@GRIPPSGLOBAL

Suitable for all height works conducted on gripmesh platforms, GRIPPGrid provides a cost-effective drop matting that can be reused multiple times.

Shade cloths and other similar disposable products are costly, wasteful, short-lasting and have a negative impact on the environment during disposal.

GRIPPGrid matting is non-slip, fire resistant, and reusable making it the ideal choice for gridmesh platform works.

Made from a unique blend of polyester with additional PVC coating.
