MAX LOAD : 0.5KG / 1.0LBS

**COIL E-TETHER WITH POLY CLAMP
& E-CATCH (NON-CONDUCTIVE)**

TOOL TETHER

CODE : H01059

The Coil E-Tether With Poly Clamp & E-Catch (Non-Conductive) is your non-conductive solution for keeping small electronic devices secure at height in electrical environments. A tactical strength poly clamp allows absolute freedom of application, allowing you to anchor your phone, camera, radio or other electronic devices to virtually anywhere on your body.

A side-release attachment dock allows you to hot-swap any electronic device, providing a quick and secure solution to tethering cameras, cell phones, radios, and other small objects with an existing loop/hang hole.

The included E-Catch creates a tool connector point on items that do not come with an existing loop/hang-hole and are traditionally very difficult to tether. The PU coil stays compact and tight, staying out of the way when not in use.
