

MAX LOAD : 16KG / 35LBS

DUAL ARM TOOL-HITCH

TOOL CONNECTOR -  HEAVY

CODE : H01057

ANSI/ISEA 121-2018 COMPLIANT

Versatile & strong, the Tool-Hitch range has you covered when working with power tools & heavies at height. A simple choking mechanism in four variations allows the Tool-Hitch to secure anything from power tools to crowbars to sledgehammers.

By creating a loop around an open or enclosed handle, the Dual Arm Tool-Hitch produces a simple but strong and dependable tool connection point.

For application on open spaces, such as a sledgehammer handle, the Single Arm, Dual Arm and Heavy Duty Tool-Hitch variations allow you to anchor the Tool-Hitch in position with the use of V-Gripp Tape.
