eliminates worries about your tools getting wet, thanks to its waterproof Nylon material.

SCAFFOLDERS KIT - 5-TOOL BUNGEE & COIL

The fully tethered GRIPPS® Scaffolders Kit - 5-Tool Bungee & Coil Kit comes fully assembled with five quality tools and certified GRIPPS® bungee and coil tool tethers, installed on a premium reinforced GRIPPS® Reinforced Synthetic Work Belt.

- Reinforced form-poly belt with 5 holsters.
- Fully certified and load-rated.
- Rigorously site tested.
- Lightweight and ergonomic.

BATTERY CATCH HOLSTER BELT RETRACTOR KIT

The Battery Operated Arrest (BOA) Holster is designed to securely hold battery-operated hand tools within easy reach. Compatible with any standard tool belt, its self-locking hook instantly secures your tool with a simple drop motion.

Perfect for professionals like scaffolders, roofers, or construction workers who require both productivity and safety while working at heights, the BOA Holster offers effortless tool holstering with its convenient single-handed operation.

ENCAPSULATION & MATTING

GAP WRAP

H06010 - H06012

The GRIPPS® Gap Wrap is a unique encapsulation device that prevents objects from being dropped accidentally within work site voids. The mesh of the GRIPPS® Gap Wrap encases pipes from 2" to 36" in diameter and uses heavy-duty Velcro strips to tighten the opening to tubes. Enhanced security can be attained by weaving ties through the numerous stainless-steel eyelets. The Gap Wrap includes a coated Poly PVC mesh, a feature also present in GRIPPS® Gap Mats.

These innovative safety devices feature a robust design with a vibrant red PVC edge binding, providing both strength and a clear visual warning for onsite workers. Easily fasten the GRIPPS® Gap Mats to the flooring using screws or zip ties through the conveniently placed corner eyelets.

- Constructed from fire retardant material.
- Red PVC edge binding for strength and visual warning.
- Coated Poly PVC meshing (as used in GRIPPS® Fire retardant (FR) Dropped Object Prevention Mat).
- Red PVC edge binding for strength and visual warning.

ENCAPSULATION & MATTING

GAP MAT

The GRIPPS® Gap Mat stands out as a robust and fire-retardant drop-prevention solution equipped with dedicated anchor points for tethering. Featuring six D-rings spread across the mat, users can effortlessly secure tools or equipment. To ensure a secure fit on grid mesh, the GRIPPS® Gap Mat can be easily fastened using cable ties (or similar ties), using its 22 strategically positioned eyelets around the edges.

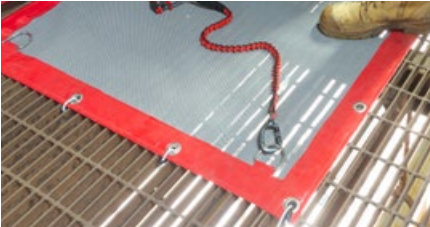

This innovative mat allows workers to work on grid mesh platforms, providing protection against tools and equipment slipping through the grating. Thanks to its highly durable mesh, the GRIPPS® Gap Mat is reusable, offering long-lasting performance.

- Re-use from job-to-job.
- Constructed from fire retardant material.
- Dual-purpose.
- High visibility.
- Custom sizing is available.

CUSTOM SIZE MAT ORDERS AVAILABLE

GAP GUARD

The GRIPPS® Gap Guard is an exceptional modular solution for preventing drops around handrails and grid mesh flooring. Highly flexible, durable, and reusable, these mats provide workers with a rapid solution to safeguarding work areas from drops. The GRIPPS® Gap Guard boasts a modular design with Velcro edging, which enables the seamless attachment of multiple mats end-to-end along handrails or in grid formations, effectively covering expansive flooring areas. With six 2.5kg load-rated D-rings and fire-retardant material, these mats are a sound solution for workers at heights in industrial surroundings.

- Anchor points load-rated to 2.5kg (ensure the mat is attached securely).
- Constructed from fire retardant material, as seen in the GRIPPS® Gap Wrap range.
- Robust hard-wearing GRIPPS® matting material.
- Modular design with Velcro edging allows the mats to be attached together end-to-end along a handrail or in a grid formation, covering a large area of flooring.
- Mountable on webbing strap too.

ENCAPSULATION & MATTING

MATGRIPP TAPE

MatGripp Tape facilitates the seamless connection of individual matting rolls, eliminating potential trip hazards. It offers the flexibility to customise matting for intricate areas that may require cutting to precise dimensions. Unlike other tapes, MatGripp Tape adheres exceptionally well to matting due to its specialised Butyl rubber composition.

- Strong adhesion and durability.
- Indoor and outdoor suitability.
- Compatible with GRIPPGrid Matting and the GRIPPclip.

