SCREWLOCK CABLE

TOOL CONNECTOR

CODE : H01030 | H01031 | H01032 | H01033

ANSI/ISEA 121-2018 COMPLIANT

The Screwlock Cable is one of the quickest, easiest and most cost effective way to create a tool connection point from existing hang-holes or slots. With a core band made from aircraft grade steel, the fully load rated and certified Screwlock Cable is as dependable as it is hard-wearing.

Create your secure tool connection point by simply threading the Screwlock Cable through an existing hanghole/ slot in your tool, and screw closed. Add a drop of thread-locking compound before you screw shut to create a permanent, load rated connection point on your tools.
