More to come soon...

A complete solution for illuminating small spaces with individual pixel control which provides limitless possibilities for special effect lighting.

This complete compact kit includes effect lighting bars, cabling, and power supply while allowing for remote playback via a built-in WIFI network. Utilizing your own smart phone or laptop enables the end user to choose from a large selection of effects and adjust their brightness and speed on-the-fly.

Plug'n'Play connectivity allows for quick set-up in demanding, high paced environments.

Large on-board power supply allows for powering up to 6 meters of LFX Bars.

Utilizing cutting edge pixel chip technology the LFXBX LED bars have been tested on camera and provide flicker-free lighting at speeds up to 1900 fps.