SKU	LENGTH	WIDTH
H06050	30 m 98 ft	50 mm 2 in

H06050

*** AVAILABLE FROM AUGUST 2024 ***

GRIPPCLIP

The innovative GRIPPclip, manufactured from stainless steel, is the quickest and most effective method of fixing down matting to steel grate flooring.

By simply pushing the GRIPPclip through the holes in the matting, and clipping it to the cross rods below, matting and encapsulation products will be secured. To remove, simply pull the matting or encapsulation product straight up, or insert a flat screwdriver under the GRIPPclip to lift it up.

- Speeds up the process of applying matting and encapsulation products.
- Attaches GRIPPGrid matting to the "cross rods" of steel grating floors.
- Made of stainless steel.

GRIPPGRID – FR GRID MESH MATTING

H01316 / H01317

GRIPPGrid is a robust and reusable matting solution specifically designed to mitigate the risk of dropped or falling objects by securely enclosing grid mesh platforms.

Tailored for all elevated tasks performed on grip mesh platforms, GRIPPGrid offers an economical drop matting alternative that can be used multiple times.

In contrast to expensive and environmentally harmful disposable items such as shade cloths, GRIPPGrid matting stands out as a sustainable choice, providing long-lasting use without compromising on performance.

GRIPPGrid matting is both fire retardant and reusable, making it the only choice for projects involving grid mesh platforms.

SKU	WEIGHT	DIMENSIONS	COLOUR
H01316	430 g/m ²	1.87 m x 25 m 6 ft x 82 ft	Grey
H01317	530 G/M ²	1.87 m x 25 m 6 ft x 82 ft	Grey

MODULAR DROP MAT

H01307

The GRIPPS® Modular Drop Mat is crafted from robust, self-extinguishing canvas, providing a secure personal work space for tasks carried out on grid mesh or steel grate flooring.

Grid mesh and steel grate flooring pose significant risks for dropped object incidents. The GRIPPS® Modular Drop Mat effectively addresses this concern by enabling workers to perform various tasks without the worry of small objects slipping through the mesh.

Strategically placed, load-rated tether anchor points enable workers to tether tools weighing up to 3.0kg/6.6lbs to the mat. Velcro knee pads enhance practicality and comfort, and they can be easily repositioned and reattached to the drop mat, adapting to diverse work environments.

The raised edges of the mat prevent tools and objects from rolling off, and a reinforced zipper along each side facilitates the connection of multiple GRIPPS® Modular Drop Mats for expanded coverage.

- Heavy-duty 26oz. self-extinguishing canvas.
- Moveable Velcro kneeling pads.
- Eight load-rated D-rings for tethering tools.
- Zips on each side allow you to attach an unlimited number of Drop Mats to each other.
- Folds up and attaches directly to the GRIPPS® Mule Bag through purpose-made carabiners.

DROP ZONE MANAGEMENT

GRIPPS® “STOP THE DROPS” CAMPAIGN PACK

H05022

Globally, dropped objects persist as a significant issue and pose a critical risk to workers in industrial worksites. In response, GRIPPS® developed the “Stop The Drops Campaign Pack” to enhance safety awareness, focusing specifically on tool tethering and dropped object prevention.

This comprehensive campaign kit offers a variety of resources to facilitate the implementation of an effective safety campaign within worksites. It includes posters, mandatory signage for tool tethering, 20 insulated water bottle/spray can holsters (ideal for incentives), as well as pens and checklists for workers.

