

# Disc Brake Pads

## Technical features for SHIMANO disc brake pad

### Resin pad

- Flexible compound
- Less noise
- Focus on controllable performance
- Designed for dry and wet conditions

### Metal pad

- Rigid compound
- Longer service life
- High power in severe conditions
- Designed for muddy and sandy conditions

### New resin friction material

- Consistently smooth and quiet braking operation
- Predictable braking power
- 40% better wear-resistance than previous models