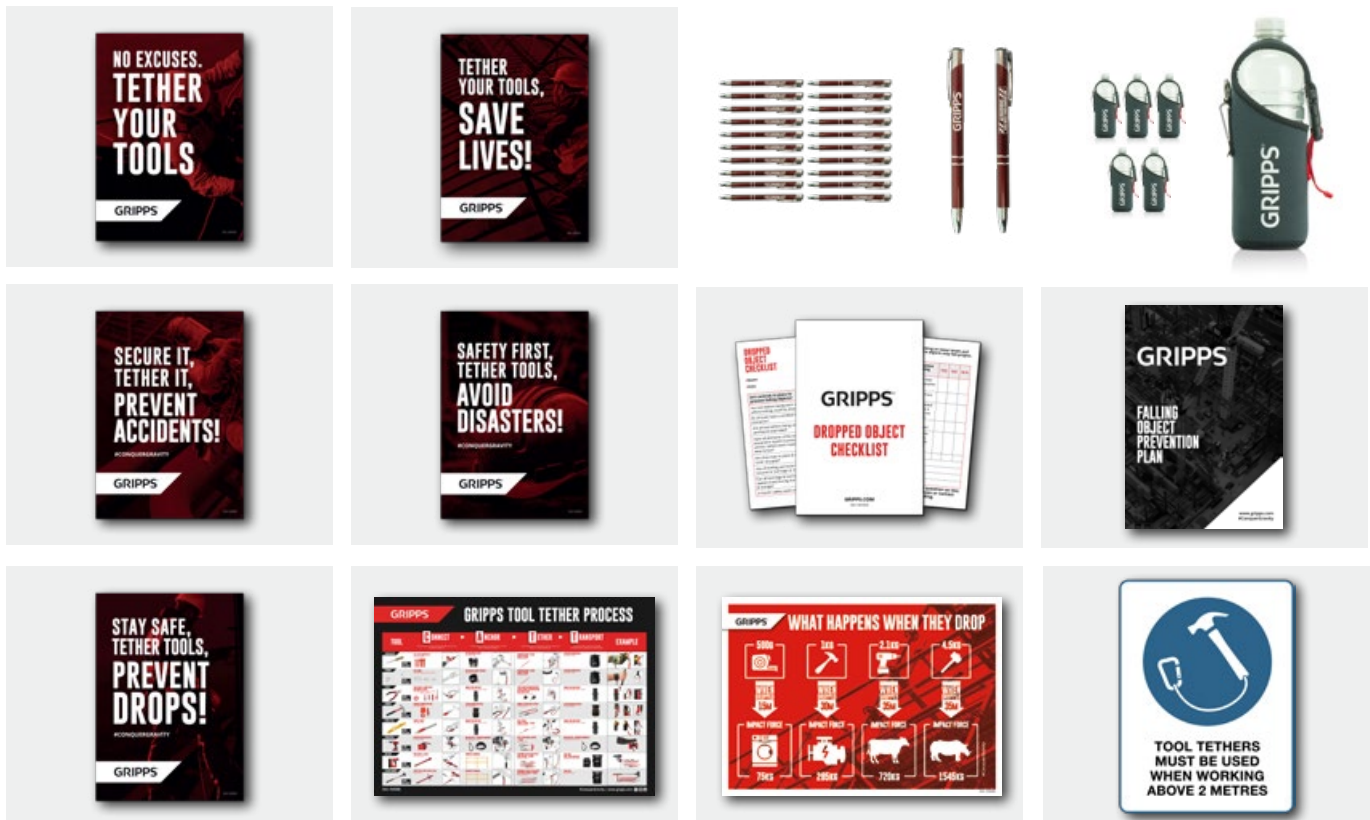

Moreover, the pack contains informative tool tethering introductory induction videos, suitable for showcasing to all employees. These videos cover essential topics such as:

- Risk awareness.
- ANSI/ISEA 121-2018 Standards.
- GRIPPS® CATT Methodology.
- Best practices of tool tethering.
- Tool tethering legislation.

OX CLAW HAMMER - 200Z

D13001

Crafted from high-quality steel, this hammer ensures exceptional durability, making it a reliable companion for various tasks. Its precision-balanced, one-piece steel construction guarantees optimum balance and control, allowing for accurate strikes every time. The hammer features a straight claw design, ideal for various applications. The non-slip Ox grip handle with shock reduction provides a comfortable yet secure grip, reducing hand strain during prolonged use.

- Non-slip Ox grip handle with shock reduction.
- Crafted from high-quality steel.
- Straight claw ending.

SKU	QTY	SIZE
D13001	1	20 oz

STABILA MAGNETIC SCAFFOLDERS LEVEL

D17010

The 81SM-25-H Stabila Magnetic Torpedo Level is the epitome of German precision and durability. Crafted from sturdy cast aluminium, this compact level features large, easy-to-read vials for accurate measurements in any position. Its trapezoidal profile offers an optimal grip, making it ideal for cramped spaces.

- 250mm solid aluminium construction.
- Heavy-duty industrial magnets.
- Normal position accuracy $\pm 0.5\text{mm/m}$.
- Made in Germany.

SKU	QTY	LENGTH
D17010	1	250 mm 9.8 in

SCAFFOLDERS TAPE MEASURE

D25010

This tape measure boasts SuperBlade technology, ensuring an extended standout for effortless long-distance measurements. Its double-sided blade printing features clear metric millimetre markings, allowing for accurate readings. The high-impact resistant ABS casing, coupled with a non-slip grip, guarantees sturdy handling. Equipped with a strong end hook to maintain true zero, reinforced 4 rivet dual-hook with magnet, and a wide blade, this tape measure is engineered for reliability.

- Powerful magnetic end hook with four rivets.
- Abrasion-resistant blade and mechanism.
- High-impact ABS case.

GRIPPS® NIPS WITH GRIPPLOCK CABLE

H09010

The GRIPPS® Nips with Gripplock Cable, with integrated tether point, are specifically designed for those working at heights, making them a must-have tool for scaffolders and form workers.

- Integrated tether point - GRIPPS® Gripplock Cable - 3 mmx120 mm included.
- No tape wrapping or heat-shrink required.
- Black phosphate steel - provides exceptional durability and strength.
- Designed for soft and hard wire cutting.
- Suitable for twisting and cutting binding wire.
- Extra wide cutting edge.
- Made in Germany.
